

ANGLAIS • 1RE TECH

ANGLAIS – CLASSE DE PREMIÈRE TECHNIQUE

LEÇON N03

ENVIRONMENT WELLBEING AND HEALTH

DURÉE CONSEILLÉE : 13 SÉANCES (FICHE DE PROGRESSION HARMONISÉE)

DANS CETTE LEÇON

Cette leçon développe les compétences de communication en anglais autour de trois thèmes liés : la visite des sites touristiques, la protection de l'environnement (plantation d'arbres, jardinage, habitats naturels) et la prévention des maladies transmissibles. Elle mobilise des structures grammaticales clés (used to, tag questions, compound nouns, direct/indirect speech) à travers des situations concrètes du quotidien camerounais.

- À la fin de cette leçon, je sais échanger des informations sur la visite de sites touristiques camerounais en utilisant le vocabulaire approprié.
- À la fin de cette leçon, je sais employer correctement used to, didn't use to et to be used to pour décrire des habitudes passées et présentes.
- À la fin de cette leçon, je sais comprendre des textes audio sur la plantation d'arbres, le jardinage et la protection des habitats naturels.
- À la fin de cette leçon, je sais former et utiliser les tag questions pour confirmer une information.
- À la fin de cette leçon, je sais lire et exploiter des textes sur la prévention des maladies transmissibles.
- À la fin de cette leçon, je sais former les noms composés et leurs pluriels.

SOMMAIRE

1. Visiting tourist sites : speaking and grammar (used to) indirect speech (Part 2)
2. Protecting the environment : listening, vocabulary and tag questions
3. Preventing communicable diseases : reading and compound nouns
4. Reporting what people say : direct and indirect speech (Part 1)
5. Reporting questions and commands :
6. Writing and integration : communicating on health issues
7. Activité d'intégration
8. Méthodes et exercices résolus
9. Exercices
10. Corrigés des exercices
11. Fiche bilan

OBJECTIFS DE LA LEÇON

- À la fin de cette leçon, je sais échanger des informations sur la visite de sites touristiques camerounais en utilisant le vocabulaire approprié.
- À la fin de cette leçon, je sais employer correctement used to, didn't use to et to be used to pour décrire des habitudes passées et présentes.
- À la fin de cette leçon, je sais comprendre des textes audio sur la plantation d'arbres, le jardinage et la protection des habitats naturels.
- À la fin de cette leçon, je sais former et utiliser les tag questions pour confirmer une information.
- À la fin de cette leçon, je sais lire et exploiter des textes sur la prévention des maladies transmissibles.
- À la fin de cette leçon, je sais former les noms composés et leurs pluriels.
- À la fin de cette leçon, je sais rapporter les paroles de quelqu'un au discours indirect (déclarations, questions, ordres).
- À la fin de cette leçon, je sais rédiger une composition pour communiquer sur les questions de santé et la prévention des maladies transmissibles.

PRÉREQUIS

- Les temps de base de l'anglais (simple present, simple past, present continuous) vus en classe de Seconde

- Le vocabulaire élémentaire de la nature et du corps humain
- La formation des questions en anglais (auxiliaires do/does/did, inversion)
- Les pronoms personnels, possessifs et les déterminants de base
- La rédaction d'un paragraphe simple en anglais (niveau Seconde)

1 VISITING TOURIST SITES : SPEAKING AND GRAMMAR (USED TO)

Situation d'accroche. Pendant les grandes vacances, Amina, élève de Première technique à Bafoussam, a visité le lac de Bambalang avec sa famille. De retour en classe, elle raconte à ses camarades comment le paysage a changé : "People used to plant trees here, didn't they?" Mais la discussion dérive vite : un camarade revient de l'hôpital où son frère est soigné pour le paludisme, une maladie évitable. Comment parler des sites touristiques du Cameroun, des actions de protection de l'environnement et de la prévention des maladies transmissibles en anglais correct ? Cette leçon donne les outils linguistiques pour échanger sur le bien-être environnemental et la santé.

Problématique. How can we exchange information about tourist sites in Cameroon and talk about how places and habits have changed over time ? In this first part of the lesson, you will learn the vocabulary of tourism, discover six major Cameroonian tourist sites, practise speaking in real situations, and master the grammar of **used to** and **be used to**.

1.1 Vocabulary : words and expressions for visiting tourist sites

Before you can speak about tourism, you need the right words. Read the list carefully, repeat each word aloud, and note the pronunciation of the underlined syllables.

English word	Meaning / French gloss
tourist attraction	un site touristique, un lieu qui attire les visiteurs
sightseeing	le tourisme, la visite de monuments et de sites (to go sightseeing)
tour guide	un guide touristique (personne qui accompagne et explique)
entrance fee	le droit d'entrée, le prix du billet
landscape / scenery	le paysage, le décor naturel
wildlife reserve	une réserve de faune, une zone protégée pour les animaux
craft market	un marché artisanal (objets faits à la main)
booking / reservation	une réservation (to make a booking)
itinerary	un itinéraire, le programme détaillé d'un voyage
opening hours	les heures d'ouverture
souvenir	un souvenir, un objet rapporté d'un voyage
accommodation	l'hébergement (hôtel, auberge, camping)

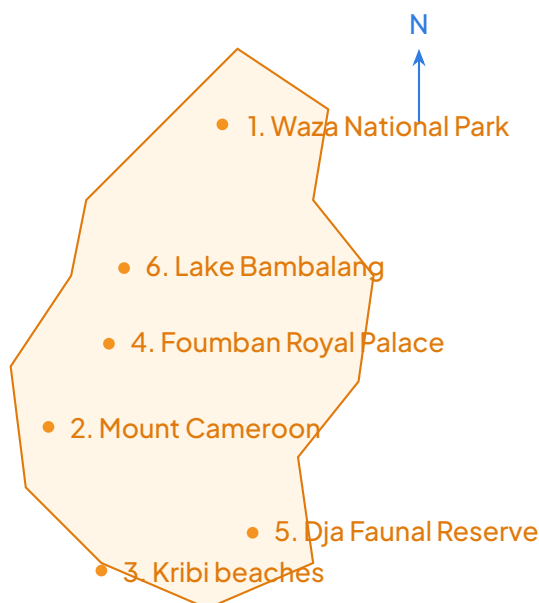

EXAMPLE Using the vocabulary in context

Last holidays, my family planned an itinerary in the West Region. Our tour guide took us to the Foumban craft market. The entrance fee to the Royal Palace was low, and the landscape around the palace was wonderful. We made a booking at a small hotel for two nights. The accommodation was basic but clean.

1.2 Major tourist sites in Cameroon

Cameroon is often called “Africa in miniature” because it has almost all the landscapes of the continent : beaches, mountains, savannah, rainforest and lakes. Here are six major sites you must know for your exams and general culture.

- **Waza National Park** (Far North Region) : a famous **wildlife reserve** with elephants, lions, giraffes and antelopes. It receives thousands of visitors each year.
- **Mount Cameroon** (South West Region) : an active volcano, about 4095 m high, near Buea. It is the highest peak in West and Central Africa. Many tourists climb it every year.
- **Kribi beaches** (South Region) : white sand beaches on the Atlantic Ocean, and the famous Lobé Falls where the river flows directly into the sea.
- **Foumban Royal Palace** (West Region) : the palace of the Bamoun sultanate, with a museum and a large craft market famous for bronze casting and embroidery.
- **Dja Faunal Reserve** (South / East Regions) : a huge rainforest reserve, a UNESCO World Heritage site since 1987, rich in biodiversity (gorillas, chimpanzees, forest elephants).
- **Lake Bambalang** (North West Region, Ndop Plain) : a large artificial lake surrounded by hills and rice fields, ideal for fishing and boat rides.

Carte schématique du Cameroun : localisation approximative de six sites touristiques majeurs (croquis simplifié, sans échelle précise; la flèche indique le nord).

LESAVAIS-TU ?

Mount Cameroon, the highest peak of West and Central Africa

Mount Cameroon rises to about 4095 metres. It is the highest point in West Africa and Cen-

tral Africa. It is still an active volcano : its last eruptions happened in 1999 and 2000. Every year, athletes run the famous Race of Hope from Buea to the summit and back. In the past, fewer tourists used to climb the mountain because there were no good paths ; today, trained guides lead visitors safely to the top.

1.3 Speaking : exchanging information on visiting tourist sites

When you visit a tourist site, you need to ask practical questions and describe your experience. Here are useful expressions classified by function.

Function	Useful expressions
Asking for directions	Excuse me, how can I get to the craft market ? / Is it far from here ? / Could you show me the way to the palace ?
Asking about prices	How much is the entrance fee ? / Is there a discount for students ? / What is the price for a guided tour ?
Asking about opening hours	What time does the museum open ? / When does it close ? / Is it open on Sundays ?
Describing a past visit	We visited Waza last year. The wildlife was amazing ! / We used to go there every holiday.
Giving an opinion	In my opinion, Kribi is the best beach in Cameroon. / I really enjoyed the landscape. / I found the trip exhausting but rewarding.

MÉTHODE How to exchange information about a tourist site

1. Greet the person politely : Good morning, Sir / Madam.
2. Ask your question clearly : directions, price or opening hours.
3. Listen to the answer and react : Thank you very much ! / That is interesting ! / I see.
4. Share your own experience : say where you went, what you saw, and what you liked (use used to for past habits).
5. Close the exchange politely : Have a nice day ! / I hope to visit again. / Goodbye !

EXEMPLE Guided dialogue : a tourist at the Fouban craft market

Tourist : Good morning, Madam. I am visiting Fouban for the first time. How can I get to the Royal Palace from here ?

Craftswoman : Good morning, Sir. It is very easy. Go straight along this road, then turn left at the mosque. The palace is just behind it.

Tourist : Thank you. And how much is the entrance fee?

Craftswoman : It is about 1000 francs CFA for visitors. The museum opens at 9 a.m. and closes at 5 p.m.

Tourist : That is good to know. Your market is wonderful! Did people use to make these bronze statues a long time ago?

Craftswoman : Yes, they did. Our artisans used to work only for the Sultan's palace, but today they sell to everyone. We are used to receiving many tourists now.

Tourist : Fantastic! I will buy a souvenir before I leave. Have a nice day!

Craftswoman : You too, Sir. Enjoy your visit!

1.4 Grammar focus : used to + base verb

Intuition first. Look at Amina's sentence : "People used to plant trees here." She is not talking about today. She is talking about a **past habit** that has stopped : people planted trees regularly in the past, but they do not do it anymore. English has a special structure for this idea : **used to** + base verb.

DÉFINITION Used to + base verb

Used to + base verb (infinitive without to) expresses a past habit or a past state that is no longer true today (une habitude ou un état révolu du passé).

Affirmative : Subject + used to + base verb.

People used to travel by train to Ngaoundéré. (Ils avaient l'habitude de voyager en train ; aujourd'hui ce n'est plus le cas.)

There used to be a dense forest around the lake. (État passé révolu.)

Negative : Subject + didn't use to + base verb.

We didn't use to have mobile phones at school.

Question : Did + subject + use to + base verb?

Did tourists use to visit Waza in large numbers?

ATTENTION Spelling trap : used to vs use to

The most frequent error is to write use to without the -d in affirmative sentences. Remember :

- Affirmative : always used to with -d : She used to live in Buea. (never she use to live).
- Negative and question : after did / didn't, the -d disappears : He didn't use to smoke. (never didn't used to) ; Did you use to play football?

Why? Because the past tense is already carried by did, exactly like He didn't go (never He didn't went).

ATTENTION Pronunciation tip

- Used to (habit) : pronounced /juːstuː/ (the s sounds like s in see, strong form) or /juːstə/ (weak form in fast speech).
- Use to (after did/didn't) : pronounced /juːstə/ (the s sounds like z in easy).

Practise : They used to come /juːstuː kɛm/ vs Did they use to come? /dɛd ðe juːstə kɛm/.

EXAMPLE Waza National Park : a changing site

Waza National Park receives thousands of visitors each year. But the park has changed a lot. In the 1980s, it used to host even more elephants than today. Poaching and drought reduced the herds. Tourists also used to sleep inside the park in simple camps ; now most of them stay in lodges outside. Rangers didn't use to carry radios, but today they communicate with modern equipment to protect the animals.

1.5 Grammar focus : to be used to + noun / -ing

Intuition first. Compare these two sentences :

My grandfather **used to live** in Maroua. (He lived there in the past ; now he does not.)

My grandfather **is used to** the hot climate. (The heat is normal for him ; he is accustomed to it.)

The structures look similar but the meanings are completely different. **To be used to** + noun or verb-ing means to be accustomed to (être habitué à).

DÉFINITION To be used to + noun / -ing

To be used to + noun or verb-ing expresses that a situation is familiar or normal for someone (accoutumance présente ou passée selon le temps de be).

Structure : Subject + be (conjugated) + used to + noun / verb-ing.

Tourists are used to the hot climate of the Far North.

She is used to walking long distances. (Elle a l'habitude de marcher longtemps.)

We are not used to eating spicy food.

He was used to the noise. (Passé : il avait l'habitude.)

MÉTHODE How to distinguish “used to do” and “be used to doing”

1. Look at the verb be. Is there a form of be (am, is, are, was, were) before used to? If yes,

it is the structure of accoutumance (be used to).

- Look at what follows. A base verb (infinitive) follows **used to do** ; a noun or an -ing form follows **be used to**.
- Check the meaning. **Used to do** = a past habit that has stopped (révolu). **Be used to doing** = something normal and familiar now (habitude présente).
- Translate mentally. If you can say *avant*, *on faisait...*, use **used to do**. If you can say *on est habitué à...*, use **be used to doing**.

used to + base verb (past habit/state, now finished)	be used to + noun/-ing (accustomed, familiar)
People used to travel by train to Ngaoundéré. (They do not anymore.)	Travellers are used to long journeys in the North. (Long journeys are normal for them.)
We used to swim in Lake Bambalang every holiday.	The fishermen are used to swimming in the lake.
Foumban artisans used to work only for the Sultan.	Foumban artisans are used to selling to tourists.
I didn't use to like spicy food.	I am not used to spicy food yet.
There used to be a forest here.	We are used to the noise of the city.

ATTENTION Common confusion – do not mix !

- Wrong : Tourists **used to** the heat. (missing are) → Right : Tourists **are used to** the heat.
- Wrong : I **am used to** walk there. → Right : I **am used to** walking there. (after **be used to**, use the -ing form).
- Wrong : I **used to** walking there. → Right : I **used to** walk there. (after **used to**, use the base verb).
- Wrong : Did you **used to** go ? → Right : Did you **use to** go ? (no -d after did).

EXERCICE RÉSOLU 1 Choosing the correct structure

Énoncé. Complete each sentence with **used to + base verb** or **be used to + -ing**, using the verb in brackets.

- When I was a child, my family ... (visit) Kribi every December.
- The guides at Waza ... (work) under the sun ; it is normal for them.
- Tourists in the 1980s ... (not / take) many photos because cameras were rare.
- My grandmother ... (cook) on a wood fire ; she has done it all her life.

SOLUTION

Solution détaillée.

1. used to visit — a repeated action in childhood, finished today : past habit → used to + base verb.
2. are used to working — working under the sun is normal for them : accoutumance → be used to + -ing.
3. didn't use to take — negative past habit ; after didn't, write use to without -d.
4. is used to cooking — a lifelong habit that is still true and familiar : accoutumance → be used to + -ing.

EXERCICE 1 Practice : talking about change

Instructions : Complete the sentences with the correct form (used to + base verb, didn't use to, or be used to + -ing / noun).

1. Fifty years ago, many people ... (travel) to Douala by boat.
2. The rangers at Dja Reserve ... (walk) in the forest ; they do it every day.
3. ... you ... (go) sightseeing with your parents when you were younger ?
4. We ... (not / have) a tour guide in the past ; we visited alone.
5. Visitors ... (the entrance fee) at Fouban ; they pay it without complaining.
6. Rewrite with used to : In the past, people planted many trees around Lake Bambalang.
7. Complete with the correct form of be used to : My little brother ... (not) ... (sleep) in a tent. He finds it scary.

CORRIGÉ Exercice : talking about change

1. used to travel (past habit, finished).
2. are used to walking (accoutumance, present).
3. Did you use to go (question about a past habit ; no -d after did).
4. didn't use to have (negative past habit).
5. are used to the entrance fee (familiar situation ; be used to + noun).
6. People used to plant many trees around Lake Bambalang.
7. is not used to sleeping (accoutumance négative présente).

À RETENIR Key points of this section

- Tourism vocabulary : tourist attraction, sightseeing, tour guide, entrance fee, landscape/scenery, wildlife reserve, craft market, booking, itinerary, opening hours, souvenir, accommodation.

- Six major Cameroonian sites : Waza National Park (Far North), Mount Cameroon (4095 m, South West), Kribi beaches (South), Foumban Royal Palace (West), Dja Faunal Reserve (South/East, UNESCO), Lake Bambalang (North West).
- **Used to** + base verb = past habit or state, no longer true : People used to travel by train. Negative : didn't use to. Question : Did ... use to ?
- **Be used to** + noun/-ing = to be accustomed to (familiar) : Tourists are used to the hot climate.
- Pronunciation : used to /juːstuː/ (affirmative) vs use to /juːstə/ (after did/didn't).

