

ANGLAIS • 1RE TECH

ANGLAIS – CLASSE DE PREMIÈRE TECHNIQUE

LEÇON N05

MEDIA AND COMMUNICATION

DURÉE CONSEILLÉE : 13 SÉANCES (FICHE DE PROGRESSION HARMONISÉE)

DANS CETTE LEÇON

This lesson equips Première technique students with the language skills needed to exchange information about verbal and non-verbal communication through TV, radio and print media, to use new Information and Communication Technologies, and to describe a workshop visit. It combines grammar (active/passive voices, used for/in + V-ing, preferences, WH-questions, punctuation), vocabulary, listening, reading and writing tasks anchored in the Cameroonian context.

- À la fin de cette leçon, je sais échanger des informations sur l'exploitation des informations verbales et non verbales à travers la TV, la radio et la presse écrite.
- À la fin de cette leçon, je sais utiliser correctement les voix active et passive pour décrire des procédés techniques.
- À la fin de cette leçon, je sais employer 'used for/in + verb-ing' et 'used with + noun' pour expliquer la fonction des TIC (www, MP3, USB flash drive, WhatsApp, Viber).
- À la fin de cette leçon, je sais comprendre des textes oraux portant sur les nouvelles technologies de l'information et de la communication.
- À la fin de cette leçon, je sais lire et exploiter un texte relatant la visite d'un atelier technique.
- À la fin de cette leçon, je sais exprimer mes préférences (prefer, would rather, like... better) dans des situations de communication.

OBJECTIFS DE LA LEÇON

- À la fin de cette leçon, je sais échanger des informations sur l'exploitation des informations verbales et non verbales à travers la TV, la radio et la presse écrite.
- À la fin de cette leçon, je sais utiliser correctement les voix active et passive pour décrire des procédés techniques.
- À la fin de cette leçon, je sais employer 'used for/in + verb-ing' et 'used with + noun' pour expliquer la fonction des TIC (www, MP3, USB flash drive, WhatsApp, Viber).
- À la fin de cette leçon, je sais comprendre des textes oraux portant sur les nouvelles technologies de l'information et de la communication.
- À la fin de cette leçon, je sais lire et exploiter un texte relatant la visite d'un atelier technique.
- À la fin de cette leçon, je sais exprimer mes préférences (prefer, would rather, like... better) dans des situations de communication.
- À la fin de cette leçon, je sais ponctuer correctement mes phrases et poser des questions avec WH- et How.
- À la fin de cette leçon, je sais rédiger une composition sur la visite d'un atelier et la manipulation/maintenance de machines et gadgets.
- À la fin de cette leçon, je sais appliquer ces notions à des situations concrètes de la vie courante camerounaise et justifier mes réponses.

PRÉREQUIS

- Les temps de base de l'anglais (present simple, past simple, present continuous) vus en classe de Seconde.
- Le vocabulaire élémentaire des médias (television, radio, newspaper) acquis au collège.
- La formation des questions simples avec les auxiliaires do/does/did.
- Les structures de base de la phrase anglaise (sujet – verbe – complément).
- L'usage courant d'un téléphone mobile et d'applications de messagerie dans la vie quotidienne.

1 SPEAKING : EXCHANGING INFORMATION THROUGH THE MEDIA

Situation d'accroche. Every morning in Yaoundé, millions of Cameroonians switch on **CRTV** or **Équinoxe TV**, listen to the radio in taxis, read Cameroon Tribune, or chat on WhatsApp and Facebook before breakfast. Yet how many of them can tell the difference between reliable information and a rumour, or explain in English how a phone-repair workshop works, like the ones in the Melen neighbourhood? How are the media and the new technologies changing the way we communicate, learn and work? This lesson gives you the language tools to **exchange information**, express your **preferences** and describe technical equipment in English.

Problématique. How can we use English to exchange verbal and non-verbal information through the TV, the radio and the print media?

1.1 What are the media ?

Imagine you want to know the result of a football match between Canon of Yaoundé and Coton Sport of Garoua. You can watch the match report on television, listen to the commentary on the radio, or read the article in a newspaper the next morning. In each case, the message travels from one sender to millions of receivers at the same time. These channels of mass communication are called the **media**.

DÉFINITION Media

The **media** (singular : medium) are the channels of mass communication that carry information to a large number of people at the same time. The three main traditional media are :

- Television (TV) : it combines moving images, sounds and spoken words.
- Radio : it uses only sounds and spoken words.
- Print media : newspapers and magazines, which use written words and photographs.

In Cameroon, you already know many media houses. For television, there are **CRTV** (the public broadcaster), **Canal 2 International**, **STV** and **Équinoxe TV**. For radio, there are **CRTV Radio**, **Radio Balafon** and **Sweet FM**. For the print media, the most famous newspapers are **Cameroon Tribune** (bilingual), **Le Messenger** and **Mutations**.

The three main types of media in Cameroon, with examples of media houses. Television combines images and sound; radio uses sound only; print media use written words and photographs.

LESAVAIS-TU ? Did you know ?

Since the liberalisation of the audiovisual sector in Cameroon in the year 2000, more than 100 private radio stations have been created across the country. Community radios now broadcast in English, French and many national languages, bringing information to villages that have no television signal.

1.2 Verbal and Non-verbal Information

When you watch the news on CRTV, you receive two kinds of messages at the same time. The **news anchor** (le présentateur) speaks words : this is **verbal information**. But behind him, you can see images of a flooded road in Douala, the colours of a political party, or the logo of a ministry : this is **non-verbal information**.

DÉFINITION Verbal and non-verbal information

- **Verbal information** is a message conveyed by words, either spoken (a radio interview, a TV report) or written (a newspaper article, a headline).
- **Non-verbal information** is a message conveyed without words : pictures, photographs, gestures, facial expressions, sounds, music, colours, symbols and logos.

Let us observe a concrete case. During a TV report about a school fair in Bafoussam, the journalist says : “More than five thousand students attended the fair.” That is verbal information. At the same time, the camera shows crowded stands, smiling students and a banner with the words “Education for All”. The images confirm and complete the words : that is non-verbal information. A good communicator always pays attention to **both**, because sometimes the picture tells more than the words.

Criterion	Verbal information	Non-verbal information
Channel	Words (spoken or written)	Images, gestures, sounds, colours, logos
TV example	The news anchor's words	Background images behind the anchor
Radio example	The journalist's report	Music, tone of voice, sound effects
Newspaper example	The article and the headline	The photograph and the layout
Advantage	Precise and detailed	Fast, emotional, understood by all
Risk	Can be long or boring	Can be ambiguous or manipulative

ATTENTION A very frequent mistake

In English, the word **information** is uncountable. You can never say "informations" or "an information". Say instead : a piece of information, some information, an item of news. Correct : "The radio gave us some useful information." Wrong : "The radio gave us informations." The same rule applies to news (always singular : "The news is good") and equipment (never "equipments").

1.3 Useful Expressions for Exchanging Information

To exchange information from the media, English speakers use reporting expressions. Learn them by heart ; they will be very useful at the Probatoire and the Baccalauréat technique.

À RETENIR Reporting expressions

- According to the news... the match was postponed. (selon les informations...)
- I heard on the radio that... the price of fuel will change.
- I read in Cameroon Tribune that... a new technical college will open.
- I saw on TV that... the Indomitable Lions won their match.
- The picture shows that... the bridge is damaged.
- He said (that)... the workshop was well equipped. (reported speech)

MÉTHODE How to conduct an information exchange

Follow these four steps, for example when you interview a witness of a local event :

1. Greet the person politely : Good morning, thank you for accepting this interview.
2. Ask a WH-question : What did you see? Where did it happen? When did the match start?
3. Listen carefully and note the key words (verbal and non-verbal details).
4. Report the answer with reported speech : He said that the match started at 4 p.m. / She told me that the fair was very crowded.

EXEMPLE A short dialogue at a school fair

Journalist (A) : Good morning ! I am reporting for the school magazine. What is happening here today?

Witness (B) : Good morning. It is our annual science and technology fair.

A : According to the programme, how many schools are taking part?

B : I heard on the radio that twelve schools registered, and the picture on the poster shows that there are also workshops on phone repair.

A : Thank you. So, you said that twelve schools are taking part and that there are technical workshops.

B : Exactly!

1.4 Practice : Role-play and Guided Debate

EXERCICE RÉSOLU 1 Role-play : the journalist and the witness

Task. In pairs, one student is a journalist from Équinoxe TV, the other is a witness of a local event (a football match or a school fair). The journalist interviews the witness, then reports two pieces of information to the class.

SOLUTION

Model answer.

- Journalist : Good afternoon. I am from Équinoxe TV. What did you see at the stadium yesterday?
- Witness : I saw a very exciting match. Canon beat Coton Sport two goals to one.
- Journalist : How did the supporters react?
- Witness : They sang and waved green and yellow flags.
- Report to the class : "He said that Canon beat Coton Sport two goals to one, and he told me that the supporters waved green and yellow flags."

EXERCICE 1 Guided debate : which medium is best for a technician ?

In groups of four, discuss this question : Which medium is the most useful for a Cameroonian technician : TV, radio or newspapers ? Give one advantage and one disadvantage of each medium. Use the expressions : In my opinion..., I think that..., According to me, the advantage of radio is that...

CORRIGÉ Guided debate

Possible ideas (accept all reasonable answers in correct English) :

- TV : advantage — it shows images, so you can see how a machine works ; disadvantage — it is expensive and needs electricity.
- Radio : advantage — it is cheap and reaches villages ; disadvantage — there are no pictures, so technical demonstrations are difficult.
- Newspapers : advantage — you can keep the article and read it again ; disadvantage — they arrive late and many people in rural areas cannot buy them daily.

EXERCICE 2 Verbal or non-verbal ?

Classify the following items : (1) the headline of Mutations ; (2) the logo of CRTV ; (3) the journalist's commentary on Radio Balafon ; (4) the photograph of a car accident in Le Messenger ; (5) the music at the beginning of the news.

CORRIGÉ Verbal or non-verbal ?

(1) Verbal (written words). (2) Non-verbal (symbol). (3) Verbal (spoken words). (4) Non-verbal (photograph). (5) Non-verbal (sound).

EXERCICE 3 Report the information

Rewrite each sentence with the reporting expression in brackets. (1) "The bridge in Wouri is damaged." (According to the news...) (2) "A new technical college will open in Bafoussam." (I read in Cameroon Tribune that...) (3) "The workshop is well equipped," said the visitor. (He said that...)

CORRIGÉ Report the information

(1) According to the news, the bridge in Wouri is damaged. (2) I read in Cameroon Tribune that a new technical college will open in Bafoussam. (3) He said that the workshop was well equipped. (Note the tense change in reported speech : is becomes was.)

À RETENIR Key points to remember

- The **media** are channels of mass communication : TV, radio and print media.
- **Verbal information** uses words; **non-verbal information** uses images, gestures, sounds, colours and logos.
- To report information, use : According to the news..., I heard on the radio that..., He said that....
- Information is uncountable : never “informations”.

2 GRAMMAR FOCUS 1 : ACTIVE AND PASSIVE VOICES

In the previous section, you learned to exchange information through the media : you spoke about TV programmes, radio shows and newspapers. You used sentences like “The journalist writes the article” and “CRTV broadcasts the news”. In all these sentences, the person who does the action is the subject. But in the world of media and technology, we often care more about the result of the action than about the person who does it. When you read “The news is broadcast at 8 p.m.”, the important thing is the news, not the person who reads it. This new way of building a sentence is called the **passive voice**, and it is the grammar focus of this section.

2.1 The Active Voice : A Quick Reminder

DÉFINITION Active voice

In the **active voice**, the subject performs the action. The basic structure is :

Subject + Verb + Object

The subject is the agent (le faiseur de l'action), the verb shows the action, and the object receives the action.

EXEMPLE Active sentences in the media world

- The journalist writes the article. (Le journaliste écrit l'article.)
- CRTL broadcasts the news at 8 p.m.
- The technician repairs the machines every week.
- The editor has published the magazine.
- The camera operator films the report. (L'opérateur filme le reportage.)

In each sentence, the subject (in bold at the beginning) does the action.

Now, imagine a different situation. You arrive at the workshop and you see that the machines are working again. You do not know who repaired them, and honestly, it does not matter. What matters is the machines. In English, you cannot say "Someone repaired the machines" every time; instead, you put the machines in front: "The machines are repaired." Welcome to the passive voice.

2.2 The Passive Voice : Definition and Formation

DÉFINITION Passive voice

In the **passive voice**, the subject receives the action instead of performing it. The object of the active sentence becomes the new subject. The structure is :

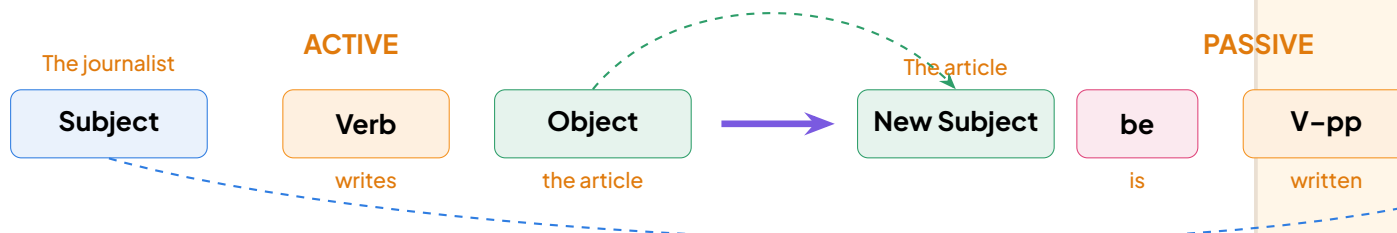

Object (new subject) + be (at the tense of the active verb) + past participle (+ by + agent)

The agent (celui qui fait l'action) is introduced by *by*, but it is often omitted.

PROPRIÉTÉ Only transitive verbs can be passive

Only **transitive verbs** — verbs followed by a direct object (un COD) — can be used in the passive voice. If there is no object, there is nothing to put in front.

- The journalist writes the article. → passive possible : The article is written.
- The presenter arrived late. → passive impossible : arrive has no object.
- The signal travels by satellite. → passive impossible : travel is intransitive here.

From active to passive : the object moves to the front and becomes the new subject; the verb becomes be + past participle; the old subject moves to the end after by (or disappears).

MÉTHODE How to change an active sentence into a passive one

Follow these four steps, in this order :

1. Find the direct object (le COD) of the active sentence. Ask : writes what? repairs what? films what?
2. Put this object at the beginning of the new sentence : it becomes the subject.
3. Conjugate the verb be at the same tense as the active verb, and make it agree with the new subject (singular or plural).
4. Add the past participle of the main verb, then by + agent if the agent is important.

Example : The technician repairs the machines.

1. Object = the machines.
2. The machines ...
3. Active verb repairs = present simple ; new subject is plural → are.
4. The machines are repaired (by the technician).

2.3 The Passive at the Main Tenses

The golden rule : **only the verb be changes** ; the past participle never changes. The tense of the active verb is carried by be. Study the table below with the verb to broadcast (diffuser), a typical media verb.

Tense	Active	Passive
Present simple	CRTV broadcasts the news.	The news is broadcast by CRTV.
Past simple	CRTV broadcast the match.	The match was broadcast by CRTV.
Present continuous	CRTV is broadcasting the debate.	The debate is being broadcast .
Past continuous	CRTV was broadcasting the show.	The show was being broadcast .
Future (will)	CRTV will broadcast the concert.	The concert will be broadcast .
Present perfect	CRTV has broadcast the report.	The report has been broadcast .
Past perfect	CRTV had broadcast the news.	The news had been broadcast .
Modals (can, must, should)	You must repair the generator.	The generator must be repaired .

À RETENIR Key structures to memorize

- Present simple : am / is / are + V-pp
- Past simple : was / were + V-pp
- Present continuous : am / is / are + being + V-pp
- Past continuous : was / were + being + V-pp
- Future : will be + V-pp
- Present perfect : have / has + been + V-pp
- Past perfect : had + been + V-pp
- Modals : modal + be + V-pp (ex : must be done, can be sent, should be checked)

Note : broadcast is an irregular verb : broadcast – broadcast – broadcast. Other useful media and workshop verbs : write – wrote – written, send – sent – sent, make – made – made, repair – repaired – repaired, transmit – transmitted – transmitted, install – installed – installed, record – recorded – recorded, film – filmed – filmed, edit – edited – edited.

ATTENTION Frequent error : agreement of be

The verb be must agree with the new subject (the former object), not with the agent.

- Correct : The news is broadcast at 8 p.m. (news is singular in English.)

- Wrong : The news are broadcast.
- Correct : The machines are repaired every week.
- Wrong : The machines is repaired.

Another frequent error : forgetting **be** completely. “The article written by the journalist” is not a complete sentence — say “The article **is** written by the journalist.”

2.4 When Do We Use the Passive Voice ?

PROPRIÉTÉ Three main uses of the passive

We prefer the passive voice when the agent is :

1. Unknown (inconnu) : My USB flash drive has been stolen! (We do not know who stole it.)
2. Obvious (évident) : The thief was arrested. (Obviously by the police.)
3. Unimportant (sans importance) : The machines are repaired every week. (Who repairs them does not matter ; the result matters.)

We keep **by + agent** only when the agent adds real information : The interview was conducted by our best journalist.

LESAVAIS-TU ? The passive in technical and scientific English

The passive voice is the favourite structure of technical documents, manuals and news reports, because it sounds objective and focuses on facts and processes. In a workshop manual you will read : “The signal is transmitted by satellite. The antenna is connected to the receiver. The oil is changed every 5 000 km.” In Cameroon, CRTV news bulletins, radio programmes on CRTV National Station, and newspapers like Cameroon Tribune constantly use the passive : “A new transmitter was installed in Bamenda.” Mastering the passive will help you read technical manuals in your professional life.

EXEMPLE Describing a technical process with the passive (verbal & non-verbal)

How a radio programme reaches your phone or radio set :

1. The presenter’s voice is recorded in the studio. (verbal)
2. The sound is transformed into an electrical signal. (non-verbal signal)
3. The signal is transmitted by satellite or by antenna.

4. The signal is received by your radio or smartphone.

5. The programme is heard by thousands of listeners.

Notice : nobody mentions the technicians. In a process (un procédé), the steps matter more than the people.

EXERCICE RÉSOLU 2 From active to passive : a media example

Statement. Transform this sentence into the passive voice : “CRTV broadcasts 3 news bulletins daily.”

SOLUTION

Detailed solution.

1. Find the object : broadcasts what? → 3 news bulletins.
2. Put it first : 3 news bulletins ...
3. Conjugate be : the active verb broadcasts is present simple ; the new subject 3 news bulletins is plural → are.
4. Add the past participle : broadcast → broadcast (irregular verb). The agent CRTV is meaningful, so we keep it with by.

Answer : 3 news bulletins are broadcast daily by CRTV.

EXERCICE RÉSOLU 3 From passive to active : a workshop example

Statement. Put this sentence back into the active voice : “The broken antenna was repaired by the technician yesterday.”

SOLUTION

Detailed solution.

1. The agent after by is the technician : it becomes the subject of the active sentence.
2. The passive structure is was repaired = past simple passive. So the active verb is at the past simple : repaired.
3. The passive subject the broken antenna becomes the object.

Answer : The technician repaired the broken antenna yesterday.

2.5 Media Vocabulary : Key Terms (Verbal & Non-Verbal)

À RETENIR Essential vocabulary for this unit

English Term	Definition / Context	French
Broadcast (v/n)	To send out programmes on TV/radio	Diffuser / Diffusion
Transmit (v)	To send signals (radio, TV, data)	Transmettre
Signal (n)	Electrical / electromagnetic wave carrying info	Signal
Transmitter (n)	Equipment that sends out signals	Émetteur
Receiver (n)	Device that picks up signals (radio, phone)	Récepteur
Antenna / Aerial (n)	Metal structure for sending/receiving waves	Antenne
News bulletin (n)	Short news programme	Journal parlé / Flash info
Report / Coverage (n)	Detailed account of an event	Reportage / Couverture
Editor (n)	Person responsible for content	Rédacteur en chef
Technician (n)	Skilled worker maintaining equipment	Technicien
Generator (n)	Machine producing electricity	Groupe électrogène
Flash drive / USB key (n)	Portable storage device	Clé USB
Workshop (n)	Place for repair / practical work	Atelier

2.6 Practice : Transforming Sentences

EXERCICE 4 Active → passive : media and workshop

Put the following sentences into the passive voice. Keep the agent only if it is useful.

1. The journalist writes the article every morning.
2. The students recorded the interview yesterday.
3. The station will broadcast the football match on Saturday.
4. The engineer has installed the new transmitter.
5. The technicians are repairing the generator.
6. You must check the antenna connection.
7. The camera operator is filming the scene.

CORRIGÉ Exercise : Active → passive

1. The article is written by the journalist every morning. (present simple, singular → is)
2. The interview was recorded by the students yesterday. (past simple → was)
3. The football match will be broadcast on Saturday. (the agent is unimportant, we omit it)
4. The new transmitter has been installed by the engineer. (present perfect → has been)
5. The generator is being repaired by the technicians. (present continuous → is being)
6. The antenna connection must be checked. (modal must → must be + V-pp)
7. The scene is being filmed. (present continuous, agent obvious/unimportant)

EXERCICE 5 Passive → active

Put the following sentences into the active voice.

1. The news is read by the presenter at 7 p.m.
2. The machines were cleaned by the apprentices.
3. A new radio programme has been created by the young journalists.
4. The signal can be received by any smartphone.
5. The oil should be changed every 5 000 km.

CORRIGÉ Exercise : Passive → active

1. The presenter reads the news at 7 p.m.
2. The apprentices cleaned the machines.
3. The young journalists have created a new radio programme.
4. Any smartphone can receive the signal.
5. You / The technician should change the oil every 5 000 km.

À RETENIR What you must remember

- Active : Subject + Verb + Object — the subject does the action.

- Passive : Object + be (tense) + past participle (+ by + agent) — the subject receives the action.
- Only transitive verbs can become passive.
- Only be changes with the tense ; the past participle never changes.
- Use the passive when the agent is unknown, obvious or unimportant — very common in news and technical descriptions : The signal is transmitted by satellite. The generator must be repaired.

You can now describe what the media and the machines do, but also what is done to them. In the next section, Listening & Vocabulary : New Information and Communication Technologies, you will hear texts about the www, MP3 players, USB flash drives, WhatsApp and Viber — and you will notice how often the passive voice appears when people describe these technologies.

3 LISTENING & VOCABULARY : NEW INFORMATION AND COMMUNICATION TECHNOLOGIES

In the previous section, you learned how to change a sentence from the **active voice** to the **passive voice** : “Millions of Cameroonians use WhatsApp” becomes “WhatsApp is used by millions of Cameroonians.” Notice something interesting in that passive sentence : it tells us about a **use**, a **function**. In this section, we go further. We will learn the vocabulary of the **New Information and Communication Technologies** (ICTs), train our ears to understand spoken texts about them, and master two very useful grammar structures : used for + verb-ing and used with + noun.

3.1 What Are ICTs?

DÉFINITION ICT — Information and Communication Technologies

ICTs are technologies used to create, store, exchange and use information in digital form. They include the Internet (www), computers, smartphones, and all the tools and applications we use to communicate : e-mail, WhatsApp, Viber, MP3 players, USB drives, etc.

Think of your daily life in Yaoundé, Douala, Bamenda or Bafoussam. In the morning, you check your **smartphone** for messages. At school, the computer teacher shows you a **website**. In the evening, you **download** music or **chat** with friends. All these actions belong to the world of ICTs. They are not luxury objects anymore : they are tools for learning, working and communicating.

LESAVAIS-TU ? ICTs in Cameroon

Cameroon has more than 10 million mobile Internet subscribers, mainly through the operators MTN and Orange. Mobile money services (MTN Mobile Money, Orange Money) allow people to send and receive money without a bank account. For many young Cameroonians, the smartphone is the first — and sometimes the only — computer they use.

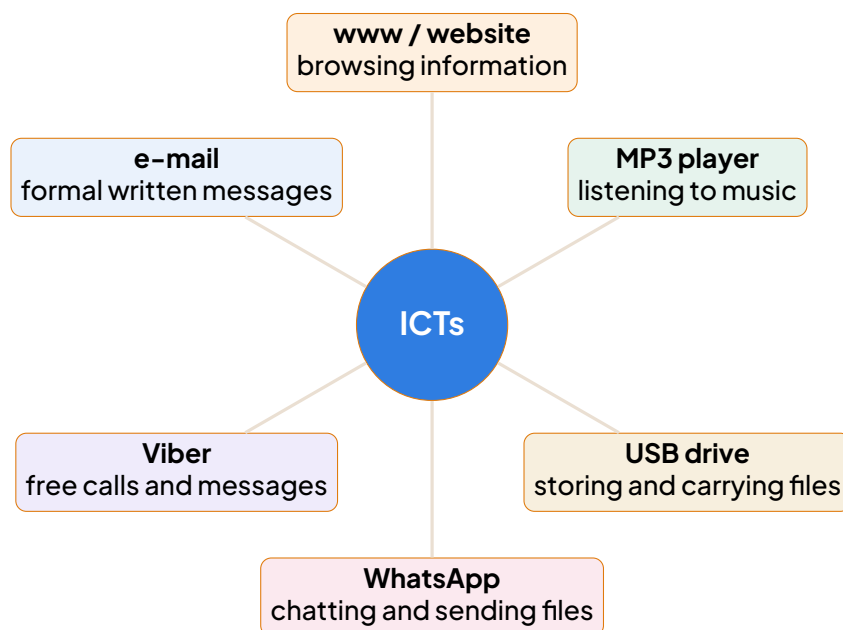

3.2 Vocabulary Building : The Language of ICTs

Here is the essential vocabulary for this lesson. Read each word aloud, then learn it with its French meaning. Pay attention to the pronunciation hints in brackets.

English word	Meaning / example	French
www (World Wide Web)	the system of linked pages on the Internet	la toile mondiale
website	a place on the Internet with pages of information	site web
MP3 player	a small device that plays music files	lecteur MP3
USB flash drive / pen drive	a small device used to store and carry files	clé USB
smartphone	a mobile phone with Internet and applications	téléphone intelligent
e-mail	an electronic message sent through the Internet	courriel
WhatsApp	a free messaging application for text, voice and video	WhatsApp
Viber	an application for free calls and messages	Viber
download	to copy a file from the Internet to your device	télécharger (vers soi)
upload	to send a file from your device to the Internet	téléverser, envoyer
browse	to look at pages on the Internet	naviguer, surfer
chat	to exchange written messages in real time	clavarder, discuter

ATTENTION Download or upload ?

Students often confuse these two words. Remember the direction of the arrow : download = the file comes down to your phone ; upload = the file goes up from your phone to the Internet. You download a song ; you upload a photo to WhatsApp status.

The ICT galaxy : six common tools and their main functions. Each tool answers the question : What is it used for?