2 PROTECTING THE ENVIRONMENT : LISTENING, VOCABULARY AND TAG QUESTIONS

2.1 Transition from the previous section

In the previous section we practised talking about **visiting tourist sites** and we learned how to use **used to** for past habits (We used to hike in the mountains). Now we turn our attention to **protecting the environment**. You will hear short recordings about school green clubs and community reforestation campaigns, learn the key vocabulary for planting trees and gardening, and master **tag questions** to check information politely.

2.2 Vocabulary : planting trees, gardening and protecting natural habitats

DÉFINITION Key vocabulary

The following words and expressions are frequently used when we talk about tree-planting, gardening and habitat protection. Learn the English term, its French gloss and a short example sentence.

English term	French gloss	Example sentence
seedling	jeune plant / semis	The children planted a seedling in the school garden.
nursery	pépinière	We visited the nursery where young trees are grown.
reforestation	reboisement	The reforestation project aims to restore 500 hectares.
pruning	élagage / taille	Regular pruning helps trees grow stronger.
compost	compost	We add compost to enrich the soil.
watering can	arrosoir	She filled the watering can and watered the seedlings.
habitat	habitat naturel	Deforestation destroys the natural habitat of many animals.
endangered species	espèce en danger	The gorilla is an endangered species in this region.
deforestation	déforestation	Deforestation reduces biodiversity dramatically.
biodiversity	biodiversité	Protecting forests preserves biodiversity .

EXEMPLE Vocabulary in context

Listen to the short dialogue and underline the vocabulary items you hear.

Dialogue (audio script)

Teacher : "Good morning, club members ! Today we will visit the school **nursery** to check the **seedlings**."

Student A : "Are we going to do some **pruning** as well?"

Teacher : "Yes, and we will add **compost** to the beds. Don't forget your **watering cans**."

Student B : "I read that **deforestation** threatens the **habitat** of **endangered species**."

Teacher : "Exactly. Our **reforestation** work helps protect **biodiversity**."

2.3 Listening : school green club and community reforestation

MÉTHODE How to succeed in a listening task

1. Read the questions first. Identify the topic and predict the vocabulary you will hear.
2. Highlight key words in the questions (numbers, names, actions).

3. During the first listening, write only abbreviations or symbols (e.g. “+50 trees”, “2023”).
4. Second listening : complete full sentences and check your notes.
5. After listening, compare answers with a partner and discuss any doubts.

EXEMPLE Listening text 1 – School Green Club

Title : “Our Green Club’s Achievements”

Script (read aloud by the teacher or played from audio) :

“Good afternoon everyone. I am Marie, the president of the Green Club at Lycée Technique de Yaoundé. Over the past five years our club has planted more than 300 trees on the school grounds. In 2019 we started with 40 seedlings. Each year we increased the number by about 20 percent. Last year, 2023, we planted 85 trees in a single campaign. We also organise weekly **watering** sessions and monthly **pruning** workshops. The club works closely with the local forestry office to choose native species that support **biodiversity**. Thank you.”

EXERCICE 2 Comprehension questions – Listening text 1

1. How many trees were planted in 2019 ?
2. By what percentage did the club increase planting each year ?
3. How many trees were planted in 2023 ?
4. Name two activities the club organises regularly.
5. With which institution does the club cooperate ?

CORRIGÉ Exercice 1

1. 40 seedlings.
2. About 20% per year.
3. 85 trees.
4. Weekly watering sessions and monthly pruning workshops.
5. The local forestry office.

EXEMPLE Listening text 2 – Community reforestation campaign

Title : “Reforestation in the East Region”

Script :

“Hello, I am Paul, a community leader from Bertoua. Last month we launched a **reforestation** campaign along the banks of the Lom River. Volunteers from three villages gathered 1200 **seedlings** from the regional **nursery**. In two days they planted all the seedlings, covering 15 hectares. The project aims to stop **deforestation** and restore the **habitat** of **endangered species** such as the forest elephant. We will monitor the growth for the next three years. Every volunteer received a **watering can** and a bag of **compost**. Together we can make a difference.”

EXERCICE 3 Comprehension questions – Listening text 2

1. Where did the campaign take place?
2. How many seedlings were planted?
3. What area was covered?
4. Which endangered species is mentioned?
5. What did each volunteer receive?

CORRIGÉ Exercice 2

1. Along the banks of the Lom River in the East Region.
2. 1200 seedlings.
3. 15 hectares.
4. The forest elephant.
5. A watering can and a bag of compost.

2.4 Grammar : Tag questions

DÉFINITION Tag question

A **tag question** is a short question added at the end of a statement to ask for confirmation or agreement. It consists of an auxiliary verb + a pronoun. The polarity of the tag is oppo-

site to the polarity of the main clause.

PROPRIÉTÉ Formation rules

- Identify the auxiliary verb in the main clause (**be**, **do/does/did**, **have**, modal).
- Use the same auxiliary in the tag.
- Invert the polarity : positive statement → negative tag, negative statement → positive tag.
- The subject of the tag is always a pronoun that matches the subject of the main clause.

Main clause auxiliary	Positive statement → Tag	Negative statement → Tag
be (am/is/are/was/were)	You are ready, aren't you?	She isn't here, is she?
do/does/did	They plant trees, don't they?	He didn't water them, did he?
have (perfect)	We have finished, haven't we?	It hasn't rained, has it?
Modals (can, could, will, would, should, must, might)	You can help, can't you?	They shouldn't cut, should they?

ATTENTION Common mistakes

- Wrong polarity in tag : "You planted trees, did you?" → correct : "You planted trees, didn't you?"
- Forgetting polarity inversion : "We shouldn't cut down forests, shouldn't we?" → correct : "We shouldn't cut down forests, should we?"
- Using do with be : "She is late, does she?" → correct : "She is late, isn't she?"

EXEMPLE Special cases

- Let's → shall we? "Let's plant trees, shall we?"
- I am → aren't I? "I am late, aren't I?" (not amn't I)

- Imperative → will you? / won't you? / would you? "Water the seedlings, will you?"
- There is/are → isn't there? / aren't there? "There are many birds, aren't there?"

EXEMPLE Intonation

- Falling tone – the speaker expects agreement or confirmation. "Trees absorb carbon dioxide, don't they?"
- Rising tone – a genuine question; the speaker is unsure. "You haven't seen my watering can, have you?"

EXERCICE RÉSOLU 2 Tag question practice

Task : Add the correct tag question to each sentence.

1. The seedlings need water every day, _____?
2. We didn't use chemical fertiliser, _____?
3. She has already planted ten trees, _____?
4. Let's organise a cleaning day, _____?
5. I am responsible for the compost, _____?

SOLUTION

Solution :

1. don't they? (positive need → negative tag with do)
2. did we? (negative didn't use → positive tag with did)
3. hasn't she? (positive has planted → negative tag with has)
4. shall we? (special case Let's)
5. aren't I? (special case I am)

2.5 Pronunciation and intonation practice

MÉTHODE Pair work – Interview about gardening experience

1. Sit face-to-face with a partner.
2. Student A asks Student B about his/her tree-planting or gardening experience using tag questions. Example : "You have planted a tree before, haven't you?"
3. Student B answers briefly and adds a tag question back. Example : "Yes, I have. You enjoy working outdoors, don't you?"

4. Switch roles after five questions.
5. Use both falling and rising intonation. Note which tags sound like confirmation and which sound like real questions.

EXERCICE 4 Written practice – Tag questions

Complete each sentence with the correct tag question.

1. The community planted 500 trees last year, _____?
2. Deforestation destroys natural habitats, _____?
3. We shouldn't waste water, _____?
4. There is a nursery near the school, _____?
5. Let's start a compost bin, _____?

CORRIGÉ Exercice 3

1. didn't they?
2. doesn't it?
3. should we?
4. isn't there?
5. shall we?

2.6 Illustration : Tree anatomy vocabulary

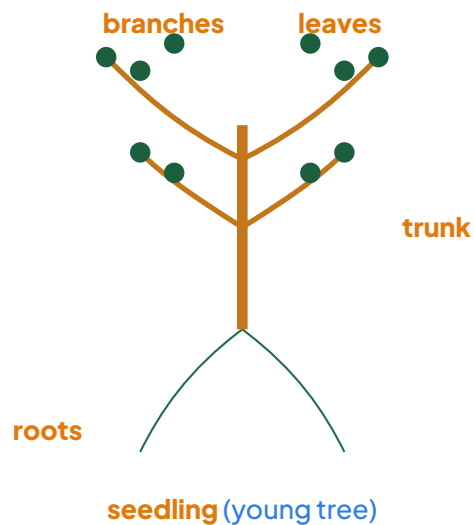

Figure 1 – Main parts of a tree with key vocabulary labels.

2.7 Illustration : Evolution of trees planted by the school green club (2019–2023)

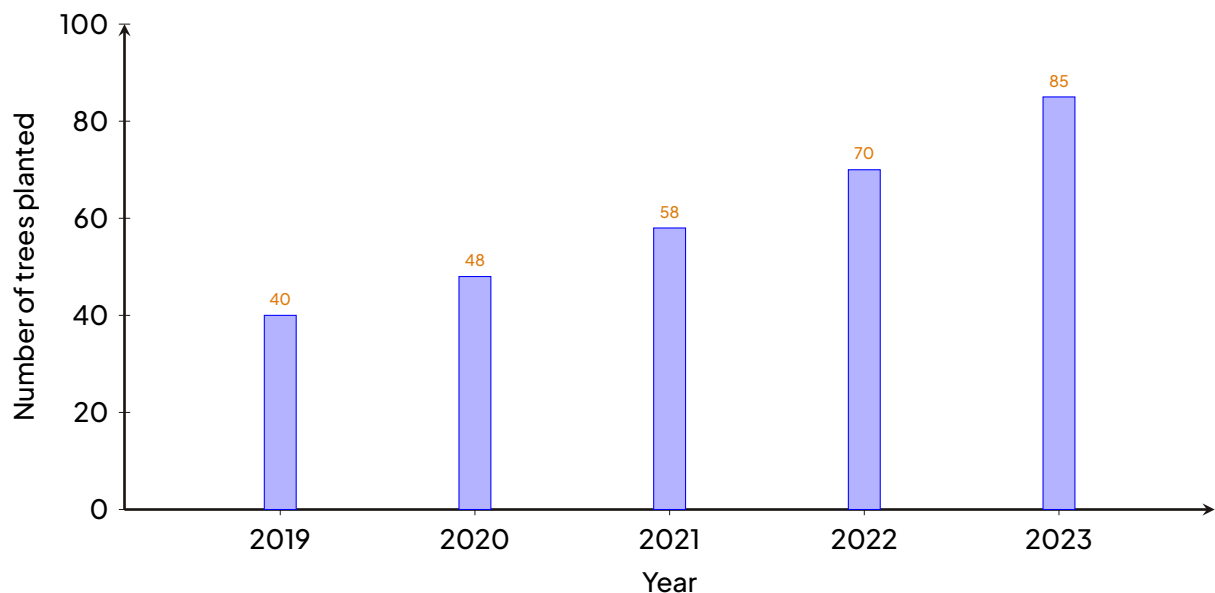

Figure 2 – Bar chart showing the fictitious but realistic increase in trees planted by the Lycée Technique Green Club from 2019 to 2023 (about +20% per year).

2.8 Illustration : Tag question formation table (summary)

Main clause	Auxiliary	Positive → Tag	Negative → Tag
She is a gardener.	be	isn't she?	is she?
They plant trees.	do	don't they?	do they?
We have finished.	have	haven't we?	have we?
You can help.	modal (can)	can't you?	can you?
Let's go.	—	shall we?	—
I am ready.	be	aren't I?	am I?

Figure 3 – Quick reference for forming tag questions with the most common auxiliaries and special cases.

2.9 Did you know ? – Cameroon's green heritage

LESAVAIS-TU ?

Cameroon and the Congo Basin

Cameroon hosts part of the **Congo Basin**, the world's second largest tropical forest after the Amazon. This vast forest ecosystem stores enormous quantities of carbon and shelters exceptional **biodiversity** (gorillas, forest elephants, endemic birds). The **reforestation** actions carried out by school green clubs and local communities contribute directly to the preservation of this world heritage.

Le Cameroun abrite une partie du bassin du Congo, deuxième forêt tropicale du monde après l'Amazonie. Les actions de reboisement des clubs verts scolaires et des communautés locales contribuent à préserver ce patrimoine mondial.

2.10 Quantitative example – Impact of planting trees

EXEMPLE

Carbon absorption estimate

A single mature tree can absorb around 20 kg of CO₂ per year. If the school club plants 50 trees and they all reach maturity, the annual absorption would be :

$$50 \times 20 \text{ kg} = 1000 \text{ kg} = 1 \text{ tonne of CO}_2 \text{ per year.}$$

Tag question practice : "Planting 50 trees makes a difference, doesn't it?"

2.11 Integration activity – Mini-project

MÉTHODE Mini-project : Design a school awareness poster

1. Work in groups of three.
2. Choose one environmental action (tree planting, composting, water saving, protecting a local habitat).
3. Create a poster (A3 size) that includes :
 - A catchy title in English.
 - At least five vocabulary items from this section (e.g. **seedling**, **compost**, **biodiversity**).
 - Two tag questions to engage the reader (e.g. "You want a greener school, don't you?").
 - A simple bar chart or drawing showing a target (e.g. "Goal : 100 trees in 2025").
4. Present the poster to the class in 2 minutes, using tag questions to involve the audience.

2.12 Self-evaluation checklist**EXERCICE 5** Check your progress

Tick the boxes you can do confidently.

- ☐ I can list and spell 10 vocabulary items related to tree planting and habitat protection.
- ☐ I can understand the main ideas of a short listening text about a reforestation campaign.
- ☐ I can take notes using abbreviations while listening.
- ☐ I can form correct tag questions with be, do/does/did, have, modals and the special cases.
- ☐ I can distinguish falling and rising intonation in tag questions.
- ☐ I can interview a classmate about gardening experience using tag questions.
- ☐ I can write a short paragraph (50–80 words) describing a local environmental action, including at least two tag questions.

CORRIGÉ Self-evaluation

Discuss your ticks with a partner. For any unchecked item, review the corresponding box

(vocabulary list, listening scripts, tag-question table, pronunciation practice) and redo the related exercise.

3 PREVENTING COMMUNICABLE DISEASES : READING AND COMPOUND NOUNS

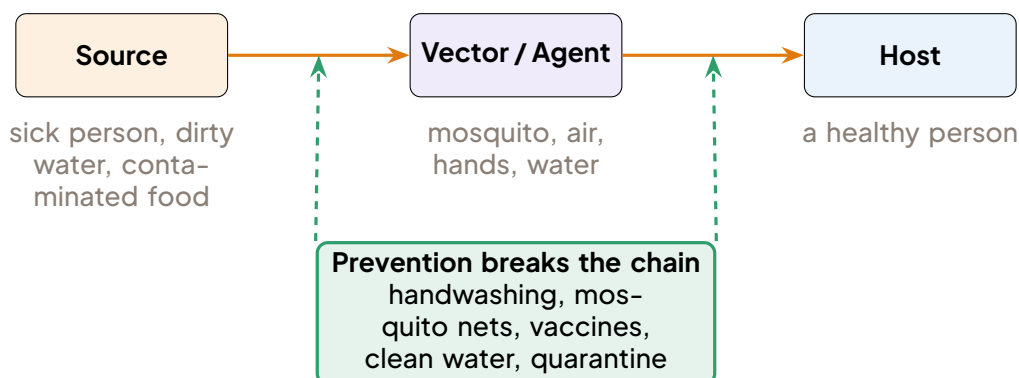

In the previous section, we listened to texts about planting trees and protecting natural habitats, and we practised tag questions. A clean environment is the first step towards good health. But even in a clean environment, diseases can spread from person to person. In this section, we move from protecting nature to protecting our bodies : we will read texts about **preventing communicable diseases** (les maladies transmissibles), learn the vocabulary of health, and study a very useful grammar point : **compound nouns** (les noms composés).

3.1 What is a communicable disease ?

DÉFINITION Communicable disease

A **communicable disease** (maladie transmissible) is an illness that can pass from one person, animal or environment to another person, through air, water, food, insects or direct contact. Examples : malaria, cholera, typhoid, tuberculosis and COVID-19.

To understand prevention, we must first understand **transmission** (la transmission). A disease always travels along a chain : it leaves a **source** (la source), moves through a **vector or agent** (le vecteur ou l'agent), and reaches a **host** (l'hôte, la personne infectée). Prevention means breaking the chain at one or more points.

The chain of transmission of a communicable disease : the germ leaves a source, travels through a vector or agent, and reaches a host. Prevention measures (green) interrupt the chain.

LESAVAIS-TU ? Did you know ?

Cholera is transmitted mainly through contaminated water (eau contaminée). One of the most effective prevention measures is extremely simple : washing your hands with soap. During cholera outbreaks in Cameroonian towns such as Douala, Yaoundé or Bafoussam, health districts always start with handwashing campaigns before anything else.

3.2 Vocabulary : health issues and prevention

Here are the key words you need to read and speak about disease prevention. Learn them with their French glosses. Pay attention to the stress in compound nouns (usually on the first element : MOSquito net, HEALTH centre, HANDwashing).

English	Meaning / example	Français
symptom	Fever is a symptom of malaria.	symptôme
transmission	The transmission of cholera is through dirty water.	transmission
vaccine	The COVID-19 vaccine protects the body.	vaccin
hygiene	Good hygiene prevents many diseases.	hygiène
mosquito net	Sleep under a treated mosquito net.	moustiquaire
sanitation	Poor sanitation causes typhoid.	assainissement
outbreak	There was a cholera outbreak in Douala.	épidémie
handwashing	Handwashing with soap saves lives.	lavage des mains
quarantine	The patient stayed in quarantine for ten days.	quarantaine
immune system	Vaccines help the immune system fight germs.	système immunitaire
health centre	Go to the health centre for a test.	centre de santé
blood test	A blood test confirms the diagnosis.	analyse de sang
hand sanitizer	Use hand sanitizer when water is not available.	gel hydroalcoolique

EXEMPLE A figure to remember

Sleeping under a treated mosquito net (moustiquaire imprégnée) reduces the risk of malaria infection significantly. In Cameroon, treated nets distributed by health districts protect millions of children every year, especially during the rainy season when mosquitoes multiply.

3.3 Reading strategies : how to read a health text

Before we read, let us learn three strategies that good readers use. These strategies are essential for the Probatoire and Baccalauréat technique reading comprehension papers.

MÉTHODE Three reading strategies

1. Skimming (lecture globale) : read the text quickly, only to find the general idea. Look at the title, the first sentence of each paragraph and any pictures. Do not read every word.
2. Scanning (recherche ciblée) : move your eyes fast through the text to find one specific piece of information (a date, a number, a symptom, a place). Do not read every word.
3. Guessing meaning from context : when you meet an unknown word, do not stop. Use the surrounding words to guess its meaning.

MÉTHODE Guessing an unknown word from context

1. Read the whole sentence and the sentences before and after the word.
2. Look for words of the same family : infect, infection, infectious.
3. If it is a compound noun, break it into parts : handwashing = hand + washing = washing your hands.
4. Check if the text itself gives a definition or an example (such as, that is, for example, meaning).

3.4 Guided reading : a public health poster

Let us apply these strategies to an authentic document : a poster from a Cameroonian health district.

EXEMPLE Reading text : health district poster**BAFOUSSAM HEALTH DISTRICT — STOP CHOLERA!**

The rainy season is here, and with it comes the danger of a cholera outbreak. Cholera is a communicable disease transmitted through contaminated water and food. Its main symptoms are violent diarrhoea, vomiting and rapid dehydration.

Protect your family!

- Wash your hands with soap before eating and after using the toilet. Handwashing saves lives!
- Drink only treated or boiled water.
- Wash fruits and vegetables with clean water.
- Cook food well and eat it hot.

- Keep your environment clean : good sanitation stops transmission.
- If someone has symptoms, take them to the nearest health centre immediately. A rapid blood test and stool test will confirm the disease.

Together, we can break the chain of transmission!

Comprehension questions (skimming and scanning) :

1. (Skimming) What is the general purpose of this poster?
2. (Scanning) What are the three main symptoms of cholera mentioned?
3. (Scanning) Where must a sick person be taken?
4. (Context) What does dehydration mean? Use the symptoms to guess.
5. (Scanning) Name two prevention measures mentioned in the poster.

CORRIGÉ Reading questions

1. The poster wants to inform the population and prevent a cholera outbreak during the rainy season.
2. Violent diarrhoea, vomiting and rapid dehydration.
3. To the nearest health centre, immediately.
4. The symptoms are diarrhoea and vomiting : the body loses a lot of water. So dehydration means “losing too much water from the body” (déshydratation).
5. Wash hands with soap / drink treated or boiled water / wash fruits and vegetables / cook food well / keep environment clean (any two).

3.5 Grammar : compound nouns

Look again at the poster. It contains handwashing, health centre, blood test, mosquito net, hand sanitizer. These are **compound nouns**.

DÉFINITION Compound noun

A **compound noun** (nom composé) is a noun made of two or more words that function together as one unit of meaning : health centre (centre de santé), mosquito net (moustiquaire), toothbrush (brosse à dents).

Formation of compound nouns. There are four main patterns :

Pattern	Examples	Plural
noun + noun	health centre, blood test, mosquito net, toothbrush, hand sanitizer, waiting room, outbreak	health centres, blood tests, mosquito nets, toothbrushes, hand sanitizers, waiting rooms, outbreaks
adjective + noun	waiting room, public health, grown-up, emergency room	waiting rooms, grown-ups, emergency rooms
verb + noun	washing machine, swimming pool, drinking water	washing machines, swimming pools
prepositional compound	mother-in-law, passer-by, disease outbreak, check-up	mothers-in-law, passers-by, disease outbreaks, check-ups

PROPRIÉTÉ Plurals of compound nouns

The plural is generally formed on the main word (le mot principal) of the compound :

- mother-in-law → mothers-in-law (the main word is mother)
- passer-by → passers-by
- health centre → health centres (main word : centre)
- hand sanitizer → hand sanitizers (main word : sanitizer)

When there is no main word (e.g. compounds formed from adjective/participle + adverb/preposition), the plural goes on the last element : grown-up → grown-ups, check-up → check-ups.

ATTENTION Spelling trap

Do not write compound nouns joined or separated at random! Toothbrush and handwashing are written as one word (soudé), but health centre, mosquito net and waiting room are written as two separate words (séparé). Some compounds use a hyphen : mother-in-law, passer-by, check-up. When in doubt, check a dictionary. Note : In compound nouns, the stress usually falls on the first element (MOSquito net, HEALTH centre, TOOTHbrush).

EXERCICE RÉSOLU 3 Form the plurals

Give the plural of : (a) mosquito net, (b) mother-in-law, (c) grown-up, (d) blood test, (e) passer-by, (f) hand sanitizer, (g) check-up.

SOLUTION

Solution :

- (a) mosquito nets — the main word is net, so it takes the -s.
- (b) mothers-in-law — the main word is mother ; in-law never changes.
- (c) grown-ups — there is no main noun, so the -s goes on the last element.
- (d) blood tests — the main word is test.
- (e) passers-by — the main word is passer.
- (f) hand sanitizers — the main word is sanitizer.
- (g) check-ups — no main noun, plural on last element.

3.6 Class discussion : malaria or cholera ?

Use the target vocabulary to compare the prevention of two major diseases in Cameroon. Work in pairs. One student plays a community health worker, the other plays a parent asking questions.

EXAMPLE Useful sentences for the discussion

- Malaria is transmitted by mosquitoes, but cholera is transmitted by contaminated water.
- To prevent malaria, we sleep under treated mosquito nets ; to prevent cholera, we practise handwashing and drink clean water.
- Both diseases show symptoms like fever or diarrhoea, and both need rapid treatment at a health centre.
- Good sanitation helps to prevent both diseases.
- A blood test confirms malaria ; a stool test helps confirm cholera.
- During an outbreak, the immune system of children is most at risk.

EXERCICE 6 Practice : compound nouns and vocabulary

1. Complete with a compound noun from the lesson : (a) Before a consultation, patients sit in the ... (b) A ... confirms if you have malaria parasites in your blood. (c) During the COVID-19 outbreak, people used ... to clean their hands when water was not available. (d) The ... will examine you and prescribe treatment.
2. Give the plural of : toothbrush, mother-in-law, waiting room, grown-up, hand sanitizer, check-up, passer-by.

3. Guess from context : “After the floods, poor sanitation caused many cases of typhoid.” What does sanitation mean? Explain your reasoning.
4. Match each disease to its main vector/agent : (a) Malaria — (b) Cholera — (c) Typhoid — (d) Tuberculosis. Options : contaminated water, mosquito, air, contaminated food.

CORRIGÉ Practice exercise

1. (a) waiting room; (b) blood test; (c) hand sanitizer; (d) health centre (or doctor/nurse).
2. toothbrushes; mothers-in-law; waiting rooms; grown-ups; hand sanitizers; check-ups; passers-by.
3. The context mentions floods and disease : sanitation means the systems that keep water and the environment clean (assainissement). Reasoning : floods damage sanitation systems → dirty water → typhoid.
4. (a) Malaria → mosquito; (b) Cholera → contaminated water; (c) Typhoid → contaminated food/water; (d) Tuberculosis → air.

À RETENIR Key points

- A communicable disease spreads along a chain : source → vector/agent → host. Prevention breaks the chain.
- Master the health vocabulary : symptom, transmission, vaccine, hygiene, mosquito net, sanitation, outbreak, handwashing, quarantine, immune system, health centre, blood test, hand sanitizer.
- Read with three strategies : skimming (general idea), scanning (specific information), guessing from context.
- A compound noun is two or more words with one meaning. The plural goes on the main word (mothers-in-law, health centres) or on the last element when there is no main word (grown-ups, check-ups).
- Spelling : some compounds are one word (toothbrush), some two words (health centre), some hyphenated (mother-in-law). Stress is usually on the first element.

In the next section, we will learn how to **report what people say** — for example, what a doctor or a health officer tells the population — using direct and indirect speech.

4 REPORTING WHAT PEOPLE SAY : DIRECT AND INDIRECT SPEECH (PART 1)

In the previous section we read texts about preventing communicable diseases and learned how to form **compound nouns** and their plurals. Now we move from reading to speaking and writing : we will learn how to report what health workers, teachers or radio announcers say. This skill is essential when you summarise a health talk, write a report for your school magazine or share a sensitisation message with your community.

4.1 Direct speech vs. indirect speech

DÉFINITION Direct and indirect speech

Direct speech reproduces the exact words of a speaker, enclosed in quotation marks. Indirect speech (also called reported speech) reformulates the speaker's words without quotation marks, introduced by a **reporting verb** such as say, tell, ask, etc. Français : le discours direct cite les mots exacts (guillemets) ; le discours indirect les rapporte sans guillemets, avec un verbe introducteur.

EXEMPLE Health-talk example

Direct : The nurse said, "I vaccinate 30 children every week." Indirect : The nurse said (that) she vaccinated 30 children every week. Français : L'infirmière a dit : « Je vaccine 30 enfants chaque semaine. » → L'infirmière a dit qu'elle vaccinait 30 enfants chaque semaine.

4.2 Reporting statements : say and tell

When we report a statement we can use two common reporting verbs :

- **say (that) + clause** — no indirect object.
- **tell + object (that) + clause** — the person who receives the information must be mentioned.

EXEMPLE Say vs. tell

The doctor said (that) the vaccine was safe. The doctor told us (that) the vaccine was safe. Français : Le médecin a dit que le vaccin était sûr. / Le médecin nous a dit que le vaccin était sûr.

ATTENTION Common mistake : confusing say and tell

Never say *The doctor told that...* or *The doctor said us that...*. Correct patterns : say (that) ... | tell somebody (that) Français : Ne dites pas « told that » ni « said us that ».

À RETENIR The word that

In indirect speech, the conjunction that is optional after said and told. Both forms are correct : The nurse said she was busy. = The nurse said that she was busy. Français : « that » est facultatif après said/told.

4.3 Backshift of tenses**PROPRIÉTÉ** Backshift rule

When the reporting verb is in the past tense (said, told, asked...), the verb in the reported clause usually moves one step back in time. This is called backshift.

Direct tense	Indirect tense (backshift)	Example (health / environment)
Present simple	Past simple	"I plant trees" → He said he planted
Present continuous	Past continuous	"We are cleaning the river" → They said they were cleaning
Past simple	Past perfect	"The nurse vaccinated 120 children" → She said she had vaccinated
Present perfect	Past perfect	"I have finished the garden" → He said he had finished
Will	Would	"We will protect the forest" → They said they would protect
Can	Could	"You can prevent malaria" → He said you could prevent

Tableau de correspondance des temps (direct → indirect) avec exemples santé/environnement.

4.4 Changes of time and place expressions

When we shift from direct to indirect speech, words that indicate when and where the original words were spoken must also change.

Direct	Indirect	Example
now	then	"I am busy now " → He said he was busy then .
today	that day	"The talk is today " → She said the talk was that day .
yesterday	the day before / the previous day	"We planted trees yesterday " → They said they had planted trees the day before .
tomorrow	the next day / the following day	"The campaign starts tomorrow " → He said the campaign would start the next day .
here	there	"Meet me here " → She told me to meet her there .
this / these	that / those	" This vaccine works" → He said that vaccine worked.

4.5 Changes of pronouns and possessives

Pronouns adapt to the point of view of the reporter.

EXEMPLE Pronoun shift

Direct : "I will check my blood pressure," the nurse said. Indirect : The nurse said (that) she would check her blood pressure. Français : « Je vais vérifier ma tension », a dit l'infirmière → L'infirmière a dit qu'elle vérifierait sa tension.

À RETENIR Pronoun reference

Always ask : Who is speaking? Who is reporting? I → he/she (the speaker) | you → I/we/they (depending on context) | we → they | my → his/her | our → their.

4.6 Cases with no backshift

If the reported statement expresses a **general truth** or a fact that is still true at the moment of reporting, the tense does not change.

LESAVAIS-TU ? Scientific facts stay in the present

The teacher said that trees produce oxygen. The doctor explained that malaria is transmitted by mosquitoes. Français : Les vérités scientifiques (généralités) gardent le présent au

discours indirect.

ATTENTION Modal verbs that do not backshift

should, ought to, might, could, would — these modals already have a past form and do not change. Example : “You should wash your hands.” → He said we should wash our hands.

4.7 Method : transforming direct speech into indirect speech (4 steps)

MÉTHODE Four-step transformation

1. Identify the reporting verb (usually said or told) and note its tense.
2. Adapt pronouns and possessives to match the reporter's perspective.
3. Apply backshift to the verb(s) in the reported clause (unless it is a general truth).
4. Change time/place markers (now → then, today → that day, etc.).

EXERCICE RÉSOLU 4 Reporting a doctor's health talk

Direct speech (doctor at school assembly) :

“Today I will explain how to avoid cholera. You must wash your hands before eating. The water here is not safe. We can all help by boiling water.”

Step-by-step transformation :

1. Reporting verb : The doctor said (that) — past tense.
2. Pronouns : I → he ; you → the students / they ; we → they ; our → their.
3. Backshift : will explain → would explain ; must wash → had to wash ; is not safe → was not safe (reported as past) ; can help → could help.
4. Time/place : today → that day ; here → there.

Indirect speech :

The doctor said (that) he would explain how to avoid cholera that day. He added that the students had to wash their hands before eating. He warned that the water there was not safe. He concluded that they could all help by boiling water.

4.8 Guided practice : reporting a school health talk

EXERCICE 7 Guided practice

Report the following statements made by the school nurse during a health talk. Use said or told us and apply all necessary changes.

1. "I am checking the vaccination records now."
2. "You should drink clean water every day."
3. "Last week we distributed mosquito nets here."
4. "The campaign will continue tomorrow."
5. "Malaria is caused by a parasite."

CORRIGÉ Exercice n°1

1. The nurse said (that) she was checking the vaccination records then.
2. The nurse told us (that) we should drink clean water every day. (no backshift for should; time marker unchanged)
3. The nurse said (that) they had distributed mosquito nets there the week before.
4. The nurse said (that) the campaign would continue the next day.
5. The nurse said (that) malaria is caused by a parasite. (general truth — no backshift)

4.9 Mini-project : reporting a radio sensitisation message on tree planting**EXERCICE 8** Mini-project

Listen to (or read) the following five sentences from a radio message about tree planting. Write a short paragraph reporting the message in indirect speech. Use a variety of reporting verbs (said, announced, explained, urged, reminded).

1. "We are planting 500 trees this month."
2. "Every citizen must protect the young trees."
3. "The forest provides clean air and water."
4. "Next week we will organise a community planting day."
5. "You can help by watering the seedlings every evening."

CORRIGÉ Mini-project

The radio announcer announced that they were planting 500 trees that month. He explained that every citizen had to protect the young trees. He added that the forest provides clean air and water (general truth). He said that they would organise a community planting day the following week. Finally, he urged listeners to help by watering the seedlings every evening.