3.3 Pronunciation Corner : Key ICT Words

Word	Phonetics (approx.)	Tip
website	/ˈweb.saɪt/	two syllables : web-site
smartphone	/ˈsmɜːt.fəʊn/	stress on smart
download	/ˈdaʊnleɪd/	stress on load
upload	/ˈʊpleɪd/	stress on load
browse	/braʊz/	rhymes with house
chat	/tæt/	like cat with ch
USB	/ˈjuː.es.bi/	spell the letters : U-S-B
MP3	/ˈem.pi.θri/	say : M-P-three

3.4 Listening Skills : How to Understand a Spoken Text

Listening is often the most difficult skill for students. The good news : you do not need to understand every word. You need a **strategy**.

MÉTHODE Three steps to succeed in a listening task

1. Before listening : read the questions carefully. They tell you what to listen for. Anticipate : if the question is “How much does the bundle cost?”, listen for numbers and prices. Underline key words in the questions.
2. First listening : do not write full sentences. Just catch the **key words** (names, numbers, places, actions) and take short notes. Use abbreviations : MB, GB, FCFA, WhatsApp, USB.
3. Second listening : check your answers, complete your notes, and verify the details you missed. Focus on the specific information required by each question.

Listening text 1 (teacher reads aloud) : Buying an Internet bundle.

“Hello, I want to buy an Internet bundle for my smartphone. — Welcome! We have a daily bundle at 200 FCFA for 100 MB, and a monthly bundle at 5 000 FCFA for 2 GB. — I chat on WhatsApp and I browse websites every day, so I will take the monthly bundle, please. — Good choice. Dial star-one-five-zero and follow the instructions.”

Listening text 2 : Sending files by WhatsApp.

“Manka : Did you receive the photos of the workshop? — Ali : No, not yet. — Manka : I uploaded them on WhatsApp ten minutes ago. Check your connection. — Ali : Ah yes! I am downloading them now. The files are heavy, almost 15 MB. — Manka : Next time, I will copy them on your USB flash drive. It is faster!”

EXERCICE RÉSOLU 4

Listening comprehension — check your strategy

Questions (read before listening) : 1) How much does the monthly bundle cost ? 2) Which two activities does the customer do every day ? 3) Why does Manka prefer a USB flash drive next time ?

SOLUTION

Solution : 1) The monthly bundle costs 5 000 FCFA for 2 GB (key word : a number + FCFA). 2) The customer chats on WhatsApp and browses websites every day (key words : chat, browse). 3) Because the USB flash drive is faster than downloading heavy files (15 MB) on WhatsApp. Notice how reading the questions first told us exactly which details to catch.

3.5 Grammar Focus : used for + verb-ing, used in + verb-ing and used with + noun

Look at these two sentences from the listening texts :

- A USB flash drive **is used for** storing files.
- WhatsApp **is used with** a smartphone.

Both sentences describe the **function** or the **use** of an object. But they answer two different questions :

PROPRIÉTÉ Expressing function, field of use and compatibility

- **used for + verb-ing** answers the question “What is it used for?” — it expresses the function of the object.
Structure : subject + be + used for + V-ing.
Example : An MP3 player is used for listening to music.
- **used in + verb-ing** expresses the field or activity where the object is used.
Structure : subject + be + used in + V-ing.
Example : Smartphones are used in teaching and learning.
- **used with + noun** answers the question “What is it used with?” — it expresses compatibility, the tool that goes together with it.
Structure : subject + be + used with + noun.
Example : This application is used with a smartphone.

EXEMPLE A concrete example with numbers

A 32 GB pen drive is used for storing about 8 000 songs in MP3 format.
Here, is used for storing gives the function (storing), and the number 8 000 makes the information precise and realistic. When you describe a gadget at the Probatoire or the Bac, always give its function with used for + V-ing.

ATTENTION Do not confuse three different structures !

The most frequent error is to mix these structures :

- I used to play football. = past habit, finished now (used to + infinitive).
- A pen drive is used for storing files. = function (be used for + V-ing).
- I am used to using a smartphone. = I am accustomed to it (be used to + V-ing).

At the exam, ask yourself : function, past habit, or habit now ? Then choose the correct structure.

3.6 Classifying Activity : Match Each Gadget to Its Function**EXERCICE 6** Match and build sentences

Match each gadget (1–6) to its function (a–f), then write one full sentence with used for + V-ing and one with used with + noun for two gadgets of your choice.

- | | |
|--------------------|-----------------------------------|
| 1. USB flash drive | a. making free voice calls |
| 2. MP3 player | b. sending formal messages |
| 3. Viber | c. storing and carrying documents |
| 4. e-mail | d. listening to music |
| 5. smartphone | e. browsing websites |
| 6. WhatsApp | f. chatting and sharing photos |

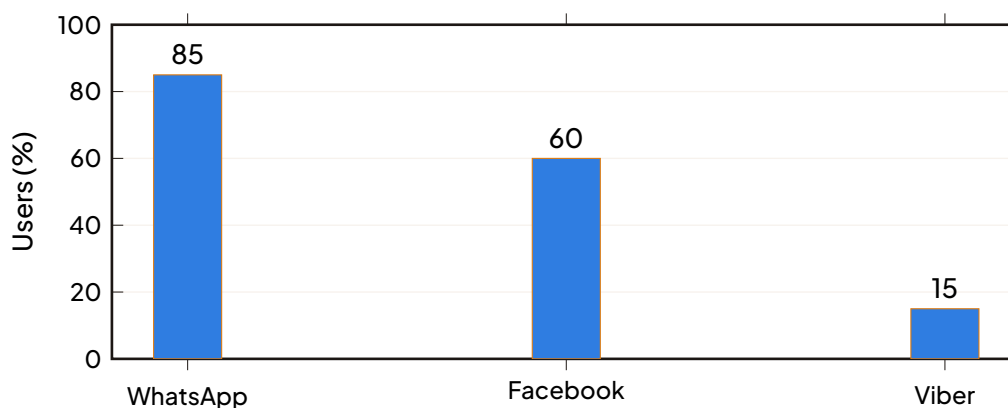

CORRIGÉ Classifying activity

Matching : 1-c, 2-d, 3-a, 4-b, 5-e, 6-f.

Example sentences : A USB flash drive is used for storing and carrying documents. It is used with a computer. WhatsApp is used for chatting and sharing photos. It is used with a smartphone.

3.7 Statistics : Messaging Applications among Young Cameroonians

Numbers help us speak about ICTs with precision. The bar chart below shows a realistic estimate of the use of messaging and social media applications by young Cameroonians.

Estimated use of messaging applications among young Cameroonians (fictitious but realistic data) : WhatsApp 85 %, Facebook 60 %, Viber 15 %. WhatsApp is clearly the dominant application.

Read the chart in full sentences : “WhatsApp is used by about 85 % of young Cameroonians, while Viber is used by only 15 %.” Notice how the passive voice, learned in the previous section, comes back naturally here.

3.8 Speaking Practice : Mini-Dialogue about ICTs

In pairs, practise this dialogue. Then replace the underlined parts with other gadgets or applications from the vocabulary list.

Dialogue : Choosing a gadget

A : What is that smartphone used for?

B : It is used for browsing the Internet and chatting on WhatsApp.

A : And what is it used with?

B : It is used with a 4G SIM card and a charger.

A : Is it used in education?

B : Yes, smartphones are used in learning and research.

3.9 Discussion : Responsible Use of Social Media

ICTs are powerful tools, but they also carry risks. In pairs, discuss these questions in English, using the vocabulary of the lesson :

- **Fake news** : Before you share a photo or a message on WhatsApp, what should you check? Possible answer : "Before sharing, I check the source and I look for the information on a serious website."
- **Cybercrime** : What dangers exist on the Internet? Possible answer : "Some people steal passwords and money. We must never share our passwords or our Mobile Money codes."
- **Time management** : How many hours per day do you chat or browse? Is it good for your studies?
- **Data protection** : Why should you not upload personal photos on public websites?

À RETENIR What you must remember

- ICTs are technologies used to create, store, exchange and use information in digital form.
- Key vocabulary : www, website, MP3 player, USB flash/pen drive, WhatsApp, Viber, e-mail, smartphone, download, upload, browse, chat.
- Listening strategy : read the questions first, catch key words, verify at the second listening.
- used for + V-ing = function (What is it used for?); used in + V-ing = field of use (Where is it used?); used with + noun = compatibility (What is it used with?).
- Never confuse used to + infinitive (past habit) with be used for + V-ing (function) or be used to + V-ing (being accustomed).

EXERCICE 7 Consolidation — complete the sentences

Complete with used for, used in, used with or used to :

1. A smartphone is ... browsing the Internet and chatting.
2. This application is ... a computer or a tablet.
3. When I was a child, I ... listen to the radio every evening.
4. An MP3 player is ... playing music.
5. E-mail is ... sending formal messages to teachers and employers.
6. Computers are ... education and research in modern schools.

CORRIGÉ Consolidation

1) used for (function) ; 2) used with (compatibility) ; 3) used to (past habit, followed by the infinitive listen) ; 4) used for (function) ; 5) used for (function) ; 6) used in (field of use).

You can now understand spoken texts about ICTs, name the main gadgets and applications, and describe their functions with precision. In the next section, Reading : Visiting a Workshop, you will discover how these technologies are used and maintained in a real professional environment.

4 READING : VISITING A WORKSHOP

In the previous section, you listened to texts about the new Information and Communication Technologies : smartphones, USB flash drives, WhatsApp, Viber. But what happens when these gadgets break down? They are taken to a **workshop**. In this section, you will read a text about a visit to a phone and computer repair workshop in Douala, learn the vocabulary of tools and machines, and practise expressing your **preferences**.

4.1 Key Vocabulary : The Workshop

DÉFINITION Workshop

A **workshop** (un atelier) is a room or building where machines are used, repaired or maintained. In a technical school, each speciality has its own workshop : a metalwork workshop, an electrical workshop, a computer workshop.

Word	French gloss	Example in context
workshop	atelier	The students visited the repair workshop.
machine	machine	The machine cuts the metal sheets.
gadget	gadget, appareil	A smartphone is a useful gadget.
tool	outil	The technician uses small screwdrivers and other tools.
spare part	pièce de rechange	We ordered new spare parts for the printer.
maintenance	entretien, maintenance	Regular maintenance prevents breakdowns.
repair	réparation ; réparer	The repair of the screen costs 15000 FCFA.
to handle	manipuler, manier	Handle the motherboard with care.
to operate	faire fonctionner	Only trained students may operate this machine.
safety rules	règles de sécurité	Always follow the safety rules in the workshop.

ATTENTION Handle with care !

Do not confuse **to handle** (to touch and use something carefully, manipuler) and **to operate** (to make a machine work, faire fonctionner). You handle a fragile screen ; you operate a drilling machine.

4.2 How to Read Efficiently : Skimming and Scanning

MÉTHODE Two steps to understand a text

1. Skimming (lecture rapide) : read the title, the first and the last sentences of each paragraph quickly. Goal : find the **general idea**. Do not stop on unknown words.
2. Scanning (lecture ciblée) : read again, looking for **precise details** : names, dates, numbers, places. Use the questions (who? where? when?) to guide your eyes.

4.3 Reading Text : A Visit to a Repair Workshop in Douala

Read the text first with skimming. What is it about ?

EXEMPLE Text : “Our Visit to Fix-It Workshop”

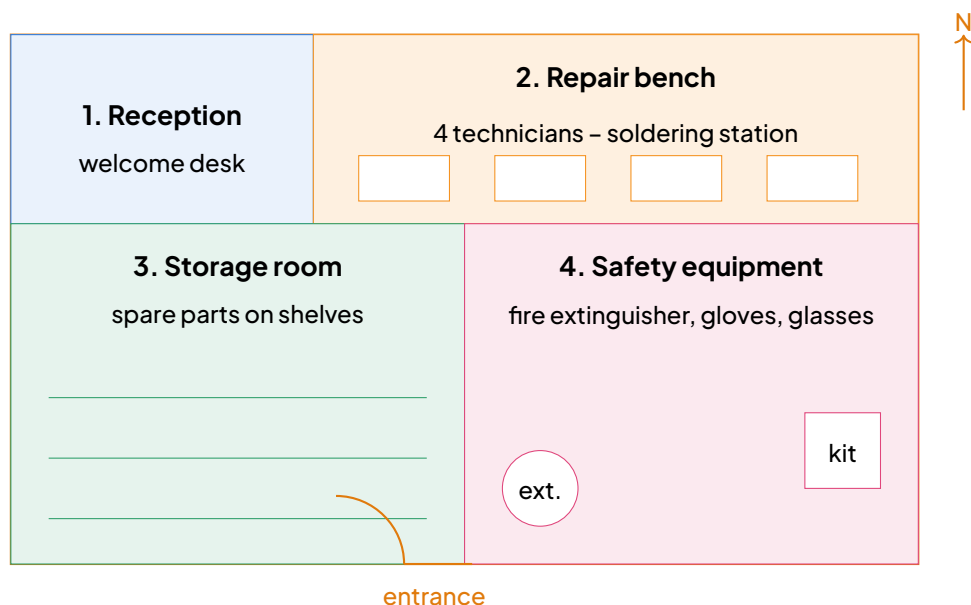

Last Tuesday, the students of Première Technique of Lycée Technique de Douala visited “Fix-It Workshop”, a phone and computer repair workshop near Deïdo market. The visit started at 9 a.m. and finished at noon.

At the reception, the manager, Mr Etoundi, welcomed the group and presented the safety rules : do not touch the machines without permission, wear protective glasses near the soldering station, and keep the floor clear of cables.

Then the students moved to the repair bench, where four technicians were working. In this workshop, 15 phones are repaired every day. Screens are replaced more often than batteries, because many customers drop their phones. One technician showed the students how to handle a motherboard with antistatic gloves. Another one explained how he uses a multimeter to test the circuits.

Next, the group entered the storage room. Hundreds of spare parts were arranged on shelves : screens, batteries, chargers, keyboards and USB connectors. “Good maintenance and original spare parts are the secret of a long-lasting repair,” said Mr Etoundi.

Before leaving, the students asked questions. Many of them said they preferred practical work in the workshop to theory in the classroom. The visit ended with a group photo in front of the workshop.

Sketch map of “Fix-It Workshop” (not to scale). 1 : Reception. 2 : Repair bench with four work stations. 3 : Storage room for spare parts. 4 : Safety equipment corner. The entrance is at the bottom.

4.4 Comprehension : Finding the Information

MÉTHODE The WH-grid

To check your understanding, complete the grid by scanning the text :

- Who? – the people in the text.
- Where? – the places.
- When? – the time, the date.
- What? – the actions and events.
- How? – the way things are done.

EXERCICE RÉSOLU 5 Comprehension grid

Complete the WH-grid for the text “Our Visit to Fix-It Workshop”.

SOLUTION

- Who? The students of Première Technique, their teachers, Mr Etoundi (the manager) and four technicians.
- Where? At “Fix-It Workshop”, near Deïdo market, in Douala.
- When? Last Tuesday, from 9 a.m. to noon.
- What? The students visited the reception, the repair bench and the storage room; they watched repairs and asked questions.
- How? The technicians handle motherboards with antistatic gloves and test circuits with a multimeter.

EXERCICE 8 True or False?

Read the text again and write True or False. Justify with a sentence from the text.

1. The workshop is in Yaoundé.
2. The visit lasted three hours.
3. Batteries are replaced more often than screens.
4. The students saw the storage room.
5. The students preferred theory to practical work.

CORRIGÉ Exercice : True or False ?

1. False. The workshop is near Deïdo market, in Douala.
2. True. It started at 9 a.m. and finished at noon (three hours).
3. False. Screens are replaced more often than batteries.
4. True. "Next, the group entered the storage room."
5. False. They preferred practical work in the workshop to theory in the classroom.

EXERCICE 9 Find the equivalents

Find in the text words or expressions that mean :

1. the person who manages the workshop (paragraph 2) ;
2. pieces used to replace broken parts (paragraph 4) ;
3. an instrument to measure electrical values (paragraph 3) ;
4. to stay for a long time without breaking (paragraph 4).

CORRIGÉ Exercice : Find the equivalents

1. the manager (Mr Etoundi) ;
2. spare parts ;
3. a multimeter ;
4. long-lasting.

4.5 Grammar Focus : Expressing Preferences

Imagine : your teacher offers you two tasks – soldering a circuit or writing a report. You answer : "I prefer soldering." You are expressing a **preference** : a choice between two things.

PROPRIÉTÉ Structures of preference

prefer and **would rather** express a choice :

- prefer + noun : I prefer practical work.
- prefer + V-ing : I prefer repairing phones.

- prefer X to Y : I prefer practical work to theory. (X and Y must be parallel : two nouns or two V-ing.)
- would rather + base verb (without to) : I would rather work in the workshop than sit in the classroom.
- like X better than Y : I like laptops better than desktops.

EXEMPLE In the workshop

- I prefer using a laptop to a desktop.
- She prefers repairing screens. / She prefers to repair screens.
- We would rather learn maintenance than watch a video.
- They like the multimeter better than the oscilloscope.

ATTENTION Common error : “prefer X to Y”

Both “I prefer to repair” and “I prefer repairing” are correct. But with prefer X to Y, the two elements must be parallel : two nouns or two V-ing forms.

- Correct : I prefer repairing to writing. / I prefer laptops to desktops.
- Wrong : I prefer repairing to write. Wrong : I prefer to repairing.
- Wrong : I would rather to work. → I would rather work.

EXERCICE RÉSOLU 6 Express your preference

Complete with the correct form of the verb in brackets.

1. I prefer (use) ... a laptop to a desktop.
2. The technician would rather (replace) ... the battery than (buy) ... a new phone.
3. My classmates prefer (practise) ... in the workshop to (study) ... theory.

SOLUTION

1. I prefer using a laptop to a desktop. (prefer V-ing to V-ing)
2. The technician would rather replace the battery than buy a new phone. (base verb, without to)

3. My classmates prefer practising in the workshop to studying theory. (two V-ing forms, parallel)

4.6 Tools and Their Functions : “Used for ...”

Remember the structure from the listening section : **used for + V-ing** describes the function of a tool.

Tool	Function (used for...)	French gloss
screwdriver	used for tightening and loosening screws	tournevis
soldering iron	used for joining electronic components	fer à souder
multimeter	used for measuring voltage and testing circuits	multimètre
pliers	used for holding and cutting wires	pince
antistatic gloves	used for handling sensitive components safely	gants antistatiques

4.7 Link with Your Speciality

Every technical speciality has its own workshop and machines. Describe them using the vocabulary of this lesson and the preference structures.

EXERCICE 10 Your workshop, your preferences

Answer in full sentences.

1. Name two machines or gadgets in the workshop of your speciality. What are they used for?
2. Which machine do you prefer operating? Why? (Use prefer or would rather.)
3. Write three sentences comparing two tools of your speciality, using prefer X to Y, would rather and like ... better than.

CORRIGÉ Exercice : Your workshop, your preferences (sample answers)

1. In my workshop there is a drilling machine and a grinder. The drilling machine is used for making holes; the grinder is used for smoothing metal parts.
2. I prefer operating the drilling machine because it is precise and safe when you follow

the safety rules.

3. I prefer the grinder to the file because it is faster. / I would rather use the multimeter than guess the voltage. / I like practical exercises better than long explanations.

À RETENIR What to remember

- A **workshop** is a room or building where machines are used, repaired or maintained.
- Read in two steps : **skimming** for the general idea, **scanning** for precise details (who, where, when, what, how).
- Preferences : prefer + noun/V-ing, prefer X to Y (parallel forms), would rather + base verb (no to), like X better than Y.
- Functions of tools : used for + V-ing.

In the next section, you will study punctuation and WH-/How questions, so that you can write a full report about your own workshop visit.

5 GRAMMAR FOCUS 2 : PUNCTUATION, WH- AND HOW QUESTIONS

In the previous section, we read a report about visiting a workshop in Douala. When the students interviewed the technician, they had to ask many questions : “What is this machine used for?”, “How often do you maintain it?”. They also had to write their report with correct punctuation. Asking good questions and punctuating correctly are two essential skills — for a journalist at CRTV, for a technician writing a maintenance report, and for you at the Probatoire and Baccalauréat technique. This section gives you all the tools.

5.1 English Punctuation : A Complete Review

DÉFINITION Punctuation

Punctuation (la ponctuation) is the set of marks used in writing to separate sentences and their elements, and to clarify meaning. A wrongly placed mark can completely change the meaning of a sentence.

Look at these two sentences :

- Let’s eat, grandfather! (We invite grandfather to eat.)

- Let's eat grandfather! (We want to eat grandfather!)

Only one comma, but a very different meaning! Punctuation saves lives — and marks at the exam.

Mark	English name	Example
.	full stop (point)	The technician repairs phones.
,	comma (virgule)	We saw lathes, drills, and presses.
;	semicolon (point-virgule)	The workshop is noisy; however, it is well organised.
?	question mark (point d'interrogation)	Where does he work?
!	exclamation mark (point d'exclamation)	What a huge workshop!
'	apostrophe (apostrophe)	It's the manager's office.
:	colon (deux-points)	Bring these tools : a hammer, a screwdriver and pliers.
" "	quotation marks (guillemets)	The boss said, "Safety first."
A	capital letter (majuscule)	On Monday, Ali speaks English.

The main English punctuation marks, their names and one example for each.

À RETENIR

Capital letters in English : the differences with French

English uses capital letters (majuscules) in more situations than French. Always write a capital letter for :

- the pronoun **I** : My friend and I visited the workshop. (never i)
- **nationalities** and **languages** : English, French, Cameroonian, Nigerian (anglais, camerounais — no capital in French, but obligatory in English!)
- **days** and **months** : Monday, Tuesday, January, February (but seasons stay small : rainy season)
- the first word of a sentence and proper nouns : CRTV, Mount Cameroon, Yaoundé.

LESAVAIS-TU ?

Punctuation spacing : English vs French

In French, you put a space before double punctuation marks (? ! : ;) and inside guillemets « ... ». In English, no space before these marks, and quotation marks hug the text : "Safety first." not " Safety first . ". This is a frequent error in exams.

ATTENTION The apostrophe : two different jobs

Do not confuse the two uses of the apostrophe :

1. **Contraction** : it's = it is ; don't = do not ; I'm = I am.
2. **Possession** : the technician's tools (the tools of the technician) ; students' reports (the reports of the students — apostrophe after the plural s).

Trap : its (possessive adjective, no apostrophe) ≠ it's (it is). The machine has lost its power. It's broken.

5.2 WH-Questions : Asking for Information

Imagine the situation : you are in the workshop and you want information. A yes/no question (Do you like your job?) gives you only "yes" or "no". To get real information — a name, a place, a time, a reason — you need a WH-question.

DÉFINITION WH-question

A **WH-question** (question partielle) is a question introduced by an interrogative word (What, Where, When, Who, Why, Which, Whose, How) that cannot be answered by yes or no. It asks for a specific piece of information.

Question word	Asks about...	Example
What	a thing, an action	What is this machine used for?
Where	a place (lieu)	Where do you work?
When	time (temps)	When did you start this job?
Who	a person	Who repairs the computers?
Why	a reason (raison)	Why do you wear gloves?
Which	a choice between things	Which tool is the most useful?
Whose	possession (possession)	Whose helmet is this?

MÉTHODE Building a WH-question

Follow these steps, in this order :

1. Choose the correct question word (What, Where, When...).
2. Add the auxiliary : do / does / did, or be, or a modal (can, must...).
3. Add the subject.
4. Add the base verb (base verbale, without -s, without -ed).

Formula : Question word + auxiliary + subject + base verb (+ complement)?

Example : Where + does + he + work? — When + did + they + visit + the workshop?

ATTENTION The most frequent error : the “s” of the 3rd person

After does, the main verb takes the base form : the -s disappears because does already carries it.

- Correct : Where does he work?
- Wrong : Where does he works?

Same rule with did : What did you see? (not saw). The past is already inside did.

5.3 How Questions : Quantity, Frequency, Distance, Duration

How combines with adjectives or adverbs to ask precise questions :

Expression	Asks about...	Example
How	manner, state (manière)	How does this machine work?
How many	countable quantity (dénombrable)	How many tools do you have?
How much	uncountable quantity (indénombrable)	How much does it cost?
How often	frequency (fréquence)	How often do you listen to the radio?
How long	duration (durée)	How long does the repair take?
How far	distance	How far is the workshop from school?
How old	age	How old is this generator?

ATTENTION How much vs How many

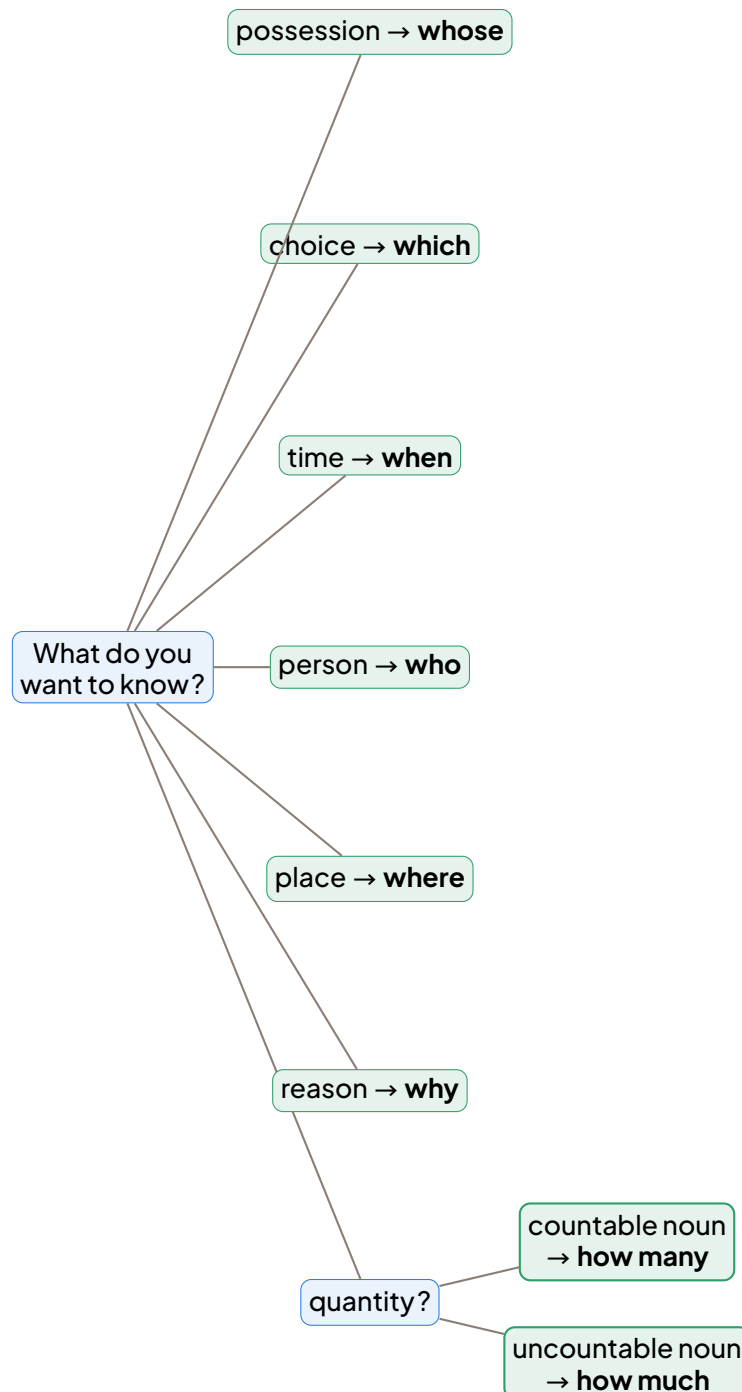

This is a classic exam trap :

- **How many** + countable noun (plural) : How many phones, tools, channels, students...?
- **How much** + uncountable noun : How much money, information, time, oil...?