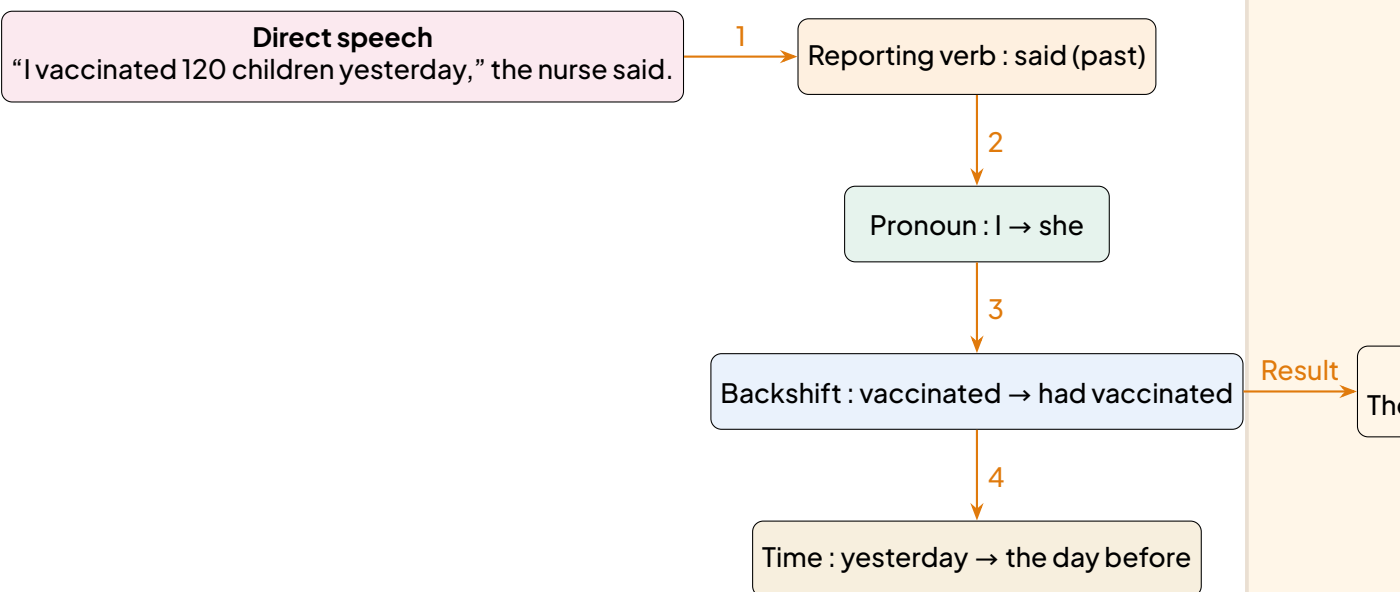

Schéma de transformation d'une phrase directe en phrase rapportée (pronoms, temps, marqueurs spatio-temporels).

4.10 Summary checklist

- Identify the reporting verb and its tense.
- Change pronouns/possessives to the reporter's perspective.
- Apply backshift (except for general truths and modals like should, might, could, would).
- Adjust time and place expressions.
- Choose say (no object) or tell + object.
- Remember that is optional.

À RETENIR Exam tip — Probatoire / Baccalauréat technique

In the exam, you may be asked to :

- Rewrite a short dialogue or health talk in reported speech.
- Fill in blanks with the correct backshifted verb form.
- Choose between say and tell in a given sentence.
- Identify errors in reported speech sentences.

Practise with authentic health/environment messages (radio, posters, school talks) to build confidence.

With these tools you can now report health talks, environmental campaigns or any spoken message accurately — a key skill for the Probatoire and for real-life communication in your future technical career.

5 REPORTING QUESTIONS AND COMMANDS : INDIRECT SPEECH (PART 2)

In the previous section Reporting what people say : direct and indirect speech (Part 1), we mastered the art of reporting **statements** (declarative sentences). We learned how to shift tenses back (**backshift**), change pronouns and adjust time/place references. Now, we extend these skills to **questions** and **commands/requests**. These are essential when you report interviews, medical advice, safety instructions or conversations with tourists and health workers — typical situations in your technical training.

5.1 Reporting Yes/No Questions

When we report a closed question (a question expecting Yes or No), we do not keep the auxiliary verb at the beginning. We transform the question into a **statement word order** (Subject + Verb) and introduce it with **if** or **whether**.

DÉFINITION Reported Yes/No Question

A **reported yes/no question** is an indirect question introduced by ask + if/whether followed by statement word order (Subject + Verb) and no question mark. The tense usually shifts back (backshift).

PROPRIÉTÉ Structure : Yes/No Questions

Direct : “Did you visit the botanical garden?”

Reported : He asked if/whether I had visited the botanical garden.

- Introductory verb : **ask** (most common), **inquire**, **wonder**.

- Linker : **if** or **whether** (whether is slightly more formal).
- Word order : Subject + Verb (NO inversion : not “asked if had I visited”).
- Punctuation : Full stop (.), no question mark.
- Backshift : Present Simple → Past Simple ; Past Simple/Present Perfect → Past Perfect ; will → would ; can → could.

EXEMPLE Tourist Site Context

Direct : The guide asked, “Do you have a map of the park?”

Reported : The guide asked if I had a map of the park.

Direct : The tourist asked, “Will the bus leave at noon?”

Reported : The tourist asked whether the bus would leave at noon.

ATTENTION Common Error : Keeping Inversion

Wrong : He asked if did I see the animals.

Right : He asked if I saw/had seen the animals.

Reason : In reported questions, the subject always comes before the verb. The auxiliary do/does/did disappears (except in negative questions : if I didn't see).

EXERCICE RÉSOLU 5 Reporting a Health Survey Question

Task : Report the nurse's question : “Did you sleep under a mosquito net last night?”

Solution :

1. Identify type : Yes/No question (auxiliary Did).
2. Choose linker : if (or whether).
3. Apply backshift : Did sleep (Past Simple) → had slept (Past Perfect).
4. Adjust time reference : last night → the night before (or the previous night).
5. Adjust pronoun : you → I (reporter is the patient).
6. Word order : Subject (I) + Verb (had slept).

Answer : The nurse asked if I had slept under a mosquito net the night before.

5.2 Reporting Wh-Questions (Open Questions)

Open questions start with a **question word** (who, what, where, when, why, how, how much/many). The good news : you **keep the question word**. The rule for word order remains the same : **Statement order** (Subject + Verb).

PROPRIÉTÉ Structure : Wh-Questions

Direct : "Where is the park entrance?"

Reported : The tourist asked where the park entrance was.

- Linker : The original **wh-word** (where, when, how, what, etc.).
- Word order : Wh-word + Subject + Verb (NO inversion : not "where was the entrance").
- Backshift : Applies normally (is → was ; are → were ; have → had).
- Subject questions (Who/What + Verb) : No change in structure, just backshift. "Who called you?" → He asked who had called me.

EXEMPLE Environment Context

Direct : The activist asked, "How do you plant these seedlings?"

Reported : The activist asked how we planted/had planted those seedlings.

Direct : The ranger asked, "Why are you cutting that tree?"

Reported : The ranger asked why I was cutting that tree.

ATTENTION Trap : Inversion in Wh-Questions

Wrong : She asked where was the clinic.

Right : She asked where the clinic was.

Tip : Say the reported clause as a statement : "The clinic was there" → where the clinic was.

EXERCICE RÉSOLU 6 Reporting a Gardening Question

Task : Report : "When will the trees be ready for harvest?" asked the farmer.

Solution :

1. Wh-word : When.
2. Subject : the trees.

3. Verb backshift : will be → would be.

4. Object/Complement : ready for harvest.

Answer : The farmer asked when the trees would be ready for harvest.

5.3 Reporting Commands, Requests and Advice

Commands (imperatives) are reported using an **infinitive structure**. We choose the introductory verb based on the **force** or **intention** of the speaker.

MÉTHODE Steps to Report a Command/Request

1. Identify the imperative verb (base form : Go, Stop, Plant, Don't drink).
2. Choose the reporting verb : **tell** (strong command), **ask** (request), **order** (authority), **advise** (suggestion for good), **warn** (danger), **encourage** (support), **invite** (social), **beg** (desperate).
3. Add the object (person receiving the command) : me, him, her, us, them, the tourists, the workers.
4. Use to-infinitive (positive) or not to-infinitive (negative).

DÉFINITION Reported Command / Request

A **reported command** uses the structure : Reporting Verb + Object + (not) + to-infinitive. It has no question mark and no subject in the reported clause (the object becomes the subject of the infinitive).

EXEMPLE Health & Environment Contexts

Positive Command :	“Plant more trees,” said the minister. → The minister told/encouraged the farmers to plant more trees.
Request :	“Please show me your ticket,” said the guard. → The guard asked the visitor to show his ticket.
Medical Advice :	“Drink boiled water,” said the doctor. → The doctor advised the patient to drink boiled water.
Negative Command :	“Don’t swim in the river,” said the guide. → The guide warned/told us not to swim in the river.
Negative Request :	“Please don’t litter,” said the ranger. → The ranger asked the tourists not to litter.

ATTENTION Negative Commands : not to vs to not

Standard : He told me not to go.

Avoid : He told me to not go. (Split infinitive, less formal, often considered an error in exams).

Verb Choice Matters : “Don’t touch the chemical.” → He warned me not to touch it (danger). ≠ He advised me not to touch it (good practice).

EXERCICE RÉSOLU 7 Reporting Safety Instructions

Task : Report the following instructions given by a site supervisor in Kribi.

1. “Wear your helmets at all times.” (to the workers)
2. “Don’t remove your gloves.” (to the workers)
3. “Please report any accident immediately.” (to the team leader)

Solution :

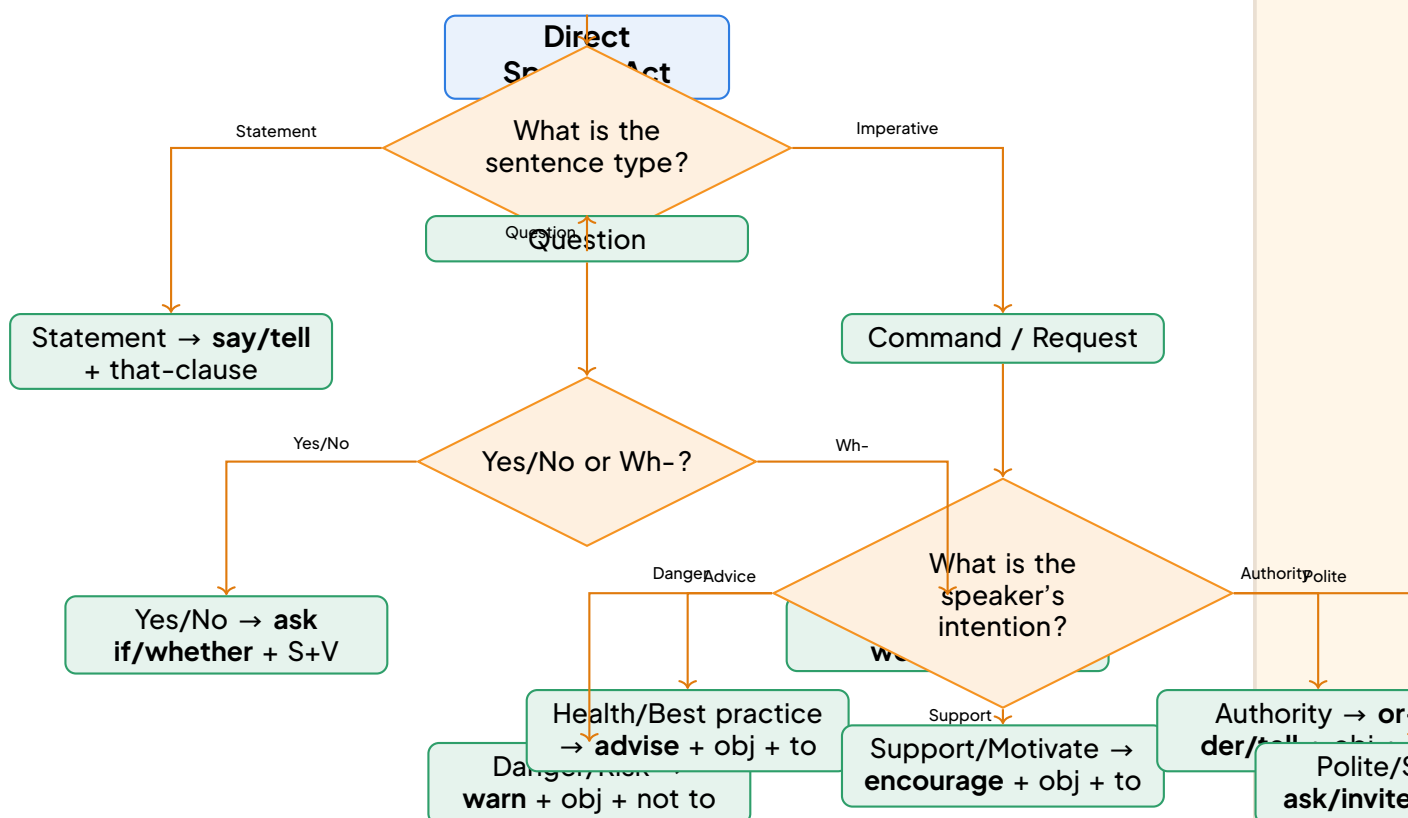

1. The supervisor told/ordered the workers to wear their helmets at all times.
2. The supervisor told/warned the workers not to remove their gloves.
3. The supervisor asked/advised the team leader to report any accident immediately.

5.4 Choosing the Right Reporting Verb : Nuance and Precision

At Probatoire level, using said or told for everything limits your score. Precise verbs show **pragmatic competence** — you understand the **speaker’s intention**.

PROPRIÉTÉ Reporting Verbs & Intentions

Verb	Intention / Context	Structure
Advise	Recommending what is good/healthy	advise + obj + to-inf
Warn	Alerting about danger/risk	warn + obj + (not) to-inf
Encourage	Giving confidence/support	encourage + obj + to-inf
Invite	Asking someone socially	invite + obj + to-inf
Beg	Desperate/emotional request	beg + obj + to-inf
Promise	Committing to future action	promise + (obj) + to-inf
Order	Authority, no choice	order + obj + to-inf
Ask	Neutral request / question	ask + obj + to-inf / if/wh
Tell	Neutral command / statement	tell + obj + to-inf / that-clause

Decision tree : Choosing the correct reporting structure and verb based on sentence type and speaker intention.

LESAVAIS-TU ? Exam Tip : Pragmatic Variety

In the **Probatoire** and **Baccalauréat technique** writing tasks (compositions, reports), examiners reward lexical variety. Instead of writing “He said I must...” or “He told me to...” five times, use : The doctor advised me to... ; The guide warned us not to... ; The activist encouraged the youth to... ; The minister promised to.... This demonstrates B2-level control of functional language.

5.5 Consolidation : Mixed Reporting Practice

Real conversations mix statements, questions and commands. You must switch structures fluidly.

EXERCICE 9 Journalist Interview in Douala

Context : A journalist interviews Mr. Ngu, an environmental activist in Douala, about a mangrove replanting project. Report the entire interview in indirect speech. Use a variety of reporting verbs (said, told, asked, advised, warned, encouraged, promised).

Interview Transcript :

1. Journalist : “Good morning, Mr. Ngu. What is the main goal of this project ?”
2. Mr. Ngu : “We want to restore 50 hectares of mangrove. It protects the coast from erosion.”
3. Journalist : “Did you receive government funding ?”
4. Mr. Ngu : “Yes, we did. The Ministry gave us a grant last year.”
5. Journalist : “How can local people help ?”
6. Mr. Ngu : “Plant seedlings with us next Saturday. Don’t throw plastic waste in the water.”
7. Journalist : “Will you organize more events ?”
8. Mr. Ngu : “Yes, I will. I promise to organize monthly clean-ups.”

CORRIGÉ Exercice n°1 : Journalist Interview in Douala

Reported Version :

1. The journalist greeted Mr. Ngu and asked what the main goal of the project was.
2. Mr. Ngu replied/stated that they wanted to restore 50 hectares of mangrove and added that it protected the coast from erosion.
3. The journalist asked if/whether they had received government funding.

4. Mr. Ngu confirmed that they had and explained that the Ministry had given them a grant the previous year.
5. The journalist asked how local people could help.
6. Mr. Ngu encouraged/invited them to plant seedlings with him the following Saturday and warned/advised them not to throw plastic waste in the water.
7. The journalist asked if/whether he would organize more events.
8. Mr. Ngu confirmed that he would and promised to organize monthly clean-ups.

Key Checks : Backshift (want → wanted, protect → protected, give → had given, will → would). Pronouns (we → they, us → them, I → he). Time/Place (last year → previous year, next Saturday → following Saturday). Word order in Qs (What is → what ... was ; How can → how ... could). Neg command → not to throw. Promise + to-inf.

5.6 Role Play : Journalist & Environmental Activist

MÉTHODE Role Play Procedure

1. Pair Work : Student A = Journalist (prepares 5–6 questions : Yes/No, Wh-, requests for advice). Student B = Activist (prepares facts : goals, funding, needs, future plans, warnings).
2. Perform : Conduct a 2-minute interview. Record or take notes.
3. Switch Roles : Repeat.
4. Write Report : Individually, write a 100-word news report in indirect speech summarizing the interview. Use at least 4 different reporting verbs.
5. Peer Assessment : Exchange reports. Use the Correction Grid below.

DÉFINITION Peer Assessment Grid for Reported Speech

Instructions : Tick (☑) the box that best describes your partner's work. Total : 10 marks.