Information and money are uncountable in English : never informations, never how many money.

EXEMPLE A journalist's questions

- How many channels does CRTL broadcast? — It broadcasts several national and regional programmes.
- How often do you listen to the radio? — Every morning before work.
- How long have you worked at CRTL? — For ten years.

Decision tree : choosing the correct question word. First identify what you want to know (person, place, reason, time, choice, possession, quantity), then apply the rule — for quantities, check if the noun is countable or uncountable.

5.4 Subject Questions vs Object Questions

Compare these two sentences carefully :

- Who repaired the phone? — **The technician** repaired it. (We ask about the **subject**.)
- Who did you call? — I called **the technician**. (We ask about the **object** — le complément.)

PROPRIÉTÉ Two structures for WH-questions

1. Question about the subject : Who/What replaces the subject. No auxiliary, no inversion ; the verb keeps its normal form (with -s in the present).
Who repairs the machines? — The engineer does.
What happened yesterday? — A machine broke down.
2. Question about the object or another element : use the normal structure with auxiliary.
Who did you call? — I called the engineer.
What does this machine produce? — It produces metal parts.

ATTENTION No “do” in a subject question

Wrong : Who does repair the phone ? Correct : Who repairs the phone ? When the question word is the subject, the auxiliary do/does/did is not used. Test : if the answer replaces the question word as subject (The technician repaired it), then it is a subject question.

EXERCICE RÉSOLU 7 Building questions for an interview

Énoncé — A student interviews a workshop technician. Write the question corresponding to each answer, using the underlined element.

1. The workshop opens at 7.30 a.m. (When...)
2. Mr Etoundi repairs the generators. (Who... — question about the subject)
3. She uses a screwdriver to open the phone. (What... — question about the object)
4. The workshop has fifteen machines. (How many...)

SOLUTION

Solution détaillée :

1. The underlined element is a time → When. Present simple, subject “the workshop” (3rd person) → does + base verb. When does the workshop open?
2. “Mr Etoundi” is the subject of “repairs” → subject question : no auxiliary, verb keeps the -s. Who repairs the generators?
3. “a screwdriver” is the object of “uses” → auxiliary does, base verb use. What does she use to open the phone?

4. “fifteen” is a countable quantity (machines) → How many + plural noun + does + subject + base verb. How many machines does the workshop have?

5.5 Application : Interviewing a Professional

Here is a model set of ten interview questions you could ask a workshop technician or a CRTV journalist. Notice the variety of question words and the correct structures.

EXEMPLE Ten interview questions

1. What is your job exactly?
2. Where do you work?
3. When did you start this career?
4. Why did you choose this profession?
5. How many people work in your team?
6. How much time do you spend on one repair?
7. How often do you maintain the machines?
8. How far is your workshop from your home?
9. Who trained you for this job? (subject question)
10. Which tool do you prefer, and why?

EXERCICE 11 Punctuation and capital letters

Rewrite these sentences with correct punctuation and capital letters.

1. the technician said safety first
2. i visited a workshop in douala on monday
3. what a modern workshop
4. bring these tools a hammer a drill and pliers
5. its the managers office

CORRIGÉ Exercice : Punctuation and capital letters

1. The technician said, "Safety first."
2. I visited a workshop in Douala on Monday.
3. What a modern workshop!
4. Bring these tools : a hammer, a drill and pliers.
5. It's the manager's office.

EXERCICE 12 Build the WH-question

Write the question that produced each answer. The underlined words give the answer.

1. The radio studio is in Yaoundé. (Where...)
2. Mrs Ngo Bell presents the news. (Who... — subject question)
3. He checks the machines twice a week. (How often...)
4. The repair costs 5 000 francs. (How much...)
5. They visited the workshop last Friday. (When...)

CORRIGÉ Exercice : Build the WH-question

1. Where is the radio studio?
2. Who presents the news? (subject question : no auxiliary, verb with -s)
3. How often does he check the machines?
4. How much does the repair cost?
5. When did they visit the workshop?

EXERCICE 13 Subject or object question?

Decide if the question asks about the subject or the object, then write the correct question for each answer.

1. The engineer designed the new circuit. (Who...?)
2. The technician called the engineer. (Who...?)
3. A power cut stopped the production. (What...?)
4. The manager checked the safety rules. (What...?)

CORRIGÉ Exercice : Subject or object question ?

1. Who designed the new circuit ? (subject question : The engineer is subject)
2. Who did the technician call ? (object question : the engineer is object)
3. What stopped the production ? (subject question : A power cut is subject)
4. What did the manager check ? (object question : the safety rules is object)

EXERCICE 14 Your turn : prepare an interview

Write ten questions to interview a CRTV journalist or a workshop technician in your town. Use at least : two How many/much questions, one How often, one How long, one subject question with Who, and one Why question. Check every auxiliary and every base verb.

CORRIGÉ Exercice : Your turn — elements of correction

Accept any grammatically correct set. Example of a correct production :

1. What does a journalist do every day ?
2. Where do you find your information ?
3. When did you join CRTV ?
4. Why do you like this job ?
5. Who writes the news bulletins ? (subject question)
6. How many reports do you prepare per week ?
7. How much time do you spend in the field ?
8. How often do you broadcast live ?
9. How long does an interview usually last ?
10. Which programme do you prefer ?

Check : base verb after does/did ; no auxiliary in the subject question ; how much with uncountable nouns only.

À RETENIR Summary : what you must remember

- Capital letters : I, nationalities, languages, days, months, sentence beginnings.

- WH-question = question word + auxiliary + subject + base verb ; it cannot be answered by yes/no.
- After does and did, the verb loses its -s and its -ed.
- How many = countable ; How much = uncountable.
- Subject question (Who repairs... ?) : no auxiliary, verb agrees with the unknown subject.
- Punctuation spacing : no space before ? ! ; ; in English (unlike French).

You are now ready for the final section : writing your own report about a workshop visit, with correctly punctuated sentences and well-built questions.

6 WRITING & INTEGRATION : REPORTING A WORKSHOP VISIT

In the previous sections, you learnt how to use **punctuation** correctly and how to ask **WH- and How questions**. Now it is time to use everything you have studied in this lesson — the passive voice, used for + verb-ing, preferences, media and workshop vocabulary, punctuation and questions — to do what real journalists and technicians do : **write a report**. In this final section, you will learn how to write a good composition about a workshop visit, how to check and correct your work, and how to succeed in the integration activities and the final evaluation.

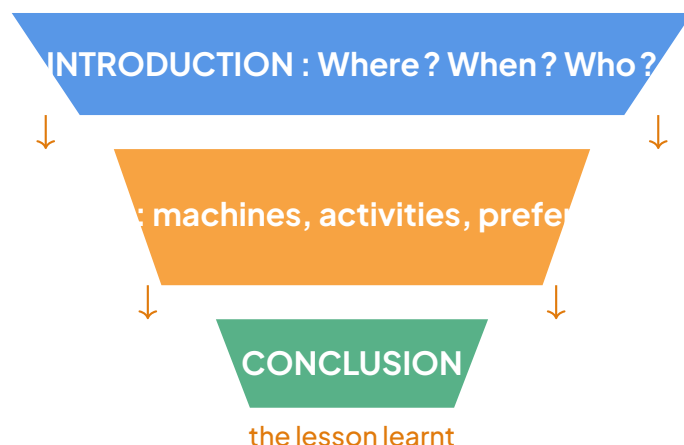

6.1 The Structure of a Composition

A good composition is like a good journey : it has a clear **beginning**, a rich **middle** and a satisfying **end**. Examiners at the Probatoire technique always look for these three parts.

DÉFINITION The three parts of a composition

A **composition** is a short organised text. It has three parts :

- Introduction : answers the questions Where ? When ? Who ? (e.g. Last Friday, our class visited a phone repair workshop in Douala.)
- Body : describes the machines seen, the activities observed and your preferences (e.g. I preferred the soldering station because...)
- Conclusion : states the lesson learnt (e.g. This visit taught me that machines must be maintained regularly.)

The funnel structure of a composition : from general information (introduction) to specific details (body) and finally to one clear idea (conclusion).

6.2 Using What You Have Learnt

Your composition will be excellent if you recycle the grammar and vocabulary of this lesson :

- **Passive voice** to describe processes : The phones are opened carefully. The screens are tested. Broken parts are replaced.
- **Used for + verb-ing** to describe functions : A multimeter is used for measuring voltage. A USB flash drive is used for storing data.
- **Used with + noun** to describe materials/tools : A soldering iron is used with tin. A computer is used with diagnostic software.
- **Preferences** : I prefer the radio studio to the repair bench. I like soldering more than cleaning.
- **Linking words (connectors)** to organise your ideas : first, then, after that, finally, moreover, however, in conclusion.
- **Correct punctuation** : capital letter at the beginning of every sentence, full stop at the end, commas between items in a list, question marks for questions.

MÉTHODE

How to write a composition : plan, draft, check, copy

1. Plan (brainstorming) : write down your ideas in note form — place, date, people, machines, activities, preferences, lesson learnt.
2. Draft : write your first version in three paragraphs (introduction, body, conclusion). Use linking words.
3. Check : read your draft again. Verify the grammar (passive voice, tenses, used

for/with), the punctuation (capital letters, full stops, commas) and the linking words.

4. Final copy : rewrite the corrected composition neatly.

ATTENTION Frequent errors to avoid

Many candidates lose easy marks because of :

- sentences without a final full stop ;
- sentences without a capital letter at the beginning ;
- forgetting the -ed of the past participle in the passive : the screen is replace instead of the screen is replaced ;
- mixing up used for + verb-ing and used with + noun : A soldering iron is used for soldering (function) but it is used with tin (material) ;
- writing used for measure instead of used for measuring ;
- forgetting the auxiliary be in the passive : the phones repaired instead of the phones are repaired.

6.3 A Guided Writing Task

EXEMPLE A typical exam topic

Write a 150-word composition about your visit to a phone repair workshop, saying what machines you saw and what they are used for.

Plan (step 1) : Introduction : last Tuesday / class of Première technique / Mballa workshop, Yaoundé. Body : soldering iron (used for joining wires), multimeter (used for measuring voltage), computer (used for diagnosing faults) ; I preferred the multimeter. Conclusion : machines must be handled carefully.

EXERCICE RÉSOLU 8 Model composition (about 150 words)

Write the composition from the plan above.

SOLUTION

Our Visit to a Phone Repair Workshop

Last Tuesday, the students of Première technique visited the Mballa phone repair workshop in Yaoundé. We were welcomed by the chief technician, Mr Ngo Bassa.

First, we were shown the soldering bench. A soldering iron is used for joining wires and small components. Then, we observed a multimeter : it is used for measuring voltage and testing batteries. After that, damaged phones were opened and their screens were tested on a computer, which is used for diagnosing faults. Moreover, spare parts are stored carefully in labelled boxes. I preferred the multimeter because it is precise and easy to handle ; however, some students liked the soldering iron more.

In conclusion, this visit taught us that machines and gadgets must be handled and maintained carefully. It was a very useful experience for our future jobs.

(about 150 words ; passive voice, “used for”, preferences, connectors and punctuation are all used.)

6.4 Peer Correction : The Evaluation Grid

After drafting, exchange your composition with a classmate and correct it with the grid below. This is called **peer correction**.

Criterion	What to check	Mark
Grammar	passive voice correct, tenses, used for + verb-ing, used with + noun, agreement	/10
Vocabulary	media and workshop words used correctly and varied	/5
Punctuation	capital letters, full stops, commas, question marks	/5
Total		/20

EXERCICE 15 Peer correction practice

Your partner wrote : “last friday we visit a workshop the phones is repaired by the technician a multimeter is used for measure voltage”. Find and correct six errors (punctuation, tense, passive, used for).

CORRIGÉ Peer correction practice

“Last Friday, we visited a workshop. The phones were repaired by the technician. A multimeter is used for measuring voltage.”

Errors corrected : (1) capital letter Last ; (2) capital letter Friday ; (3) past tense visited ; (4) passive plural were repaired ; (5) used for measuring (verb-ing) ; (6) missing full stops and comma added.

6.5 Integration Activities

DÉFINITION Integration activity

An **integration activity** is a complex task that combines several skills (listening, reading, speaking, writing) in a real-life situation. It shows that you can use English, not only know it.

Complex task : “The Young Reporter” . Work in groups of four.

1. **Listening** : listen to a short text about a student who uses WhatsApp and a USB flash drive to prepare a report. Answer five WH-questions.
2. **Reading** : read a short article about a visit to a radio station workshop. Underline the passive sentences and the machines mentioned.
3. **Speaking** : interview the “technician” (a classmate) with WH- and How questions : What is this machine used for? How is it maintained?
4. **Writing** : individually, write a 150-word composition reporting the visit, following the plan-draft-check-copy method.

6.6 Evaluation and Remediation

EXERCICE 16 Summative test (end of lesson)

A. Grammar (/6) : Put the verbs into the passive voice : (1) The technician (repair) the radio every week. (2) The data (store) on a USB flash drive. (3) Complete : A printer is used for ... (print).