Criteria	Description	2 pts	1 pt	0 pt
Backshift Accuracy	All correct correctly shifted (Pres→Past, Past→Past Perf, Will→Would)		1-2 errors	>2 errors
Question Structures	Yes/No ask if/whether + S+V; Wh- : ask wh- word + S+V (no in- ver- sion)	Perfect	Minor inversion error	Major errors
Command Structures	Verb + Obj + (not) to- inf; Cor- rect ne- ga- tive form (not to)	Verb Perfect	1 error (split inf / missing obj)	Wrong structure
Reporting Verb Variety	Uses ≥ 4 varied ≥ 4 dis- tinct verbs (ad- vise,		2-3 varied (mostly say/tell)	Only say/tell

Feedback : Write one strength and one target for improvement for your partner.

5.7 Summary : Three Types of Reported Speech at a Glance

Type	Direct Speech Example	Reported Structure	Reported Example
1. Statement	"We protect the forest."	say/tell/explain/advise + that + S + V (backshifted)	He said (that) they protected the forest.
2. Yes/No Question	"Do you recycle?"	ask/inquire + if/whether + S + V (backshifted)	She asked if I recycled/had recycled .
3. Wh-Question	"Where is the nursery?"	ask + wh-word + S + V (backshifted)	He asked where the nursery was .
4. Command	"Plant this tree."	tell/order/advise/encourage + Obj + to + V _{base}	They encouraged/told us to plant that tree.
5. Negative Command	"Don't cut the trees."	tell/warn/advise + Obj + not to + V _{base}	He warned us not to cut the trees.
6. Request	"Please help us."	ask/invite/beg + Obj + to + V _{base}	She asked me to help them.

À RETENIR Key Takeaways for Exams

- Questions : No inversion, no question mark, no do/does/did. Use if/whether (Yes/No) or Wh-word (Open). Backshift the tense.
- Commands/Requests : Verb + Object + (not) to-infinitive. Choose verb for meaning : warn (danger), advise (health), encourage (support), promise (commitment).
- Mixed Texts : Identify each speech act (Statement? Question? Command?) and apply the correct formula instantly.
- Probatoire Writing : In compositions (health, environment topics), use reported speech to cite experts, witnesses or authorities : The doctor advised the population to vaccinate their children. The expert warned that pollution would increase.

6 WRITING AND INTEGRATION : COMMUNICATING ON HEALTH ISSUES

In the previous section, you learnt how to report questions and commands in indirect speech : The nurse asked me if I washed my hands regularly or The doctor told me to drink clean water. Now it is time to use everything you have studied in this lesson — **used to**, **tag questions**, **compound nouns** and **reported speech** — in real communication. In this final section, you will learn how to **write clear, well-organised compositions** about health issues and the prevention of communicable diseases, and you will combine all your skills in an integration project : a School Health and Environment Day.

6.1 What is a composition ?

Imagine the situation : cholera has appeared in a quarter of Yaoundé. The principal of your school asks you to write a text for the students. What do you write ? A poem ? A shopping list ? No — you write a **composition** : an organised text with a clear message for a clear audience.

DÉFINITION Composition

A **composition** is an organised piece of writing made of three parts : an introduction (which presents the issue), a body or development (which gives causes, consequences and prevention measures), and a conclusion (which often ends with a call to action). A good composition is always adapted to its reader (destinataire) and to its communicative objective (objectif de communication).

In this unit, you will meet four common text types :

Text type	Reader and objective	Style
Sensitization poster	The whole school; to inform quickly and push to action	Short sentences, slogans, imperatives
Letter to a friend	One friend; to advise or share experience	Informal, warm, personal
Article for the school magazine	Students and teachers; to inform and explain	Semi-formal, factual, organised
Dialogue patient / health worker	A reader or an audience; to show good practice	Spoken style, questions and answers

6.2 The structure of a good health composition

Whatever the text type, the skeleton is the same. Let us build it step by step, like a house : foundations (introduction), walls and rooms (body), roof (conclusion).

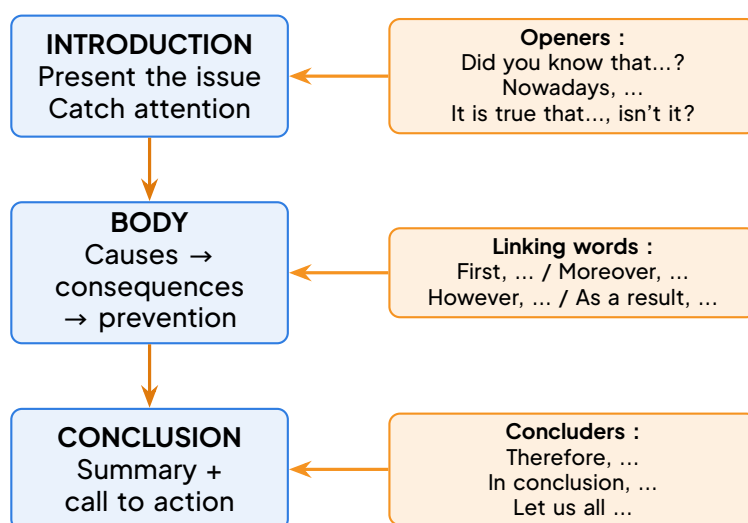

1. **The introduction** presents the issue and catches the reader's attention. You can start with a

question, a fact or a short anecdote : Did you know that malaria still kills thousands of Cameroonians every year?

2. The body develops two or three ideas, one paragraph per idea :

- **Causes** : Malaria is transmitted by the bite of an infected mosquito.
- **Consequences** : As a result, many pupils miss school during the rainy season.
- **Prevention measures** : Moreover, sleeping under a mosquito net is cheap and effective.

3. The conclusion summarises and calls the reader to action : Therefore, let us all sleep under treated mosquito nets. Prevention is better than cure!

Structure of a health composition in three parts, with the linking words (mots de liaison) associated to each part.

À RETENIR Key linking words for health writing

- **First, / Moreover,** — to add ideas (pour ajouter une idée).
- **However,** — to contrast ideas (pour opposer) : Vaccines are free ; however, many people do not go to the health centre.
- **Therefore, / As a result,** — to show a consequence (pour montrer une conséquence).
- **In conclusion,** — to close the text (pour conclure).

6.3 Reusing the lesson's grammar in your writing

A Probatoire composition must show the examiner that you master the grammar of the unit. Here is how to integrate each point naturally.

Used to — for past habits. Compare the past and the present : People in our village **used to drink** water directly from the stream, but now they boil it first. / We **didn't use to wash** our hands before meals.

Tag questions — to engage the reader. A tag question involves your audience : Prevention is better than cure, **isn't it?** / Nobody wants to be sick, **do they?**

Compound nouns — for precision. Precise vocabulary makes your text credible : mosquito net, health centre, hand washing, clean water supply, bed nets. Remember the plural rule : usually only the second noun takes the plural s : health centres, mosquito nets.

Reported speech — to quote authorities. Quoting a health worker makes your argument stronger : The nurse said that vaccination **was** free for all children. / The doctor advised us **to sleep** under mosquito nets.

EXEMPLE A model paragraph using all four points

In the past, the pupils of our school used to throw rubbish everywhere, and many of them fell sick. Last month, the head nurse of the district hospital visited us. She said that dirty environments caused many communicable diseases, and she advised us to keep our classrooms clean. Since then, we clean the school grounds every Friday and we wash our hands at the new water point. Our school is much healthier now, isn't it?

ATTENTION Do not translate word for word from French!

The most frequent error is to think in French and translate literally : *I have paludism (for j'ai le paludisme) instead of I have malaria ; *the maladies diarrhéiques instead of diarrhoeal diseases. Think directly in simple, correct English structures : short sentences, subject + verb + complement. A simple correct sentence always scores more than a long incorrect one.

6.4 The writing process : five steps

Good writers never write their final text immediately. They follow a process.

MÉTHODE Writing a composition in five steps

1. Brainstorm (remue-méninges) : list all your ideas, vocabulary and facts about the topic, in any order.
2. Plan : select the best ideas and organise them — introduction, two or three body paragraphs, conclusion.
3. Draft (brouillon) : write a first version without worrying too much about mistakes ; use your linking words.

4. Peer review (correction par un camarade) : exchange your draft with a classmate ; check grammar, vocabulary and organisation with the checklist below.
5. Final copy : rewrite neatly, correcting all the errors found.

EXERCICE RÉSOLU 8**Writing a short article for the school magazine**

Task : Your school magazine asks you to write an article (150–200 words) entitled “Stop cholera in our school!”. Present the issue, its causes and consequences, prevention measures, and end with a call to action.

SOLUTION

Solution — model answer (about 175 words) :

Last year, cholera appeared in our town, and everybody was afraid. This dangerous disease can kill in a few days, can't it? We must act now to protect our school.

Cholera is caused by dirty water and dirty food. People used to drink water from the river without boiling it, and they didn't use to wash their hands after using the toilet. As a result, the disease spread very quickly from family to family.

However, prevention is simple and cheap. First, we must drink only clean, boiled or treated water. Moreover, hand washing with soap before meals is essential. The health worker who visited our school said that most cases of cholera could be avoided with these simple gestures, and she advised us to build clean latrines far from the water points.

Therefore, dear schoolmates, let us keep our school grounds clean, use the dustbins and wash our hands every day. In conclusion, remember : a clean school is a healthy school!

LESAVAIS-TU ?**What really counts at the Probatoire technique**

At the Probatoire technique, the clarity of your organisation and the grammatical accuracy of your sentences count as much as the richness of your vocabulary. A composition of 150 to 200 words, clearly organised in three parts, with correct use of, tag questions, compound nouns and reported speech, will score higher than a long text full of beautiful but wrongly used words. Examiners read hundreds of papers : make yours easy to read and correct!

6.5 Integration activity : a School Health and Environment Day

Now let us combine all your skills — speaking, listening, reading and writing — in one group project. This is the **integration activity** of the lesson.

EXPÉRIENCE**Group project : organising a School Health and Environment Day**

Material : cardboard, markers, the texts studied in this lesson, a notebook for the draft.

Protocol (work in groups of four or five) :

1. Listening : listen to the teacher's text about planting trees and protecting natural habitats ; note five key words.
2. Reading : read a short text about preventing a communicable disease (malaria, cholera or typhoid) ; extract the causes and the prevention measures.
3. Speaking : in your group, exchange information about a tourist or natural site in your region and explain why it must be protected ; use at least two tag questions.
4. Writing : produce together one sensitization poster and one short article (150–200 words) for the school magazine, following the five-step writing process.
5. Presentation : each group presents its poster to the class in two minutes ; the class asks questions.

Observations and interpretation : each group checks with the self-assessment grid below whether the four skills were correctly used. The class votes for the clearest and most convincing poster.

6.6 Evaluation and remediation

Use this grid to assess your own composition (self-assessment) or your classmate's (peer review). Give 0, 1 or 2 points per criterion : 0 = absent or wrong, 1 = present but imperfect, 2 = fully achieved.

Criterion	What the examiner checks	Max	Score
Content	The issue, causes, consequences and prevention measures are all treated	4	
Vocabulary	At least six words of the unit (health, environment) used correctly	4	
Grammar	Used to, one tag question, compound nouns, one reported sentence — all correct	6	
Organisation	Clear introduction / body / conclusion, linking words, 150–200 words	4	
Presentation	Clean handwriting, correct spelling and punctuation	2	
Total		20	

EXERCICE 10**Targeted remediation on weak grammar points**

Rewrite or correct the following sentences.

1. Correct : Before, people drank water from the stream, but now they boil it. (use used to)
2. Add the correct tag question : Mosquito nets protect us from malaria, ... ?
3. Write the plural of : health centre, mosquito net, water point.
4. Report the sentence : The nurse said : "Vaccination is free for all children."
5. Report the command : The doctor said to the pupils : "Wash your hands before meals!"

CORRIGÉ Exercice : remediation

1. People used to drink water from the stream, but now they boil it. (past habit → used to + base verb)
2. Mosquito nets protect us from malaria, don't they? (affirmative sentence → negative tag; plural subject → they)
3. health centres, mosquito nets, water points (only the second noun takes the plural s).
4. The nurse said (that) vaccination was free for all children. (present simple → past simple in reported speech)
5. The doctor told/advised the pupils to wash their hands before meals. (reported command : tell/advise + object + to-infinitive)

EXERCICE 11 Final writing task

Write a letter to a friend (150–200 words) telling him or her about the Health and Environment Day organised in your school. Say what your school used to be like before, describe the activities of the day, quote something a health worker said, and end with advice and a tag question. Follow the five-step writing process and use the evaluation grid to check your work.

À RETENIR To remember

A good health composition is organised (introduction, body, conclusion), precise (compound nouns, unit vocabulary), grammatical (used to, tag questions, reported speech) and convincing (linking words, call to action). Write simply, write correctly, and always think of your reader. Prevention is better than cure — and a clear composition is better than a long one, isn't it?

7 ACTIVITÉ D'INTÉGRATION

7.1 Objectifs de l'activité

By the end of this integration activity, you will be able to :

- use vocabulary related to **tourist sites**, **gardening**, **natural habitats** and **communicable diseases** (maladies transmissibles) in an authentic communication task ;
- report what people said using **indirect speech** (statements, questions and commands) ;
- use **used to / didn't use to / to be used to** to speak about past habits and present habits ;
- build and pluralise **compound nouns** (noms composés) correctly ;
- write **tag questions** to create catchy slogans (slogans accrocheurs) ;
- write a short newspaper article and design a sensitization poster (affiche de sensibilisation) ;
- speak in front of the class and react to classmates' presentations.

7.2 Situation

The **Ecology Club** of your technical high school in Maroua is organising a **School Health and Environment Day** next month. The Principal has asked every class of Première to prepare a **sensitization campaign** (campagne de sensibilisation) for the whole school. Your class will produce two things : a short **article for the school magazine** and a **poster** with slogans.

The club gives your group of four students the following documents :

Document 1 – Poster from the District Health Service (Maroua) : “Cholera is a dangerous communicable disease. Wash your hands with clean water and soap. Drink only treated or boiled water. Cook food well.”

Document 2 – Photographs of Waza National Park (Far North Region), with elephants, giraffes and lions, and a short note : “Waza National Park covers about 170000 hectares. It receives about 10000 visitors per year.”

Document 3 – Figures (statistiques) :

- Malaria (paludisme) causes about 4000 deaths per year in Cameroon, mostly children under five.
- About 70 % of Cameroonians live in areas where malaria is common.
- The school planted 120 trees last year ; only 80 survived. This year the club wants to plant 200 trees and protect them all.

Document 4 – Recorded interviews. During a preparatory visit, the club interviewed two people :

- **Nurse Amina** (health centre) said : “Malaria is the most common disease in our area. Sleep under mosquito nets and keep your environment clean. Many years ago, people did not use mosquito nets, but now they are used to sleeping under them.”
- **Mr Bello** (tourist guide at Waza) said : “Tourists used to visit the park only in December, but

now they come all year. Do not throw plastic bags in the park. Protect the animals' natural habitat."

Your mission : with your group, prepare the campaign and present it to the class. The best campaign will be displayed on the school notice board (panneau d'affichage) during the Health and Environment Day.

7.3 Consignes

Work in groups of four. Follow the tasks in order.

1. **Read and select.** Read the four documents carefully. Underline ten useful words or expressions (for example : mosquito net, hand washing, natural habitat, tourist guide). Classify them into two columns : Health and Environment.
2. **Compound nouns hunt.** Find at least **five compound nouns** in the documents (or build your own from the lesson vocabulary, e.g. mosquito net, health centre, tourist guide, washing powder, school magazine). Write their plurals correctly.
3. **Report the interviews.** Write a short article (about 120–150 words) for the school magazine. Report what Nurse Amina and Mr Bello said using **indirect speech** : at least two reported statements, one reported question and one reported command. Do not forget the tense changes (backshift).
4. **Past and present habits.** In your article, include at least **two structures with used to** (one affirmative or negative, and one with to be used to + noun/-ing) to compare the past and the present.
5. **Design the poster.** Create a poster with a title, one drawing or symbol, and **three slogans containing tag questions** (example : We want a clean school, don't we?). Check that each tag is correct (auxiliary, subject pronoun, positive/negative).
6. **Present your campaign.** Each group presents its article and poster to the class in three minutes. Speak clearly and loudly. The other students listen, then react and ask at least one question per group (use tag questions if possible : You planted the trees behind the classrooms, didn't you?).
7. **Evaluate and improve.** Fill in the evaluation grid for one other group. Correct your own work according to the remarks (remediation).

7.4 Ressources à mobiliser

À RETENIR

Grammar reminders

Used to : subject + used to + base verb (past habit, finished). Negative : didn't use to. Habit now : to be used to + noun/-ing (être habitué à).

Tag questions : positive sentence → negative tag ; negative sentence → positive tag. Use the same auxiliary and a pronoun : You wash your hands, don't you?

Indirect speech : present simple → past simple ; present continuous → past continuous ;

will → would ; imperative → told/asked + object + (not) to + verb. Questions : asked + if/whether or wh-word, affirmative word order, no question mark.

Compound nouns : the plural usually goes on the main (last) word : mosquito nets, health centres, tourist guides.