B. Vocabulary (/4) : Match : broadcast, headline, soldering iron, pen drive with their definitions.

C. Reading (/4) : Read a short text about visiting a workshop and answer two WH-questions and two True/False questions.

D. Writing (/6) : Write a 100-word paragraph about your favourite media or machine, using at least one passive sentence and one preference.

CORRIGÉ Summative test — extracts

A. (1) The radio is repaired by the technician every week. (2) The data is stored on a USB flash drive. (3) A printer is used for printing.

B. broadcast = send out programmes ; headline = main title ; soldering iron = tool for joining metal ; pen drive = portable storage device.

D. Example : I prefer the radio to television. News is broadcast every hour, and songs are played between the programmes. I like listening while I work.

Remediation activities (for students who need support) :

- **Grammar support** : rewrite five active sentences in the passive voice with the teacher's help, then alone.
- **Punctuation support** : copy a short paragraph and add all the missing capital letters and full stops.
- **Vocabulary support** : label pictures of ten machines and gadgets, then write one sentence with used for for each.
- **Writing support** : complete a guided composition with gaps (linking words and verbs given in brackets).

LESAVAIS-TU ?**Writing counts at the Probatoire technique !**

At the Probatoire and Baccalauréat technique in Cameroon, written expression represents an important part of the English paper. Punctuation and grammar are explicitly marked : a composition with good ideas but no full stops and no capital letters can lose many points. Training with the plan–draft–check–copy method is the best way to succeed !

À RETENIR**Key points of the section**

- A composition has three parts : introduction (where/when/who), body (machines, activities, preferences), conclusion (lesson learnt).
- Recycle the lesson's tools : passive voice, used for + verb-ing, used with + noun, preferences, linking words (first, then, after that, finally, moreover, however, in conclusion).
- Follow the method : plan → draft → check → final copy.
- Every sentence begins with a capital letter and ends with a full stop.
- An integration activity combines listening, reading, speaking and writing in a real-life task.

7 ACTIVITÉ D'INTÉGRATION

8 MEDIA AND COMMUNICATION

8.1 Activity Objectives

By the end of this integration activity, you will be able to :

- exchange information about the media and new technologies in an authentic situation (**speaking**);
- prepare and ask **WH-** and **How questions** during an interview;
- write a short radio report using the **passive voice**, used for + verb-ing and used with + noun, an expression of **preference**, and correct **punctuation**;
- present the report orally, as on the radio;
- evaluate the work of other groups with a grid and correct your own mistakes (**remediation**).

À RETENIR Competences integrated

Speaking + Listening + Grammar (passive voice, used for, preferences, WH-questions) + Writing. All the skills of the lesson are used in one real-life task : producing a radio report.

8.2 Situation

Radio Balafon needs you !

Radio Balafon, a community radio station in Douala, broadcasts a weekly programme for young people called "Youth and Jobs". This week, the journalists want to show how technical schools prepare students for real jobs. Your class has been chosen : you are the **reporters** (les reporters)!

Yesterday, your team visited the **maintenance workshop** (l'atelier de maintenance) of your technical high school, where Mr. Essono, the workshop manager (le chef d'atelier), repairs computers, phones and printers for the school and the neighbourhood.

Here is the data your team collected during the visit :

Item	Data collected
Machines in the workshop	3 soldering stations, 2 diagnostic computers, 1 ultrasonic cleaner, 1 drilling machine
Devices repaired per week	35 mobile phones, 12 laptops, 8 printers
Most frequent phone problems	broken screens (40 %), battery problems (25 %), charging ports (20 %), software problems (15 %)
Tools used	screwdrivers, multimeter, soldering iron, USB flash drives with repair software
Workers	4 technicians and 6 students on internship (stagiaires)
Working hours	Monday to Saturday, 8 a.m. to 5 p.m.

Mr. Essono also told you : “The multimeter is used for testing electric circuits. The soldering iron is used with tin wire. I prefer repairing laptops because the work is cleaner and better paid.”

Your mission : produce a **150-word radio report** about this visit, ready to be broadcast on Radio Balafon.

8.3 Instructions

Work in groups of four. Follow the steps in order.

- 1. Prepare the interview.** Write **8 questions** for Mr. Essono : at least 5 WH-questions (What, Where, When, Why, Which, Who) and at least 2 How questions (How many, How often, How long...). Use the data table to imagine what you still want to know.
- 2. Conduct the interview.** One student plays Mr. Essono, the others are the journalists. Ask your questions, listen carefully and take notes. The “manager” must answer using the data of the situation.
- 3. Write the radio report (about 150 words).** Your report must contain :
 - a catchy introduction (who? where? when?);
 - at least **3 sentences in the passive voice**;
 - at least **2 structures** with used for + verb-ing or used with + noun;
 - at least **1 expression of preference** (prefer, would rather, like ... better);
 - correct **punctuation** : capital letters, full stops, commas, question marks in quoted questions.
- 4. Record or present your report** in front of the class, with a clear voice, like real radio journalists. One student introduces, one reads the report, one plays short interview extracts.
- 5. Evaluate another group** with the grid below, then correct your own production after the feedback (remédiation).

MÉTHODE

Evaluation grid (10 points)

Criterion	Points
8 correct WH-/How questions prepared	2
At least 3 correct passive sentences	2
2 correct used for / used with structures	2
1 expression of preference + correct punctuation	2
Clear oral presentation (voice, rhythm, pronunciation)	2

8.4 Resources

À RETENIR Grammar toolbox

- Passive voice : subject + be + past participle (+ by + agent). Ex. : Thirty-five phones are repaired every week.
- Used for + verb-ing : the purpose of a tool. Ex. : A multimeter is used for testing circuits.
- Used with + noun : what a tool works together with. Ex. : The soldering iron is used with tin wire.
- Preferences : I prefer laptops to phones. / I would rather repair laptops. / I like laptops better.
- WH-/How questions : question word + auxiliary + subject + verb? Ex. : How many phones do you repair every week?
- Punctuation : capital letter at the beginning, full stop at the end, comma in lists, question mark after a direct question, quotation marks for reported speech.

ATTENTION Common mistakes to avoid

- Do not forget be in the passive : phones are repaired, not phones repaired.
- After used for, always use verb-ing : used for testing, not used for test.
- Word order in questions : How many phones do you repair?, not How many phones you repair?
- Every direct question inside your report ends with a question mark.

8.5 Procedure and Model Answer

EXERCICE RÉSOLU 9 Model production : the Radio Balafon report

Step 1 – The 8 interview questions.

1. What machines do you use in this workshop ?
2. How many phones do you repair every week ?
3. Which problem is the most frequent ?
4. How long does a screen repair take ?
5. Why do you prefer repairing laptops ?
6. Who works with you in the workshop ?
7. When do you open the workshop ?
8. How often do students come here for internships ?

Comment : questions 1, 3, 5, 6, 7 are WH-questions ; questions 2, 4, 8 are How questions.
Note the correct order : question word + auxiliary + subject + verb.

SOLUTION

Step 2 – The 150-word radio report.

“Good afternoon, dear listeners of Radio Balafon! Today, our team visited the maintenance workshop of the technical high school, where computers, phones and printers are repaired every day. The workshop is managed by Mr. Essono and his team of four technicians. Every week, thirty-five mobile phones, twelve laptops and eight printers are repaired here. Broken screens are the most frequent problem : they represent 40 % of all repairs. We asked the manager : “Which tools do you use ?” He answered that the multimeter is used for testing electric circuits, and the soldering iron is used with tin wire. USB flash drives are used for installing repair software. Surprisingly, Mr. Essono prefers repairing laptops because, he says, the work is cleaner and better paid. Six students are also trained here during their internships. This workshop shows that technical education really prepares young people for jobs. This was Youth and Jobs, on Radio Balafon!”
(about 150 words)

Step 3 – Checking the criteria.

- Passive voice (3+) : are repaired, is managed, are trained → correct : be + past participle.
- Used for / used with (2) : used for testing, used with tin wire → correct structures.
- Preference (1) : prefers repairing laptops → correct.
- Punctuation : capital letters, commas in lists, question mark after the quoted question, exclamation marks for the radio style → correct.

Step 4 – Remediation. If a group wrote “the multimeter is used for test circuits”, correct it together : after used for, the verb takes -ing → used for testing circuits.

8.6 Lesson Summary

This activity has shown that the different skills of the lesson are not separate : in real life, a journalist uses them all at the same time. To produce the radio report, you had to **ask questions**

(WH-/How questions), **listen and take notes** (listening), **describe machines and their uses** (passive voice, used for/with), **give opinions** (preferences), **write a clear text** (punctuation, composition) and **speak in public** (oral presentation).

The peer-evaluation grid helped you to identify your own errors, especially the three classic difficulties : forgetting be in the passive, forgetting -ing after used for, and wrong word order in questions. Keep this toolbox in mind : it will be useful for the Probatoire and Baccalauréat technique, and also in your future professional life, where technical information is often communicated through reports, interviews and the media.

9 MÉTHODES ET EXERCICES RÉSOLUS

10 MEDIA AND COMMUNICATION

10.1 Speaking : Exchanging Information through the Media

DÉFINITION Key Vocabulary – Les médias

English	Français
TV (Television)	Télévision
Radio	Radio
Print media / Newspaper	Presse écrite / Journal
Headline	Titre (une)
Broadcast / Programme	Émission / Programme
Journalist / Reporter	Journaliste / Reporter
Viewer / Listener / Reader	Telespectateur / Auditeur / Lecteur
News anchor / Presenter	Présentateur (TV)
Editor / Editor-in-chief	Rédacteur / Rédacteur en chef
Breaking news	Dernière minute / Info en direct
Live / Recorded	En direct / Enregistré

EXEMPLE Dialogue : Discussing News Sources

Context : Two students, Paul and Marie, talk about how they get information.

Paul : How do you usually get your news, Marie ?

Marie : I prefer watching TV. The news anchor shows pictures and videos. It is easier to understand. What about you ?

Paul : I listen to the radio on my way to school. It is faster. Sometimes I read the newspaper at the weekend.

Marie : Do you use social media ?

Paul : Yes, but I check the source. Fake news spreads fast on WhatsApp.

Marie : True. Traditional media like TV and radio are more reliable.

MÉTHODE Useful Expressions for Exchanging Information

- Asking for information : What is the headline today? / Did you hear the news on the radio? / Have you read the latest newspaper?
- Giving information : The TV reported that... / The newspaper says... / According to the radio...
- Expressing preference (Speaking link) : I prefer TV to radio because... / I would rather listen to the radio than watch TV.
- Agreeing/Disagreeing : I agree. / That's right. / I don't think so. / Actually, the radio said...

EXERCICE 17 Speaking Practice

Work in pairs. Role-play a conversation about yesterday's news.

1. Student A : Ask Student B how they got the news (TV, radio, print, online).
2. Student B : Answer and give one detail from the news.
3. Student A : React and give your own preference using prefer or would rather.
4. Switch roles.

10.2 Grammar Focus 1 : Active and Passive Voices**À RETENIR** Active vs. Passive Voice – Règles de base

Aspect	Active Voice (Voix active)	Passive Voice (Voix passive)
Focus	The doer (subject) performs the action.	The receiver (object) becomes the subject.
Structure	Subject + Verb + Object	Subject + be (tense) + Past Participle (+ by + agent)
Example (Present)	The journalist writes the article.	The article is written (by the journalist).
Example (Past)	The technician repaired the radio.	The radio was repaired (by the technician).
Example (Future)	They will broadcast the match.	The match will be broadcast.
Example (Pres. Perf.)	She has sent the email.	The email has been sent.

Key Rule : Only transitive verbs (verbs with a direct object / COD) can be made passive. Intransitive verbs (go, sleep, arrive, happen) cannot be passive.

MÉTHODE Transforming Active to Passive – Step by Step

Follow these steps carefully :

1. Identify the **verb** (and its tense) and the **Direct Object (COD)** in the active sentence.
Example : The mechanic repairs the engine. (Verb : repairs – Present Simple ; COD : the engine)
2. Move the COD to the Subject position. The engine...
3. Conjugate the auxiliary be in the same tense as the active verb. Present Simple → is/are. Past Simple → was/were. Future → will be. Present Perfect → has/have been.
4. Add the Past Participle (Participe Passé) of the main verb. ...is repaired.
5. Decide on the agent (by + doer). Keep it only if it adds important information. If the agent is unknown, obvious, or "people/they", drop it.

Reflex : PASSIVE = Subject + be (correct tense) + Past Participle (+ by agent).

EXERCICE RÉSOLU 10 Passive Voice – Type Bac/Probatoire

Rewrite the following sentences in the passive voice.

- a) The technician repairs the radio every week.
- b) Millions of viewers watched the match on TV last night.
- c) The students will send the report by e-mail.
- d) Someone has stolen my mobile phone.
- e) They broadcast the news at 8 p.m. every day.

SOLUTION

Detailed Solutions.

a) The technician repairs the radio every week.

- Verb : repairs (Present Simple), COD : the radio (singular).
- New subject : The radio.
- be at Present Simple (singular) → is.
- Past Participle of repair → repaired.
- Agent by the technician kept (specific doer).

Answer : The radio is repaired by the technician every week.

b) Millions of viewers watched the match on TV last night.

- Verb : watched (Past Simple), COD : the match (singular).
- be at Past Simple (singular) → was.
- Past Participle : watched.
- Agent millions of viewers is vague/general → drop it.

Answer : The match was watched on TV last night.

c) The students will send the report by e-mail.

- Verb : will send (Future), COD : the report.
- Future Passive : will be + Past Participle.
- Past Participle of send (irregular) → sent.

Answer : The report will be sent by e-mail (by the students).

d) Someone has stolen my mobile phone.

- Verb : has stolen (Present Perfect), COD : my mobile phone.
- be at Present Perfect → has been.
- Past Participle of steal (irregular) → stolen.
- Agent someone → drop it.

Answer : My mobile phone has been stolen.

e) They broadcast the news at 8 p.m. every day.

- Verb : broadcast (Present Simple – same form), COD : the news.
- be at Present Simple → is/are (news is singular in grammar → is).
- Past Participle of broadcast → broadcast.
- Agent they (impersonal) → drop it.

Answer : The news is broadcast at 8 p.m. every day.

Conclusion : Only the auxiliary be changes tense. The Past Participle stays the same.
Watch out for irregular verbs : send → sent, write → written, make → made, steal → stolen, broadcast → broadcast.

EXERCICE 18 Passive Voice Practice

Turn into passive. Omit the agent where natural.

1. The editor checks the articles before printing.
2. The company launched a new smartphone yesterday.
3. We use this machine for cutting metal.
4. They have installed the new software.

5. You must switch off the power before repairing.

10.3 Listening & Vocabulary : New Information and Communication Technologies (ICT)

DÉFINITION ICT Vocabulary – Vocabulaire des NTIC

Term	Meaning / Utilisation
World Wide Web (www) / Internet	Réseau mondial / Internet
MP3 player	Lecteur MP3 (fichiers audio)
USB flash drive / Pen drive	Clé USB
Smartphone	Smartphone / Téléphone intelligent
WhatsApp / Viber / Telegram	Applications de messagerie instantanée
Social media / Social networks	Réseaux sociaux (Facebook, X, TikTok...)
Download (v) / Download (n)	Télécharger / Téléchargement
Upload (v)	Téléverser / Envoyer (fichier)
Browse / Surf the web	Naviguer sur le web
Wi-Fi / Connection	Connexion sans fil / Connexion
Software / App / Application	Logiciel / Application
Hardware	Matériel (physique)
Bluetooth	Bluetooth (connexion courte portée)
Cloud storage	Stockage en ligne (nuage)

EXPÉRIENCE Listening Simulation : "My Digital Day"

Script (Teacher reads aloud / Audio played) : "Good morning. My name is David. I am a technical student. My day starts with my smartphone. I use it as an alarm clock. Then I check WhatsApp messages with my mobile data. In class, we use the Internet to research projects. I save my work on a USB flash drive and also back it up to cloud storage. In the evening, I listen to music on my MP3 player or stream it via Bluetooth on a speaker. I rarely watch TV now; I prefer YouTube or social media. Technology makes life easier, but we must protect our data."

Task : Listen and complete the table.

Device / Tool	Function (What for?)
Smartphone	Alarm clock, messaging (WhatsApp), mobile data
Internet / Wi-Fi	Research, browsing
USB Flash drive / Cloud	Storing / Backing up files
MP3 Player / Bluetooth	Listening to music

MÉTHODE Expressing Purpose : Used for / Used to / Used in / Used with

To describe the function of a gadget or machine, use these structures :

1. Used for + Verb-ing (General purpose). A USB drive is used for storing files.
2. Used to + Base Verb (Infinitive purpose). A USB drive is used to store files.
3. Used in + Verb-ing / Noun (Context/Field). Computers are used in teaching / education.
4. Used with + Noun (Accompaniment/Requirement). WhatsApp is used with an Internet connection.

Golden Rules :

- After preposition for / in → Verb + -ing (Gerund). for storing, in teaching.
- After to (infinitive marker in used to) → Base Verb (no -ing, no to added). used to store.
- After with → Noun / Noun Phrase. with a computer, with Wi-Fi.
- Distinction : Be used to + V-ing (Habit/Accustomed) ≠ Used to + Base Verb (Purpose).
I am used to waking up early. vs This tool is used to cut metal.

EXERCICE RÉSOLU 11 Used for / to / in / with – Type Bac

Complete with the correct form of the verb in brackets or the right structure.

1. A smartphone is used for ...(send) emails and ...(browse) the web.
2. This software is used ...(design) 3D models.
3. Robots are used in ...(assemble) cars in modern factories.
4. A modem is used ...(connect) a network to the Internet.
5. This machine must be used ...(with) protective gloves.
6. My father ...(use) to read newspapers, now he uses a tablet.

SOLUTION

Solutions.

1. sending / browsing (used for + V-ing).
2. to design (used to + Base Verb).
3. assembling (used in + V-ing – context).
4. to connect (used to + Base Verb).
5. with (used with + Noun – protective gloves is a noun phrase).
6. used to read (used to + Base Verb = past habit, contrast with now).

Note : Check the word before the gap : for/in → -ing ; to → base verb ; with → noun.

EXERCICE 19 ICT Vocabulary & Grammar Practice

1. Match the device to its function using used for/used to/used with.

Device	Function
1. MP3 Player	a. making video calls
2. Webcam	b. storing large files
3. External Hard Drive	c. playing audio files
4. Router	d. connecting multiple devices to Wi-Fi

2. Write 4 sentences describing the items above using the passive structures learned.

10.4 Reading : Visiting a Workshop**DÉFINITION**

Workshop Vocabulary – Atelier / Maintenance

English	Français
Workshop / Garage	Atelier / Garage
Mechanic / Technician	Mécanicien / Technicien
Lathe	Tour (machine)
Drill / Drilling machine	Perceuse / Perceuse à colonne
Grinding machine	Meuleuse
Welding machine / Welder	Poste à souder
Spanner / Wrench	Clé (plate, à molette, à pipe)
Screwdriver	Tournevis
Pliers	Pinces
Hammer	Marteau
Safety goggles / Glasses	Lunettes de protection
Gloves	Gants
Overall / Boiler suit	Combinaison de travail
Maintenance / Servicing	Maintenance / Entretien
Worn out / Damaged	Usé / Endommagé
To oil / To lubricate	Huiler / Lubrifier
To tighten / To loosen	Serrer / Desserrer
To replace / To repair	Remplacer / Réparer
Safety regulations	Règles de sécurité

EXEMPLE Reading Text : A Visit to ENEAS Workshop

Last Friday, the students of Première Technique visited the ENEAS mechanical workshop in Douala. The visit was organised by the English teacher to show how machines are handled and maintained.

When we arrived, the chief mechanic welcomed us. He showed us the main machines : lathes, drilling machines, and a welding station. He explained that safety is the priority. "Before any repair, the machine must be switched off and unplugged," he said. "Tools are kept in the toolbox. Worn parts are replaced immediately."

We learnt the maintenance routine : every morning, the machines are cleaned and oiled. The mechanic checked the oil level and tightened loose bolts. We observed a technician replacing a damaged drill bit. He wore safety goggles and gloves.

It was a very instructive visit. We understood that precision and safety are essential in a workshop.

EXERCICE 20 Reading Comprehension

Answer the questions based on the text.

1. When and where did the visit take place?
2. Who organised the visit and why?
3. List three machines mentioned in the text.
4. What must be done before any repair? (Use passive voice from text).
5. What is the daily maintenance routine?
6. What safety equipment did the technician wear?
7. Find in the text one sentence in the Active Voice (Past Simple) and one in the Passive Voice (Present Simple).

10.5 Grammar Focus 2 : Expressing Preferences, Punctuation, WH- and How Questions**MÉTHODE** Expressing Preferences : Prefer / Would Rather / Like Better

To compare two options (media, machines, activities) :

1. Prefer + Gerund (-ing) + to + Gerund (-ing)
I prefer watching TV to listening to the radio.
I prefer reading newspapers to browsing the web.
2. Prefer + Noun + to + Noun
I prefer the radio to television.
3. Would rather + Base Verb + than + Base Verb
I would rather watch TV than listen to the radio.
He'd rather use a lathe than operate a drill.
4. Like ... better than ...
I like newspapers better than magazines.

Traps : Prefer takes to (never than). Would rather takes than (never to). After would rather, verb = Base Form (no to, no -ing).

EXERCICE RÉSOLU 12 Expressing Preferences – Type Bac

Question : “Which do you prefer, using a smartphone or a computer for studying?” Write two sentences (one with prefer, one with would rather) giving a reason.

SOLUTION

Model Answers :

1. I prefer using a computer to using a smartphone for studying because the screen is larger and typing is easier. (Prefer + V-ing + to + V-ing)
2. I would rather use a computer than use a smartphone because I can open multiple windows at the same time. (Would rather + Base V + than + Base V)

MÉTHODE**Punctuation Essentials – Ponctuation Essentielle**

Correct punctuation makes writing clear. Check these rules :

1. Full Stop (.) : End of a statement. The workshop is open.
2. Question Mark (?) : End of a question. When does it close?
3. Exclamation Mark (!) : Strong feeling / Order. Stop the machine!
4. Comma (,) :
 - Lists : We saw lathes, drills, and grinders.
 - After introductory words : First, switch off the power.
 - Before connectors (but, and, so) in long sentences.
5. Apostrophe (') : Contractions (don't, it's, can't) or Possession (the mechanic's tools, the students' visit).
6. Capital Letters : Start of sentence, I, Proper Nouns (Names, Places, Days, Months, Brands). On Monday, we visited SOPECAM in Yaoundé.
7. Colon (:) : Introduces a list or explanation. We need three tools : a hammer, a wrench, and a screwdriver.
8. Quotation Marks (" ") : Direct Speech. The guide said : "Wear your goggles."

EXERCICE RÉSOLU 13**Punctuation – Type Bac**

Rewrite with correct punctuation and capitals. last monday our group visited the sopecam printing workshop in yaounde we saw offset printers computers and cutting machines the manager said please follow the safety rules

SOLUTION

Corrected Version : Last Monday, our group visited the SOPECAM Printing Workshop in

Yaoundé. We saw offset printers, computers, and cutting machines. The manager said :
“Please, follow the safety rules.”

- Capitals : Last, Monday, SOPECAM, Printing, Workshop, Yaoundé, We, The, Please.
- Commas : After Monday, in list (printers, computers, and cutting machines).
- Colon + Quotes for direct speech. Full stops at end.

MÉTHODE Forming WH- and How Questions

To ask for specific information :

1. Choose the Question Word :

Word	Information sought
Who	Person (Subject/Object)
What	Thing / Action
Where	Place
When	Time
Why	Reason
Which	Choice
Whose	Possession
How	Manner / Quality
How many / much	Quantity
How often	Frequency
How long	Duration

2. Apply Order : Question Word + Auxiliary + Subject + Main Verb ?

- Ordinary verbs : do / does / did + Base Verb. Where does the mechanic work?
- Verb be / Modals : Inversion. Where is the workshop ? / How can I repair it ?
- Subject Questions (Who/What as subject) : NO Auxiliary. Who repairs the machines ? (Not Who does repair...)

EXERCICE RÉSOLU 14 WH- / How Questions – Type Bac

Write the question for the underlined answer.

1. The workshop is in Bafoussam.
2. The mechanic repairs ten machines a day.

3. They visited the factory last Friday.
4. She cleans the engine twice a week.
5. Mr. Ngono teaches Technical Drawing.
6. The repair costs 5000 FCFA.

SOLUTION

Solutions.

1. Where is the workshop? (Place → Where ; Verb be → inversion).
2. How many machines does the mechanic repair a day? (Quantity countable → How many ; Aux does + Base Verb repair).
3. When did they visit the factory? (Time → When ; Past → Aux did + Base Verb visit).
4. How often does she clean the engine? (Frequency → How often ; Present → Aux does + Base Verb clean).
5. Who teaches Technical Drawing? (Subject Question → Who + Verb teaches – NO auxiliary).
6. How much does the repair cost? (Quantity uncountable/price → How much ; Aux does + Base Verb cost).

EXERCICE 21 Grammar Consolidation : Preferences, Punctuation, Questions

1. Write 2 sentences comparing Radio and TV using prefer and would rather.
2. Punctuate : next friday we will go to the nkogbisson workshop the teacher said bring your notebooks
3. Write questions for these answers :
 - The lathe is used for shaping metal. (Ask about function)
 - The apprentices wear blue overalls. (Ask about clothing)
 - The training lasts six months. (Ask about duration)

10.6 Writing & Integration : Reporting a Workshop Visit**MÉTHODE Writing a Workshop Visit Report (120–150 words)**

Structure your composition in 3 parts :

1. Introduction (When, Where, Who, Why)

Last [Day/Month], the students of [Class] visited [Workshop Name] in [City] to learn how machines are handled and maintained.

2. Body (2 Paragraphs) : Description & Learning (Past Simple + Passive)

Para 1 (Observation) : We saw [machines]. The technician showed us how [machine] works.

Para 2 (Maintenance/Procedure – Use Passive) : We learnt that machines are cleaned/oiled/checked daily. Worn parts are replaced. Safety gear must be worn.

3. Conclusion (Opinion + Preference)

I enjoyed the visit because... I prefer [handling machine X] because... I hope to visit again.

Connectors : First, Then, After that, Finally, Because, However, Moreover. Checklist : Word count (120–150), Past Simple accuracy, Passive usage, Preference structure, Punctuation/Capitals.

EXERCICE RÉSOLU 15

Writing – Type Bac Model Composition

Topic : “A Visit to a Mechanical Workshop” (approx. 125 words).

SOLUTION

Model Composition :

Last month, our class of Première Technique visited a mechanical workshop in Bafoussam. The visit was organised by our English teacher to help us learn how machines are handled and maintained in a professional setting.

When we arrived, the chief mechanic welcomed us and showed us the different machines : lathes, drilling machines, and grinding machines. He explained that the machines are switched off and unplugged before any repair. Tools are kept in a locked toolbox for safety.