Direct speech	Indirect speech	Change
"Malaria is common."	She said (that) malaria was common.	is → was
"Sleep under nets."	She told us to sleep under nets.	imperative → to + verb
"Do you wash your hands?"	She asked if we washed our hands.	do → if + past
"Don't throw plastic bags."	He told us not to throw plastic bags.	don't → not to

7.5 Démarche et corrigé commenté

EXERCICE RÉSOLU 9 Model answer : the campaign of Group 2

Énoncé : produire l'article du journal scolaire et l'affiche du groupe, en appliquant toutes les consignes.

SOLUTION

Step 1 – Vocabulary selection (Task 1).

Health : mosquito net, hand washing, clean water, communicable disease, health centre.

Environment : natural habitat, tree planting, national park, plastic bags, tourist guide.

Step 2 – Compound nouns and plurals (Task 2).

mosquito net → mosquito nets ; health centre → health centres ; tourist guide → tourist guides ; washing powder → washing powders ; school magazine → school magazines.

The plural -s goes on the last word, which carries the main meaning.

Step 3 – Article with indirect speech and used to (Tasks 3 and 4).

Health and Environment Day is coming ! Last week, the Ecology Club interviewed Nurse Amina and Mr Bello, a tourist guide at Waza National Park.

Nurse Amina said that malaria was the most common disease in our area. She told us to sleep under mosquito nets and to keep our environment clean. She explained that many years ago people didn't use to sleep under mosquito nets, but that now they were used to sleeping under them.

Mr Bello said that tourists used to visit Waza only in December, but that they now came all year. He asked us if we liked animals, and he told us not to throw plastic bags in the park.

He added that we had to protect the animals' natural habitat.

Remember : malaria kills about 4000 people every year in Cameroon. Wash your hands,

sleep under a net, and plant a tree!

Justifications : “is” → “was” (backshift); the imperative “Sleep” → “told us to sleep”; the negative imperative “Do not throw” → “told us not to throw”; the yes/no question “Do you like...” → “asked us if we liked” (affirmative order, no question mark). Two used to structures are included : “didn’t use to sleep” and “used to visit”, plus “were used to sleeping”.

Step 4 – Poster slogans with tag questions (Task 5).

- We want a clean school, don’t we?
- Nobody likes cholera, do they?
- Let’s plant more trees, shall we?

Check : “we want” is positive → negative tag “don’t we”; “nobody likes” is negative in meaning → positive tag “do they”; after “Let’s”, the tag is always “shall we”.

Step 5 – Oral presentation (Task 6). Each member of the group speaks : one presents the article, one reads the reported speech, one presents the poster, one answers questions.

Step 6 – Evaluation grid (Task 7).

Criterion	What is expected	Mark /5
Content	All documents used, figures correct	
Grammar	Indirect speech, used to, tag questions correct	
Vocabulary	At least 5 compound nouns, rich lexis	
Presentation	Clear voice, poster neat and attractive	

7.6 Bilan de l’activité

This activity shows that the grammar and vocabulary of the lesson are not isolated rules : they are **tools for real communication**. Reporting interviews with **indirect speech** is what journalists do every day ; **tag questions** make slogans lively and invite the audience to agree ; **used to** helps us compare past and present habits, for example in health education ; **compound nouns** make our English precise and natural. By writing an article, designing a poster and speaking in public, you have practised the four skills – reading, writing, listening and speaking – in one meaningful project, exactly like a real sensitization campaign organised by health services and ecology clubs in Cameroon.

8 MÉTHODES ET EXERCICES RÉSOLUS

8.1 Méthodes et exercices résolus

MÉTHODE Parler de sites touristiques avec used to

Objectif : Décrire des habitudes passées ou des états anciens liés aux visites touristiques.

Étapes :

1. Identifier le contexte : S'agit-il d'une habitude passée (action répétée) ou d'un état passé? → used to + BV.
2. Former l'affirmation : Sujet + used to + base verbale. Ex : We used to visit the botanical garden every year.
3. Former la négation : Sujet + didn't use to + base verbale (pas de d à use). Ex : They didn't use to allow cameras inside.
4. Former la question : Did + sujet + use to + base verbale? Ex : Did you use to go there by bus?
5. Ne pas confondre avec : be used to + V-ing / nom (avoir l'habitude de, présent). Ex : I am used to walking long distances.

Vocabulaire clé : **tourist site** (site touristique), **guided tour** (visite guidée), **entrance fee** (droit d'entrée), **souvenir** (souvenir), **landscape** (paysage), **heritage** (patrimoine).

EXERCICE RÉSOLU 10 Expression orale : souvenirs de visites

Énoncé : Vous guidez un groupe de touristes au Parc National de Waza. En utilisant used to / didn't use to, complétez le dialogue ci-dessous. Puis, à l'oral, posez 3 questions à un camarade sur ses anciennes visites scolaires.

Guide : Welcome to Waza Park! This area _____ (be) a hunting reserve.	Tourist : Really? _____ people _____ (hunt) lions here?
Guide : Yes, they _____ (hunt) them legally. But they _____ (protect) them.	Tourist : When _____ it _____ (become) a national park?
Guide : In 1968. Since then, rangers _____ (patrol) daily.	Tourist : _____ you _____ (work) here before?

SOLUTION

Solution détaillée :

1. **used to be** — État passé (était une réserve de chasse). Français : « Cette zone était une réserve de chasse. »
2. **Did ... use to hunt** — Question sur habitude passée. « Est-ce que les gens chassaient des lions ici ? »
3. **used to hunt** — Habitude passée affirmative. « Oui, ils les chassaient légalement. »
4. **didn't use to protect** — Négation d'habitude passée (attention : pas de *do use*). « Mais ils ne les protégeaient pas. »
5. **did ... become** — Piège ! *Become* est ici un événement ponctuel daté, pas une habitude. On utilise le *preterite* : *did ... become*. « Quand est-elle devenue un parc national ? »
6. **have patrolled ou have been patrolling** — Depuis 1968 (marqueur *since*) → *present perfect*. « Depuis, les gardes patrouillent chaque jour. »
7. **Did ... use to work** — Question sur habitude passée. « Est-ce que vous travailliez ici avant ? »

Dialogue corrigé :

Guide : Welcome to Waza Park ! This area used to be a hunting reserve.

Tourist : Really ? Did people use to hunt lions here ?

Guide : Yes, they used to hunt them legally. But they didn't use to protect them.

Tourist : When did it become a national park ?

Guide : In 1968. Since then, rangers have patrolled daily.

Tourist : Did you use to work here before ?

Conclusion : *Used to* ne s'emploie que pour des habitudes/états révolus. Pour un événement daté unique, on utilise le *preterite*. Pour une action commencée dans le passé et qui continue, on utilise le *present perfect*.

MÉTHODE Former et utiliser les tag questions

Objectif : Vérifier une information ou demander confirmation en fin de phrase. Règle de base : Affirmative statement + negative tag | Negative statement + affirmative tag
Étapes :

1. Repérer l'auxiliaire/modal de la phrase principale (*be, have, do, can, will, must, etc.*).
2. Inverser la polarité : Positif → tag négatif (*n't*) ; Négatif → tag positif.
3. Reprendre le sujet sous forme de pronom personnel (*I, you, he, she, it, we, they*).
4. Accorder le temps : Le tag est au même temps que la phrase principale.

5. Cas particuliers :

- I am → aren't I? (pas amn't I)
- Let's → shall we?
- Imperatif → will you? / would you?
- There is/are → isn't/aren't there?
- Everybody/Somebody/No one → they?

6. Intonation : Descendante = confirmation attendue ; Montante = vraie question.

Vocabulaire environnement : **deforestation** (déforestation), **seedling** (jeune plant), **eco-system** (écosystème), **endangered species** (espèce menacée), **reforestation** (reboisement), **habitat loss** (perte d'habitat).

EXERCICE RÉSOLU 11 Tag questions sur la protection de l'environnement

Énoncé : Complétez chaque phrase par la tag question correcte. Justifiez chaque choix en une phrase.

1. Planting trees reduces soil erosion, _____?
2. The villagers didn't cut down the old baobab, _____?
3. There are many endangered species in this forest, _____?
4. Let's organize a cleaning campaign next Saturday, _____?
5. Nobody knows the exact number of gorillas left, _____?
6. The river has been polluted by chemical waste, _____?
7. You'll help us water the seedlings tomorrow, _____?

SOLUTION

Solution détaillée :

1. doesn't it? — Phrase affirmative (reduces = présent simple, 3^e pers. sg.) → tag négatif. Auxiliaire does + n't + it (sujet Planting trees = it).
2. did they? — Phrase négative (didn't cut) → tag positif. Auxiliaire did + they (sujet The villagers = they).
3. aren't there? — Structure There are (affirmatif) → tag négatif aren't there?.
4. shall we? — Cas particulier Let's (proposition) → toujours shall we?.
5. do they? — Nobody (négatif de sens) → tag positif. Sujet indéfini → they. Verbe knows (présent simple) → auxiliaire do.

6. hasn't it? — Present perfect passive (has been polluted) affirmatif → tag négatif. Auxiliaire has + n't + it (sujet The river = it).

7. won't you? — Future simple (will help) affirmatif → tag négatif. Will + n't = won't + you.

Conclusion : Identifier l'auxiliaire et la polarité de la principale est la clé. Attention aux sujets there, nobody/everybody, let's et à l'auxiliaire do au présent/prétérit simple.

MÉTHODE Former les noms composés et leurs pluriels

Objectif : Construire et accorder correctement les compound nouns (noms composés) du vocabulaire santé/environnement. Types principaux et règles de pluriel :

1. Nom + Nom : Le pluriel se marque sur le deuxième nom. Ex : health centre → health centres ; blood test → blood tests.
2. Verbe + Particule (phrasal noun) : Pluriel sur le nom/verbe. Ex : check-up → check-ups ; breakdown → breakdowns.
3. Adjectif + Nom : Pluriel sur le nom. Ex : communicable disease → communicable diseases.
4. Nom + Préposition + Nom : Pluriel sur le premier nom. Ex : mother-in-law → mothers-in-law ; outbreak of cholera → outbreaks of cholera.

Hyphenation : Vérifier au dictionnaire (ex : health-care ou healthcare, well-being ou well-being). Au Bac, les deux formes acceptées si cohérentes. Vocabulaire clé : **waterborne disease** (maladie hydrique), **vector-borne disease** (maladie vectorielle), **handwashing station** (station de lavage des mains), **mosquito net** (moustiquaire), **vaccination campaign** (campagne de vaccination), **health worker** (agent de santé).

EXERCICE RÉSOLU 12 Noms composés : prévention des maladies

Énoncé : Mettez les noms composés entre parenthèses au pluriel si nécessaire. Attention : certains restent au singulier (non-dénombrables ou concepts).

1. The Ministry of Health launched three new _____ (vaccination campaign) last year.
2. _____ (Malaria) is a dangerous _____ (vector-borne disease) transmitted by mosquitoes.
3. Every _____ (health centre) in the district received five _____ (handwashing station).
4. We need more _____ (community health worker) in rural areas.

5. The _____ (outbreak of cholera) in the North region was controlled quickly.
6. Sleeping under _____ (mosquito net) prevents malaria.
7. Regular _____ (check-up) can detect diseases early.

SOLUTION

Solution détaillée :

1. vaccination campaigns — Nom + Nom : pluriel sur le 2^e nom (campaigns). Three impose le pluriel.
2. Malaria (invariable, maladie) — vector-borne disease — Adjectif composé + Nom : singulier après a (une maladie). Pas de s à disease.
3. health centre (singulier après every) — handwashing stations — Nom (gérondif) + Nom : pluriel sur stations (five impose le pluriel).
4. community health workers — Nom + Nom + Nom (trois éléments) : pluriel sur le dernier (workers).
5. outbreak of cholera — Nom + Préposition + Nom : ici singulier (The ... was). Au pluriel : outbreaks of cholera (pluriel sur le 1^{er} nom). Cholera invariable.
6. mosquito nets — Nom + Nom : pluriel sur nets. (Généralité → pluriel).
7. check-ups — Verbe + Particule (phrasal noun) : pluriel sur le nom verbal (check-ups). Trait d'union conservé.

Conclusion : La règle d'or : identifier le nom principal (head noun) dans le composé. C'est lui qui prend la marque du pluriel. Pour les composés à trois mots ou avec préposition, c'est le premier nom.

MÉTHODE Discours direct → indirect (Déclarations) — Partie 1

Objectif : Reporter des affirmations en changeant les personnes, le temps, les marqueurs spatio-temporels. Étapes (méthode en 5 temps) :

1. Verbe introducteur au passé (said, told, explained, added) → reculer d'un cran les temps (backshifting).
2. Tableau de correspondance des temps (Backshifting) :

Direct	Indirect
Present Simple	Past Simple
Present Continuous	Past Continuous
Present Perfect	Past Perfect
Past Simple	Past Perfect
Will	Would
Can	Could
Must	Had to

3. Changer les pronoms et possessifs selon le nouveau locuteur (I → he/she, my → his/her, we → they, our → their).

4. Adapter les marqueurs de temps/lieu :

- now → then / at that moment
- today → that day
- yesterday → the day before / the previous day
- tomorrow → the next day / the following day
- here → there
- this/these → that/those

5. Structure : Sujet + verbe introducteur + (that) + nouvelle phrase (ordre affirmatif, pas d'inversion, pas de point d'interrogation).

Exception : Si le verbe introducteur est au présent (says, tells) → pas de backshifting. Vérités générales → temps inchangé.

EXERCICE RÉSOLU 13

Discours indirect : déclarations sur la santé

Énoncé : Transformez les phrases suivantes au discours indirect. Le verbe introducteur est au passé.

1. The nurse said : "I am checking the patients' temperatures now."
2. Dr. Atanga told us : "The vaccination campaign started yesterday."
3. "We have distributed 500 mosquito nets this month," the coordinator explained.
4. The minister announced : "We will build a new hospital here next year."
5. "You must boil drinking water," the health worker warned the villagers.

SOLUTION

Solution détaillée :

1. The nurse said (that) she was checking the patients' temperatures then.
 - am checking (present continuous) → was checking (past continuous).
 - I → she (infirmière = 3^e pers. fém.).
 - now → then.
2. Dr. Atanga told us (that) the vaccination campaign had started the day before.
 - started (past simple) → had started (past perfect).
 - yesterday → the day before.
 - told us conserve us (complément d'objet indirect).
3. The coordinator explained (that) they had distributed 500 mosquito nets that month.
 - have distributed (present perfect) → had distributed (past perfect).
 - We → they (l'équipe).
 - this month → that month.
4. The minister announced (that) they would build a new hospital there the following year.
 - will build → would build.
 - We → they (le gouvernement).
 - here → there.
 - next year → the following year (ou the next year).
5. The health worker warned the villagers (that) they had to boil drinking water.
 - must (obligation) → had to (pas musted).
 - You → they (les villageois).
 - warned + objet + that (verbe de communication forte).

Conclusion : Appliquer systématiquement les 4 changements : temps, pronoms, marqueurs, structure. Vérifier que la phrase rapportée est à la forme affirmative (sujet + verbe).

MÉTHODE**Discours indirect : Questions et Ordres — Partie 2**

Objectif : Reporter des questions (fermées/ouvertes) et des impératifs (ordres/conseils). A. Questions (Interrogatives) :

1. Question fermée (Yes/No) → asked if / whether + sujet + verbe (ordre affirmatif, pas d'auxiliaire do/does/did). Temps reculé.
2. Question ouverte (Wh-) → asked + mot interrogatif (who, what, where, when, why, how) + sujet + verbe (ordre affirmatif). Temps reculé.
3. Jamais do/does/did dans la phrase indirecte. Pas de point d'interrogation final.

B. Ordres / Conseils (Impératifs) :

1. Affirmatif : told / ordered / advised / warned + objet + to + base verbale.
2. Négatif : told / ordered / advised / warned + objet + not to + base verbale.
3. Let's → suggested + V-ing / that + should + BV.

Verbes introducteurs courants : ask, wonder, want to know (questions) ; tell, order, ask, advise, warn, beg, forbid (ordres).

EXERCICE RÉSOLU 14

Questions et ordres rapportés : contexte sanitaire

Énoncé : Mettez au discours indirect.

1. The journalist asked : "How many cases of cholera have been reported this week?"
2. "Do you wash your hands before eating?" the teacher asked the pupils.
3. The doctor told the patient : "Take this medicine three times a day."
4. "Don't drink water from the river," the chief warned the children.
5. "Let's clean the school compound together," the prefect proposed.

SOLUTION

Solution détaillée :

1. The journalist asked how many cases of cholera had been reported that week.
 - Question ouverte (How many) → conserve how many.
 - have been reported (present perfect passive) → had been reported (past perfect passive).
 - this week → that week.
 - Ordre affirmatif : cases ... had been reported (pas had cases been reported).
2. The teacher asked the pupils if / whether they washed their hands before eating.
 - Question fermée → if / whether.
 - Do you wash (present simple) → washed (past simple). Pas de did.
 - you → they (les élèves). your → their.

3. The doctor told the patient to take that medicine three times a day.
 - Impératif affirmatif Take → to take.
 - told + objet (the patient) + to + BV.
 - this → that.
4. The chief warned the children not to drink water from the river.
 - Impératif négatif Don't drink → not to drink.
 - warned + objet + not to + BV.
5. The prefect suggested cleaning the school compound together. (ou suggested that they should clean...)
 - Let's → suggested + V-ing (forme la plus courante au Bac).
 - Let's implique we ; avec V-ing, le sujet n'est pas exprimé.

Conclusion : Questions → asked if/whether ou asked [Wh-] + ordre affirmatif. Ordres → told/advised/warned + objet + (not) to + BV. Let's → suggested + V-ing.

MÉTHODE Rédiger une composition sur la santé / prévention

Objectif : Produire un texte cohérent (150–200 mots) informant, sensibilisant ou argumentant sur un problème de santé. Structure type (4 paragraphes) :

1. Introduction (1 phrase d'accroche + thèse) : Présenter le problème, son importance, annoncer le plan. Ex : "Cholera outbreaks remain a major threat in our region. This essay explains the causes, consequences and prevention measures."
2. Développement 1 – Causes / Transmission : Link words : Firstly, The main cause is, Due to, Because of. Vocabulaire : **contaminated water**, **poor sanitation**, **open defecation**, **lack of hygiene**.
3. Développement 2 – Solutions / Prévention : Link words : Secondly, To prevent this, We must, It is essential to. Structures : People should / must / have to + BV, The government needs to + BV, Communities ought to + BV. Vocabulaire : **oral rehydration**, **vaccination**, **handwashing**, **latrine construction**.
4. Conclusion (Appel à l'action) : In conclusion, To sum up, Let us all... Résumer + exhorter. Ex : "Everyone has a role to play. Let's wash hands, use latrines and report symptoms early."

Grammar check-list : Used to (habitudes passées), Tag questions (rhétoriques), Compound nouns (vocabulaire précis), Reported speech (citer autorités/experts), Modals (obligation/conseil).

EXERCICE RÉSOLU 15 Rédaction : "Preventing communicable diseases in our community"

Énoncé : Sujet de type Bac : "Write a composition of 150–200 words on the following topic : 'How can we prevent communicable diseases in our community?' Use at least 5 compound nouns, 2 tag questions, 1 reported speech sentence and 1 sentence with used to."

SOLUTION

Composition modèle (environ 180 mots) :

Preventing Communicable Diseases in Our Community

Communicable diseases such as cholera, typhoid and malaria still affect many families in our district. Didn't we use to lose many children to diarrhoea every rainy season? Health workers say that things can change if we act together.

Firstly, the main causes are contaminated water, poor sanitation and the lack of hand-washing stations in public places. Many households used to drink water directly from streams without boiling it. Secondly, prevention is possible. The District Medical Officer stated that every family must use mosquito nets and build improved pit latrines. Isn't it time we all took responsibility?

Moreover, vaccination campaigns against cholera and typhoid should reach every village. Community health workers must teach oral rehydration techniques to mothers. Schools need handwashing facilities with soap.

In conclusion, preventing diseases is cheaper than curing them. Let us boil water, wash hands, use latrines and sleep under treated nets. A healthy community is a wealthy community.

Analyse des exigences respectées :

- 5+ noms composés : health workers, contaminated water, poor sanitation, handwashing stations, mosquito nets, pit latrines, vaccination campaigns, community health workers, oral rehydration, handwashing facilities (10).
- 2 tag questions : Didn't we use to lose...? ; Isn't it time...?
- 1 reported speech : The District Medical Officer stated that every family must use... (discours indirect ; must conservé car obligation toujours valable).
- 1 used to : Many households used to drink... ; Didn't we use to lose...
- Connecteurs : Firstly, Secondly, Moreover, In conclusion.
- Modaux : must, should, can, need to.

Conclusion : Une composition réussie intègre explicitement les points de grammaire demandés dans un texte fluide et argumenté, pas sous forme d'exercices isolés.

MÉTHODE **Activité d'intégration : Réinvestir l'unité complète**

Objectif : Mobiliser l'ensemble des savoirs (speaking, grammar, vocabulary, listening, reading, writing) dans une tâche complexe simulée. Scénario type : "Vous êtes membre du Club Santé-Environnement de votre lycée. Préparez une campagne de sensibilisation pour la Journée Mondiale de la Santé (7 avril)." Étapes de la tâche intégrée :

1. Écoute/Prise de notes : Écouter un court reportage (audio/vidéo) sur une campagne de reboisement / vaccination. Noter : problème, actions, résultats, citations.
2. Oral (Interaction) : En binôme, jouer un dialogue : un journaliste interviewe le président du club. Utiliser *used to* (passé), *tag questions* (vérification), vocabulaire spécifique.
3. Grammaire en contexte : Transformer 3 citations du reportage en discours indirect (déclarations + questions + ordres).
4. Lecture/Analyse : Lire un texte sur une maladie hydrique. Identifier : noms composés, marqueurs de cause/conséquence, modaux de recommandation.
5. Écriture finale : Produire une affiche (poster) + un communiqué de presse (100 mots) + un discours d'ouverture (2 min) pour le jour J.

Critères d'évaluation (grille type Bac) :

- Contenu / Respect du sujet (4 pts)
- Cohérence / Organisation (3 pts)
- Richesse lexicale (vocabulaire unité) (3 pts)
- Correction grammaticale (points ciblés) (5 pts)
- Orthographe / Ponctuation / Lisibilité (2 pts)
- Originalité / Impact (3 pts) — Total : 20 pts

EXERCICE RÉSOLU 16 **Simulation d'intégration : Journée Mondiale de la Santé**

Énoncé : À partir du scénario ci-dessus, effectuez les sous-tâches 3 et 5 (grammaire en contexte + écriture finale).

Données du reportage (simulé) :

Reporter : "The reforestation project started three years ago. We have planted 10,000 trees. Did the villagers participate actively?"

Chief : "Yes, they did. We used to cut trees for firewood. Now we protect the forest. Please, continue supporting us."

Tâche 3 : Mettez les 4 interventions au discours indirect. Tâche 5 : Rédigez le communiqué de presse (100 mots) annonçant l'événement du 7 avril.

SOLUTION

Solution détaillée :

Tâche 3 – Discours indirect :

1. The reporter said (that) the reforestation project had started three years before.
2. The reporter said (that) they had planted 10,000 trees.
3. The reporter asked if / whether the villagers had participated actively. (Question fermée → if/whether + past perfect).
4. The chief confirmed/replied (that) they had. He explained (that) they used to cut trees for firewood. (Habitude passée → used to inchangé car déjà passé). He added (that) they protected the forest then. (Present simple → past simple ; now → then). He asked/urged them to continue supporting them. (Impératif Please continue → asked/urged + to continue ; us → them).

Tâche 5 – Communiqué de presse (modèle, environ 100 mots) :

PRESS RELEASE – World Health Day

Yaoundé, April 5 – The Health-Environment Club of Biyem-Assi Technical High School will celebrate World Health Day on Monday, April 7, under the theme "Healthy Forests, Healthy Communities".

The event starts at 8 :00 AM with a tree-planting ceremony on the school campus, followed by a health walk to the district medical centre. Dr. Ngo Bayock, District Medical Officer, will deliver a talk on "Preventing Waterborne Diseases through Environmental Protection".

Free screening for malaria, diabetes and hypertension will be offered. Hand-washing stations and mosquito nets will be distributed to vulnerable families.

The Club President, Mbarga Jean, declared : "We used to ignore the link between deforestation and disease. Now we act." All students, parents and partners are invited.

Contact : Club Coordinator, Tel : 6XX XXX XXX.

Vérification : Vocabulaire unité (tree-planting, health walk, waterborne diseases, hand-washing stations, mosquito nets, deforestation), used to, discours indirect (declared that...), structure formelle, connecteurs. Conclusion : L'intégration réussit quand chaque item grammatical sert la communication réelle, pas l'exercice artificiel.

ATTENTION**Les 5 erreurs qui coûtent des points au Bac**

1. Confondre used to (habitude passée) et be used to (habitude présente).
Faux : I used to wake up early now. Juste : I am used to waking up early now. / I used to wake up early when I was young.

2. Oublier le backshifting au discours indirect (verbe introducteur au passé).
Faux : He said he will come. Juste : He said he would come. (Sauf vérité générale : The teacher said the Earth revolves around the Sun.)
3. Mettre l'auxiliaire do/does/did dans la question indirecte.
Faux : She asked if I did like it. Juste : She asked if I liked it.
4. Pluriel mal placé dans les noms composés.
Faux : healths centres, mother-in-laws, check-ups (si trait d'union oublié : checkups accepté mais check-ups préféré). Juste : health centres, mothers-in-law, check-ups.
5. Tag question : mauvaise polarité ou mauvais pronom.
Faux : Let's go, will we ? / Nobody came, didn't they ? / I'm right, amn't I ?
Juste : Let's go, shall we ? / Nobody came, did they ? / I'm right, aren't I ?

Astuce de révision : Pour chaque point, écrivez 3 phrases Faux/Juste et expliquez la règle à un camarade. C'est la meilleure façon d'ancrer la correction.

9 EXERCICES**10 ENVIRONMENT, WELLBEING AND HEALTH****10.1 Je vérifie mes connaissances****EXERCICE 12 QCM : Used to / Be used to**

Choose the correct option to complete each sentence. (Choisis la bonne option.)

1. When I was a child, my family _____ visit the Waza National Park every Christmas.
a) used to
b) are used to
c) use to
d) didn't used to
2. The tour guide _____ walking long distances in the Mandara Mountains ; he does it every week.
a) used to
b) is used to
c) uses to
d) didn't use to
3. Tourists _____ pay an entrance fee to visit the Foumban Royal Palace, but now it is free on Sundays.
a) are used to
b) use to
c) used to
d) were used to
4. _____ you _____ eat ndolé (plat traditionnel) when you lived in Douala ?
a) Did / used to
b) Are / used to
c) Do / use to
d) Were / used to
5. We _____ the hot climate in Maroua ; we have lived there for ten years.

- a) used to
- b) didn't use to
- c) are used to
- d) use to

EXERCICE 13 Vrai ou Faux justifié : Tag Questions & Environnement

Read the statements. Write True or False and justify your answer with the correct tag question or vocabulary precision. (Écris Vrai ou Faux et justifie.)

1. "Let's plant trees around the school compound, shall we?" → The tag question is correct for a suggestion with "Let's".
2. "Nobody threw waste in the river, did they?" → The tag is correct because "Nobody" is a negative subject, requiring a positive tag.
3. "A seedling (jeune plant) is a fully grown tree ready for cutting."
4. "Deforestation (déforestation) helps protect natural habitats (habitats naturels) for wildlife (faune sauvage)."
5. "The gardener waters the flowers every morning, doesn't he?" → The tag question follows the rule : positive statement, negative tag.

EXERCICE 14 Définitions et Vocabulaire : Santé et Noms Composés

Match each term (1–5) with its correct definition (a–e). Write the letter in the box. Then write the plural form of each compound noun. (Associe et donne le pluriel.)

Term	Definition
1. Mosquito net (moustiquaire)	a. A place where sick people are treated.
2. Health centre (centre de santé)	b. A net used to prevent mosquito bites.
3. First-aid kit (trousse de secours)	c. A disease spread from person to person.
4. Communicable disease (maladie transmissible)	d. A box containing medical supplies for emergency.
5. Passer-by (passant)	e. A person walking past a place.

EXERCICE 15 Discours Direct / Indirect : Transformations de base

Rewrite the following sentences in Indirect (Reported) Speech. The reporting verb is in the past (said / told / asked). (Transforme en discours indirect.)

1. The nurse said : "I am vaccinating the children today."
2. The doctor told me : "You must drink clean water."
3. A tourist asked : "Where is the nearest hospital?"
4. The guide said : "The museum opens at 9 a.m."
5. The teacher ordered : "Don't touch the medical waste."

10.2 Je m'entraîne

EXERCICE 16 Dialogue complet : Visite touristique à Foumban

Complete the dialogue between a Tourist (T) and a Guide (G) at the Foumban Royal Palace. Use the correct form : used to / didn't use to / be used to (present or past) + verb in brackets. (Complète le dialogue avec la forme correcte.)

1. G : Welcome! Kings _____ (live) in this palace for centuries.
2. T : Did they _____ (receive) foreign visitors often?
3. G : Yes, they _____ (host) many diplomats. But they _____ (allow) photos inside the throne room (now it is allowed).
4. T : I _____ (not / walk) on such beautiful traditional carpets.
5. G : You will get used to it. The artisans _____ (work) here every day.
6. T : _____ they _____ (make) bronze sculptures in the past?
7. G : Absolutely. They _____ (use) the lost-wax technique.
8. T : I _____ (see) many crafts, but these are unique.
9. G : Tourists _____ (buy) many souvenirs here.
10. T : I _____ (not / spend) much money usually, but I will today!

EXERCICE 17 Tag Questions : Environnement et Santé

Add the correct Tag Question to each sentence. (Ajoute la question tag correcte.)

1. We should protect the Korup National Park, _____?
2. Cutting down trees causes erosion, _____?

3. Nobody wants to drink polluted water, _____?
4. Let's organize a cleaning campaign this Saturday, _____?
5. The nurses have vaccinated the villagers, _____?
6. Malaria is transmitted by mosquitoes, _____?
7. You rarely sleep without a mosquito net, _____?
8. There isn't any medicine left in the kit, _____?
9. Everyone must wash their hands before eating, _____?
10. I am right about the prevention measures, _____?

EXERCICE 18 Pluriels des noms composés : Spécialité Santé

Write the plural form of the following compound nouns. Be careful with the rules (head noun plural, both parts plural, or fixed forms). (Écris le pluriel.)

- | | |
|---------------------------------------|--------------------------------------|
| 1. toothbrush (brosse à dents) | 6. mother-in-law (belle-mère) |
| 2. health centre (centre de santé) | 7. grown-up (adulte) |
| 3. passer-by (passant) | 8. blood test (analyse de sang) |
| 4. first-aid kit (trousse de secours) | 9. x-ray (radio / radiographie) |
| 5. mosquito net (moustiquaire) | 10. medical check-up (bilan médical) |

EXERCICE 19 Discours Indirect : Déclarations, Questions, Ordres (Médecin-chef)

Report the following statements made by the District Medical Officer during a health campaign. Use reporting verbs : said, told, asked, ordered, advised, warned. (Rapport le discours du médecin-chef.)

1. "Cholera spreads through contaminated water."
2. "Do not drink water from the river without boiling it."
3. "How many cases of measles have you recorded this month?"
4. "The vaccination campaign will start next Monday."
5. "Where is the nearest health centre located?"
6. "Parents must bring their children for routine immunization."
7. "Did you distribute the mosquito nets to the pregnant women?"
8. "Wash your hands with soap before every meal."

10.3 Je me prépare au Bac

EXERCICE 20 Compréhension de lecture : La lutte contre le paludisme au Cameroun

Read the text carefully and answer the questions that follow. (Lis le texte et réponds aux questions.)

Malaria Prevention in Cameroon : A Collective Effort

Malaria remains a major public health challenge in Cameroon. According to the Ministry of Public Health, the disease accounts for approximately 30% of consultations in health facilities and is a leading cause of morbidity and mortality, especially among children under five and pregnant women. The primary vector is the female *Anopheles* mosquito, which breeds in stagnant water (eau stagnante) found in puddles, blocked gutters (caniveaux bouchés), and uncovered containers.

To combat this scourge (fléau), the government, with support from partners like the Global Fund and WHO, has implemented several strategies. The mass distribution of Long-Lasting Insecticidal Nets (LLINs / Moustiquaires Imprégnées à Longue Durée d'Action - MILD) is the cornerstone (pierre angulaire) of prevention. Since 2011, nationwide campaigns have distributed millions of nets free of charge to households. "Sleeping under a treated net every night is the single most effective way to prevent malaria," stated the Minister of Health during the last launch ceremony in Yaoundé.

Indoor Residual Spraying (IRS / Pulvérisation Intradosicielle à Effet Rémanent - PIER) is used in targeted high-transmission areas in the North and Far North regions. Furthermore, Intermittent Preventive Treatment in pregnancy (IPTp) with Sulphadoxine-Pyrimethamine is offered free during antenatal consultations (consultations prénatales) to protect mothers and unborn babies.

Community engagement is vital. Community Health Workers (Agents de Santé Communautaires) educate families on environmental hygiene : clearing bushes (débroussailler), draining stagnant water, and covering water storage containers. Early diagnosis using Rapid Diagnostic Tests (RDTs / Tests de Diagnostic Rapide - TDR) and prompt treatment with Artemisinin-based Combination Therapies (ACTs / Thérapies de Combinaison à base d'Artémisinine - TCA) are available in all public health centres.

However, challenges persist. Misuse of nets (for fishing or gardening), resistance to insecticides, and self-medication with incomplete doses hinder progress. The National Malaria Control Programme (NMCP / Programme National de Lutte contre le Paludisme - PNLP) aims for a "Malaria-Free Cameroon" by 2035, aligning with the WHO Global Technical Strategy.

Questions :

1. True or False? Justify by quoting the text. (Vrai ou Faux? Justifie par une citation.)
 - a) Malaria is the main reason for consultation in Cameroonian health facilities.
 - b) LLINs are sold at a subsidized price to households.
 - c) IRS is applied uniformly across all ten regions of Cameroon.
 - d) Community Health Workers play a role in environmental hygiene education.

2. Open questions : (Questions ouvertes.)

- e) Name two specific groups most vulnerable to malaria according to the text.
- f) What does IPTp stand for and who benefits from it?
- g) Identify two challenges hindering malaria elimination mentioned in the last paragraph.

3. Vocabulary in context : (Vocabulaire en contexte.) Find words/phrases in the text that mean :

- h) "A disease that causes death" (paragraph 1) → _____
- i) "The most important part of something" (paragraph 2) → _____
- j) "Giving medicine to oneself without a doctor's advice" (paragraph 5) → _____

EXERCICE 21 Rédaction type Probatoire : Article pour le magazine scolaire

Task : Your school is organizing a campaign against communicable diseases. Write an article of 150–200 words for the school magazine. (Ta école organise une campagne contre les maladies transmissibles. Écris un article de 150–200 mots pour le magazine scolaire.) Your article must include :

- A catchy title.
- Presentation of 2–3 common communicable diseases (causes, symptoms, transmission).
- Prevention measures (hygiene, vaccination, environment).
- At least two direct quotations from the school nurse (use Direct Speech) and one indirect quotation (Indirect Speech).
- A call to action for students.

Useful vocabulary : outbreak (épidémie), contagious (contagieux), immunization (vaccination), sanitation (assainissement), handwashing (lavage des mains), "Prevention is better than cure".

EXERCICE 22 Compréhension orale simulée : Campagne de reboisement scolaire

Instructions : Listen to the text read by your teacher (or read the transcript below if practicing alone) and complete the Information Sheet. (Écoute le texte et complète la fiche d'informations.)

Transcript (Teacher's copy – do not read to students initially) : "Good morning everyone.

Last Saturday, June 15th, our school, Government Technical High School Buea, launched its annual 'Green School' reforestation campaign. The event started at 8 :00 a.m. sharp. Over 350 students from Form 1 to Upper Sixth participated, supervised by 15 teachers and the school administration. We received a donation of 2,000 seedlings from the Ministry of Forestry and Wildlife (MINFOF). These included 1,200 *Prunus africana* (Prunier d'Afrique), 500 Mahogany (Acajou), and 300 Eucalyptus trees. The students were divided into 20 groups. Each group planted 100 trees along the school boundaries and near the water catchment area (prise d'eau) to protect the source. The Principal, Mr. Ngome, declared : 'We are not just planting trees ; we are planting our future.' The campaign ended at 1 :00 p.m. with a refreshment. Next year, we aim to plant 3,000 trees."

11 CORRIGÉS DES EXERCICES

CORRIGÉ Exercice 1 — QCM : Used to / Be used to

1. a) used to — Past habit that no longer exists (when I was a child) : used to + base verb.
2. b) is used to — Present routine/habit the person is accustomed to : be used to + -ing (walking).
3. c) used to — A past situation that has changed (but now it is free).
4. a) Did / use to — Interrogative of used to in the past : Did + subject + use to... ? (After auxiliary did, the main verb takes the base form use to.)
5. c) are used to — Present state of being accustomed to something : be used to + noun (the hot climate).

Point de vigilance : used to + infinitive = habitude passée révolue ; be used to + -ing/noun = être habitué à. Ne jamais écrire didn't used to (écrire didn't use to).

CORRIGÉ Exercice 2 — Vrai ou Faux justifié : Tag Questions & Environnement

1. True. With Let's..., the tag is always shall we?
2. True. Nobody is negative in meaning, so the tag is positive : did they? (Nobody takes they in the tag.)
3. False. A seedling is a young plant, not a fully grown tree.
4. False. Deforestation destroys natural habitats ; reforestation (planting trees) protects them.
5. True. Positive statement (waters, present simple, 3rd person) → negative tag with the auxiliary does : doesn't he?

CORRIGÉ Exercice 3 — Définitions et Vocabulaire : Santé et Noms Composés

Matching and plurals :

Term	Definition	Plural
1. Mosquito net	b	mosquito nets
2. Health centre	a	health centres
3. First-aid kit	d	first-aid kits
4. Communicable disease	c	communicable diseases
5. Passer-by	e	passers-by

Rule reminder : for hyphenated compounds with a head noun (passer-by), the head noun takes the plural : passers-by. For simple compounds, only the last word takes -s : mosquito nets.

CORRIGÉ Exercice 4 — Discours Direct / Indirect : Transformations de base

1. The nurse said (that) she was vaccinating the children that day. (present continuous → past continuous ; today → that day)
2. The doctor told me (that) I had to drink clean water. (must → had to)
3. A tourist asked where the nearest hospital was. (wh-question : statement word order, no auxiliary, no question mark ; is → was)
4. The guide said (that) the museum opened at 9 a.m. (present simple → past simple)
5. The teacher ordered (us/them) not to touch the medical waste. (negative imperative → told/ordered + object + not to + infinitive)

Point de vigilance : in reported questions, keep the affirmative word order and remove the question mark.

CORRIGÉ Exercice 5 — Dialogue complet : Visite touristique à Foumban

1. used to live (past situation over centuries)
2. use to receive (after Did, base form use to)
3. used to host ; didn't use to allow (past habit that has changed — now allowed)
4. am not used to walking (present : be used to + -ing)
5. are used to working (present habit of the artisans)
6. Did / use to make (question about the past)
7. used to use (past technique)

8. am used to seeing (present : accustomed to)
9. are used to buying (present habit) — used to buy also acceptable if the guide speaks of the past, but the present context favours are used to buying.
10. am not used to spending (present : be used to + -ing)

CORRIGÉ Exercice 6 — Tag Questions : Environnement et Santé

1. shouldn't we? (modal should → negative tag)
2. doesn't it? (present simple, subject = gerund phrase = it)
3. do they? (Nobody negative → positive tag, pronoun they)
4. shall we? (fixed tag after Let's)
5. haven't they? (present perfect, auxiliary have)
6. isn't it? (verb be, present simple)
7. do you? (rarely is negative in meaning → positive tag)
8. is there? (negative statement with there isn't → positive tag is there)
9. mustn't they? (Everyone → they; modal must repeated in the tag)
10. aren't I? (irregular tag for I am)

Point de vigilance : mots à valeur négative (nobody, rarely, never, hardly) imposent un tag positif ; I am donne aren't I?.

CORRIGÉ Exercice 7 — Pluriels des noms composés : Spécialité Santé

1. toothbrush → toothbrushes (plural of the final noun; -sh → -shes)
2. health centre → health centres
3. passer-by → passers-by (head noun passer takes the plural)
4. first-aid kit → first-aid kits
5. mosquito net → mosquito nets
6. mother-in-law → mothers-in-law (head noun mother)
7. grown-up → grown-ups (no noun inside → -s at the end)
8. blood test → blood tests

9. x-ray → x-rays

10. medical check-up → medical check-ups

Point de vigilance : mothers-in-law, passers-by : le nom principal porte la marque du pluriel ; grown-ups, check-ups : pas de nom principal, donc -s final.

CORRIGÉ Exercice 8 — Discours Indirect : Déclarations, Questions, Ordres (Médecin-chef)

1. The District Medical Officer said (that) cholera spreads / spread through contaminated water. (general truth : the present spreads may be kept ; backshift spread also accepted)
2. He warned us not to drink water from the river without boiling it.
3. He asked how many cases of measles we had recorded that month. (present perfect → past perfect ; this → that)
4. He said (that) the vaccination campaign would start the following Monday. (will → would ; next Monday → the following Monday)
5. He asked where the nearest health centre was located. (affirmative word order)
6. He told parents (that) they had to bring their children for routine immunization. (must → had to)
7. He asked if/whether we had distributed the mosquito nets to the pregnant women. (yes/no question → if/whether ; past simple → past perfect)
8. He ordered/advised us to wash our hands with soap before every meal. (imperative → to + infinitive)

Point de vigilance : choisir le verbe introducteur adapté : asked (question), ordered/warned/advised + object + (not) to (ordre/conseil), said/told (déclaration).

CORRIGÉ Exercice 9 — Compréhension de lecture : La lutte contre le paludisme au Cameroun

1. True or False (with quotations) :
 - a) True. "The disease accounts for approximately 30% of consultations in health facilities and is a leading cause of morbidity and mortality."
 - b) False. "Nationwide campaigns have distributed millions of nets free of charge to households." (They are free, not subsidized.)

- c) False. "IRS is used in targeted high-transmission areas in the North and Far North regions." (Not in all ten regions.)
- d) True. "Community Health Workers educate families on environmental hygiene : clearing bushes, draining stagnant water, and covering water storage containers."

2. Open questions :

- e) Children under five and pregnant women.
- f) IPTp = Intermittent Preventive Treatment in pregnancy ; it benefits pregnant women (and their unborn babies), offered free during antenatal consultations.
- g) Any two of : misuse of nets (for fishing or gardening) ; resistance to insecticides ; self-medication with incomplete doses.

3. Vocabulary in context :

- h) mortality (a leading cause of mortality)
- i) the cornerstone
- j) self-medication

Barème indicatif (sur 20) : Q1 : 4×2 pts (1 pt réponse + 1 pt citation exacte) = 8 pts ; Q2 : 3×2 pts = 6 pts ; Q3 : 3×2 pts = 6 pts. Points de vigilance : la justification par une citation exacte du texte est exigée (entre guillemets) ; une justification paraphrasée ne vaut que la moitié des points.

CORRIGÉ

Exercice 10 — Rédaction type Probatoire : Article pour le magazine scolaire

Model answer (about 180 words) :

STOP DISEASES BEFORE THEY START!

Our school is launching a campaign against communicable diseases, and everyone is concerned. Malaria, transmitted by the female Anopheles mosquito, causes fever and headaches. Cholera, spread through contaminated water, leads to severe diarrhoea and dehydration. Tuberculosis is a contagious airborne disease that attacks the lungs.

Fortunately, prevention is possible. Our school nurse declared : "Sleeping under a treated mosquito net every night is your best protection against malaria." She also said : "Wash your hands with soap before every meal and after using the toilet." Moreover, she advised us to drink only boiled or treated water and to keep our environment clean.

Vaccination is equally essential. The nurse told us that immunization protects the whole community, not just the vaccinated person.

Dear students, remember : prevention is better than cure. Sleep under a net, wash your hands, clear stagnant water around your homes, and get vaccinated. Together, let's make our school a healthy school!

Barème indicatif (sur 20) : respect de la tâche et du format article (titre accrocheur) : 3 pts ; contenu (2-3 maladies : causes/symptômes/transmission ; mesures de prévention) : 6 pts ; deux citations au discours direct + une au discours indirect correctement

ponctuées et introduites : 4 pts ; cohérence, organisation, appel à l'action : 3 pts ; correction linguistique (grammaire, vocabulaire de l'unité, orthographe) : 4 pts. Points de vigilance : guillemets et majuscule pour le discours direct ; backshift et suppression des guillemets pour le discours indirect ; rester entre 150 et 200 mots ; employer le vocabulaire de l'unité (outbreak, contagious, immunization, sanitation, handwashing).

CORRIGÉ Exercice 11 — Compréhension orale simulée : Campagne de reboisement scolaire

Information Required	Answers
Name of School	Government Technical High School Buea
Date of Campaign	Saturday, June 15th
Start Time / End Time	8 :00 a.m. / 1 :00 p.m.
Number of Student Participants	Over 350 students
Number of Teachers Involved	15 teachers
Donor of Seedlings	Ministry of Forestry and Wildlife (MINFOF)
Total Number of Seedlings	2 000 seedlings
Breakdown of Species	1. Prunus africana (1 200) 2. Mahogany (500) 3. Eucalyptus (300)
Planting Locations (2)	1. Along the school boundaries 2. Near the water catchment area
Principal's Quote (Direct Speech)	"We are not just planting trees ; we are planting our future."
Next Year's Target	3 000 trees

Vérification du calcul : $1\,200 + 500 + 300 = 2\,000$ plants, ce qui correspond bien au total annoncé. $20 \text{ groupes} \times 100 \text{ arbres} = 2\,000 \text{ arbres plantés}$: cohérent. Barème indicatif (sur 10) : 11 informations $\times$ 1 pt, arrondi à 10 (la citation doit être exacte pour valider le point). Points de vigilance : noter les chiffres exacts (350 élèves, 15 enseignants) ; reproduire la citation au discours direct avec guillemets ; distinguer le donateur (MINFOF) du lieu de plantation.

12 FICHE BILAN

Carte mentale de la leçon : les six compétences clés autour du thème Environment, Wellbeing and Health.

À RETENIR

L'essentiel de la leçon – Grammar : the must-know rules

Point	Rule	Example
used to + V	past habit or state, now finished (habitude passée révolue)	People used to travel on foot.
didn't use to + V	negative of used to (no "d" after did)	We didn't use to have hotels here.
be used to + noun/-ing	to be accustomed to (être habitué à)	Tourists are used to climbing Mount Cameroon.
Tag questions	positive sentence → negative tag; negative sentence → positive tag	You plant trees, don't you? / It isn't late, is it?
Compound nouns	plurals : usually add -s to the last word	toothbrush → toothbrushes; outbreak → outbreaks
Reported speech	backshift : present → past; past → past perfect; will → would; can → could	"I am sick" → He said he was sick.

ATTENTION Pièges fréquents

- didn't use to (sans d) : on écrit "We didn't use to..." et non "didn't used to".
- Ne pas confondre : I used to live in Douala (avant, plus maintenant) et I am used to living in Douala (j'y suis habitué).
- Tag question : le tag reprend l'auxiliaire de la phrase principale, jamais un autre : "She can swim, can't she?" et non "doesn't she?".
- Avec there is/are : "There is a clinic, isn't there?"

PROPRIÉTÉ Reported speech – time and place changes

Direct	Indirect	Direct	Indirect
now	then	today	that day
yesterday	the day before	tomorrow	the next day
here	there	this / these	that / those
ago	before	last week	the week before

PROPRIÉTÉ Reporting questions and commands

- Yes/No questions : asked + if/whether + statement order (ordre sujet-verbe, pas d'inversion, pas de do/does/did). "Do you wash your hands?" → She asked if I washed my hands.
- Wh-questions : keep the question word, statement order. "Where is the clinic?" → He asked where the clinic was.
- Commands : told/asked + object + (not) to + V. "Wash your hands!" → The nurse told us to wash our hands. "Don't touch the seedlings!" → He told us not to touch the seedlings.

EXEMPLE Key vocabulary

- Tourism : tourist site (site touristique), landscape (paysage), wildlife (faune et flore), guide (guide), souvenir (souvenir), to hike (randonner).
- Environment : to plant trees (planter des arbres), gardening (jardinage), natural habitat (habitat naturel), to protect (protéger), seedling (jeune plant).
- Health : communicable disease (maladie transmissible), to prevent (prévenir), hygiene (hygiène), symptom (symptôme), vaccine (vaccin), outbreak (épidémie), handwashing (lavage des mains).

MÉTHODE Express methods

1. Tag question : find the auxiliary of the main verb, reverse the polarity (positive ↔ negative), add the pronoun.
2. Reported speech : (1) identify statement / question / command; (2) choose say/ask/tell; (3) backshift tenses; (4) change time and place words; (5) change pronouns.
3. Writing a composition : introduction (the health issue) → body (causes, prevention) → conclusion (advice to the community).

EXERCICE RÉSOLU 17 Reported speech – un exemple complet

Énoncé. Report the following sentences. (a) The nurse said : "I vaccinate children every day." (b) The teacher asked : "Did you plant the trees yesterday?" (c) The guide said to

the tourists : "Don't feed the animals."

SOLUTION

Solution détaillée.

1. (a) Statement → say + backshift (present simple → past simple ; every day → every day, inchangé) : The nurse said (that) she vaccinated children every day.
2. (b) Yes/No question → asked + if + statement order + backshift (past simple → past perfect ; yesterday → the day before) : The teacher asked if we had planted the trees the day before.
3. (c) Negative command → told + object + not to + V : The guide told the tourists not to feed the animals.

À RETENIR**Checklist avant le Bac**

- ☐ I can use used to and didn't use to for past habits.
- ☐ I can distinguish used to + V from be used to + -ing.
- ☐ I can build correct tag questions with the right auxiliary and polarity.
- ☐ I know the plural of compound nouns (toothbrushes, outbreaks, grown-ups).
- ☐ I can report statements with the correct tense backshift.
- ☐ I can report yes/no questions with if/whether and wh-questions with statement word order.
- ☐ I can report commands with told/asked + object + to + V.
- ☐ I can change time and place expressions (now → then, here → there, today → that day).
- ☐ I master vocabulary about tourist sites, tree planting and disease prevention.
- ☐ I can write a short composition giving advice on preventing communicable diseases.