We learnt a lot about maintenance procedures. The machines are cleaned and oiled every morning. Worn-out parts are replaced immediately to avoid accidents. The mechanic stressed that safety goggles and gloves must be worn by every worker at all times.

I really enjoyed this visit because it was very instructive. I prefer handling small machines like drills because they are easier to control than big lathes. I hope we will visit another industrial site soon.

Analysis : ~ 125 words. Past Simple (visited, organised, showed, explained, learnt, enjoyed, preferred). Passive (are switched off, are kept, are cleaned, are replaced, must be worn). Preference (prefer handling... to...). Connectors (when, and, because, because). Punctuation correct.

EXERCICE 22 Writing Task – Exam Practice

Write a composition of 120–150 words on : “A Visit to a Printing Workshop”. Include :

- Date, place, organiser, objective.
- Machines seen (offset printer, cutter, computers, etc.).
- Maintenance/Safety rules learnt (use Passive : are cleaned, are checked, must be worn).
- Your opinion and preference (use prefer or would rather).

10.7 Integration Activities / Evaluation / Remediation**ATTENTION Top 5 Errors to Avoid in Exams – Pièges à éviter**

1. Missing Auxiliary be in Passive.
Wrong : The article written by the journalist.
Right : The article is written by the journalist. (No be = No Passive).
2. Confusing Used to structures.
Wrong : It is used to storing.
Right : It is used for storing OR It is used to store.
Check : for/in → -ing ; to → Base Verb ; with → Noun.
3. Using than with Prefer.
Wrong : I prefer radio than TV.
Right : I prefer radio to TV. (Than only with would rather).
4. Keeping Past Tense after Did in Questions.
Wrong : When did you went ?
Right : When did you go ? (Aux did carries the past ; main verb = Base Form).
5. Neglecting Punctuation / Capitals in Writing.
Missing full stops, lowercase proper nouns (yaounde), missing commas in lists, messy direct speech. Proofread 2 minutes : Capitals ? Stops ? Commas ? Quotes ?

EXERCICE 23 Integration Test – Mixed Practice

Time : 30 min.

1. Grammar (Passive/ICT) : Put verbs in brackets into correct Passive tense or Used for/to/with form.
(a) The news (broadcast) every evening at 8 pm.

- (b) A new antenna (install) on the roof last week.
 (c) WhatsApp (use) ... (send) voice messages.
 (d) This software (use) ... a licence key.
 (e) The computers (connect) to the server right now (Present Continuous Passive).
2. Vocabulary : Match the tool to the action.

1. Spanner	a. Measuring
2. Screwdriver	b. Tightening nuts/bolts
3. Calliper	c. Turning screws
4. Multimeter	d. Testing voltage/current

3. Questions : Write questions for the underlined parts.
- (a) The technician used a multimeter to check the voltage.
 (b) The machine stops automatically when it overheats.
 (c) Mr. Kouam is the workshop supervisor.
4. Writing (50 words min) : You visited a radio station. Write a short paragraph (Past Simple + Passive) describing what you saw and learnt about the studio equipment.

CORRIGÉ Integration Test

1. a) is broadcast (Present Simple Passive). b) was installed (Past Simple Passive). c) is used for sending / is used to send. d) is used with. e) are being connected.
2. 1-b, 2-c, 3-a, 4-d.
3. a) What did the technician use to check the voltage? b) How does the machine stop when it overheats? / When does the machine stop automatically? c) Who is the workshop supervisor? (Subject question).
4. Sample Paragraph : Last Tuesday, we visited the CRTV radio station in Yaoundé. We saw the recording studios and the control room. The sound engineer explained that microphones are tested before every broadcast. Cables are checked regularly. Headphones must be worn by the presenters. I learnt that digital editing software is used to cut and mix sounds. I preferred the control room because it is full of sophisticated technology.

11 EXERCICES

11.1 Je vérifie mes connaissances

EXERCICE 24 QCM : Media and ICT vocabulary

Circle the correct answer (A, B or C).

1. A person who reads the news on television is a ...
 - A. newsreader
 - B. repairer
 - C. listener
2. A USB flash drive is used for ...data.
 - A. storing
 - B. store
 - C. stored
3. The newspaper is an example of ...media.
 - A. broadcast
 - B. print
 - C. social
4. WhatsApp and Viber are used ...communication.
 - A. for
 - B. to
 - C. with
5. A machine that welds metal parts in a workshop is a ...machine.
 - A. welding
 - B. washing
 - C. printing

EXERCICE 25 True or False : Active and passive voice

Say whether each statement is True or False, and justify your answer by rewriting the sentence correctly when it is false.

1. "Technicians repair 50 phones daily" is in the passive voice.
2. "The news is broadcast every evening by CRTV" is in the passive voice.
3. In the passive voice, the subject performs the action.
4. The passive voice is formed with the verb to be + past participle.
5. "A new antenna has been installed on the roof" is in the active voice.

EXERCICE 26 Definitions : Media words

Give a short definition in English (one or two sentences) for each of the following words. You may use a dictionary.

1. broadcast
2. headline
3. workshop
4. gadget
5. maintenance

EXERCICE 27 WH- and How questions : quick check

Complete each question with the correct question word : Who, What, Where, When, Why, How, How much, How many.

1.do you listen to the radio? — In the evening.
2.repaired your phone? — Mr Nkeng, the technician.
3.data does this bundle contain? — 2 gigabytes.
4.is the workshop located? — Near the Douala central market.
5.machines are there in the workshop? — Twelve.

11.2 Je m'entraîne

EXERCICE 28 From active to passive

Rewrite the following sentences in the passive voice. Keep the same tense.

1. Technicians repair 50 phones daily.

2. The journalist interviews the Minister of Communication.
3. CRTV broadcasts the news at 8 p.m.
4. The students visited the workshop last week.
5. The engineer has installed a new antenna.
6. Many Cameroonians use WhatsApp every day.

EXERCICE 29 Used for + V-ing / used with + noun

Match each gadget (1–6) with its function (a–f), then write a complete sentence for each pair using used for + verb-ing or used with + noun.

Gadget	Function
1. USB flash drive	a. listen to music
2. MP3 player	b. send instant messages
3. Smartphone	c. store and transfer files
4. Radio set	d. browse the Internet
5. Modem	e. listen to news and music programmes
6. WhatsApp	f. make video calls

Example : A USB flash drive is used for storing and transferring files.

EXERCICE 30 Punctuation and capital letters

Rewrite the following paragraph with correct punctuation and capital letters.

crtv is the national television of cameroon it broadcasts news sports and cultural programmes every day many cameroonians also listen to radio stations such as crt radio and equinoxe fm newspapers like cameroon tribune inform readers about national events do you prefer television radio or newspapers

EXERCICE 31 Dialogue : at the repair shop

Complete the dialogue between a customer and a repairer with the correct WH- or How questions, using the answers given.

Customer : Good morning. (1) ?

Repairer : My name is Mr Fotso.

Customer : (2) ?

Repairer : Your phone has a battery problem.

Customer : (3) ?

Repairer : The repair will cost 8 000 FCFA.

Customer : (4) ?

Repairer : It will take two days.

Customer : (5) ?

Repairer : You can come back on Friday at 10 a.m.

11.3 Je me prépare au Bac

EXERCICE 32 Type Baccalauréat : Reading comprehension

Read the text carefully and answer the questions that follow.

A Visit to a Maintenance Workshop in Douala

Last Tuesday, the students of Première technique of Lycée Technique de Bonabéri visited a machine maintenance workshop in the industrial zone of Douala. The visit was organised by their English teacher, Mrs Ebanga. When they arrived at 9 a.m., the chief technician, Mr Kamga, welcomed them and divided them into four groups. Each group was guided by a technician who explained how the machines work. The students saw welding machines, drilling machines and grinding machines. They were told that the machines are checked every morning before work begins. Broken parts are replaced immediately, and oil is used for lubricating the moving parts. Safety rules are strictly respected : helmets and gloves must be worn at all times. At 11 a.m., the students asked many questions about the training needed to become a technician. Mr Kamga explained that young people are trained in technical schools and that practical experience is very important. Before leaving, the students thanked the technicians. Back at school, each student wrote a short report about the visit. Most of them said they would rather work with modern machines than do office work.

1. Say whether the following statements are True or False. Justify with a quotation from the text.
 - (a) The visit took place in Yaoundé.
 - (b) The students were welcomed by the English teacher.
 - (c) The machines are checked every morning.
 - (d) Safety rules are not respected in the workshop.
2. Answer these questions with complete sentences.
 - (a) Who organised the visit ?
 - (b) How many groups were the students divided into ?
 - (c) What is oil used for in the workshop ?

- (d) What did the students do when they returned to school?
3. Find in the text words or expressions that mean the same as :
- (a) damaged
 - (b) put on
 - (c) liked better
4. Grammar : rewrite the following sentences from the text in the active voice.
- (a) "The machines are checked every morning before work begins."
 - (b) "Broken parts are replaced immediately."

EXERCICE 33 Type Baccalauréat : Grammar and vocabulary in context

A local newspaper published an article about a phone repair company in Bamenda. Transform the following sentences from the active voice into the passive voice, then answer the vocabulary questions.

1. Transform into the passive voice (keep the tense) :
- (a) Technicians repair 50 phones daily.
 - (b) The company employs fifteen young technicians.
 - (c) Customers bring their broken phones every morning.
 - (d) The manager has bought new tools for the workshop.
 - (e) The technicians will test all the repaired phones tomorrow.
 - (f) The company offers a three-month guarantee on every repair.
 - (g) Last year, the technicians fixed more than 10 000 phones.
 - (h) The secretary is writing a report about the workshop.
2. Vocabulary : complete each sentence with one word from the box : antenna, bundle, screen, guarantee, spare parts, signal.
- (a) The of my phone is cracked ; I cannot read my messages.
 - (b) This repair comes with a six-month
 - (c) The technician replaced the old components with new
 - (d) I bought an internet of 1 GB for 500 FCFA.
 - (e) The network is very weak in my village.

EXERCICE 34 Type Baccalauréat : Guided composition

You visited the CRTV studios in Yaoundé with your class last month. Write a composition of about 150 words in which you :

1. say when and why you went there and who welcomed you ;
2. describe two or three things you saw (studios, cameras, microphones, control room) ;
3. explain what two pieces of equipment are used for, using used for + verb-ing or used with + noun ;
4. say which media job (newsreader, cameraman, sound engineer, journalist...) you would rather do and give two reasons.

Your composition must contain at least two sentences in the passive voice and correct punctuation. Marks will be awarded for : respect of the task, organisation of ideas, correct grammar (passive voice, preferences with would rather), vocabulary and punctuation.

12 CORRIGÉS DES EXERCICES

13 MEDIA AND COMMUNICATION

13.1 I Check My Knowledge

CORRIGÉ Exercise 1 — MCQ : Media and ICT Vocabulary

1. A — newsreader : a person who reads the news on television or radio. A repairer fixes machines ; a listener only listens to the radio.
2. A — storing : after used for, the verb takes the -ing form (used for + verb-ing).
3. B — print : newspapers and magazines belong to the print media ; radio and television belong to the broadcast media.
4. A — for : used for + noun expresses purpose (used for communication).
5. A — welding : a welding machine joins metal parts ; a washing machine washes clothes ; a printing machine prints documents.

CORRIGÉ Exercise 2 — True or False : Active and Passive Voice

1. False. The sentence is in the active voice : the subject Technicians performs the action. Passive form : 50 phones are repaired daily (by technicians).
2. True. Structure : is (verb to be, present simple) + broadcast (past participle) + agent introduced by by.
3. False. In the passive voice, the subject receives the action ; it is the agent (after by) that performs it.
4. True. Passive voice = to be (conjugated at the tense of the active verb) + past participle.
5. False. It is in the passive voice : has been installed (present perfect passive). Active form : They have installed a new antenna on the roof.

CORRIGÉ Exercise 3 — Definitions : Media Words

Suggested answers (other correct formulations are acceptable) :

1. broadcast : to send out programmes by radio or television ; as a noun, the programme that is sent out.
2. headline : the title of a newspaper article, printed in large letters at the top of the page to attract the reader's attention.
3. workshop : a room or building where machines are used, repaired or maintained, or where things are made or repaired by hand.
4. gadget : a small electronic device or tool, such as a smartphone, an MP3 player or a USB flash drive.
5. maintenance : the regular work done to keep machines and equipment in good working condition.

CORRIGÉ Exercise 4 — WH- and How Questions : Quick Check

1. When — the answer ("In the evening") indicates a time.
2. Who — the answer ("Mr Nkeng, the technician") indicates a person, subject of the verb.
3. How much — data is an uncountable noun.
4. Where — the answer indicates a place ("Near the Douala central market").
5. How many — machines is a countable noun in the plural.

Watch out : do not confuse How much (uncountable nouns : data, money, time) with How many (countable nouns : machines, phones, students).

13.2 | Practice**CORRIGÉ** Exercise 5 — From Active to Passive

MÉTHODE Transformation Method

The object of the active sentence becomes the subject ; the verb to be takes the tense of the active verb ; the main verb becomes a past participle ; the former subject is introduced by by (or omitted).

1. 50 phones are repaired daily (by technicians). — present simple.
2. The Minister of Communication is interviewed by the journalist. — present simple.
3. The news is broadcast by CRTV at 8 p.m. — present simple ; irregular past participle broadcast.
4. The workshop was visited by the students last week. — past simple (visited → was visited).
5. A new antenna has been installed by the engineer. — present perfect (has installed → has been installed).
6. WhatsApp is used by many Cameroonians every day. — present simple.

Watch out : the verb to be must agree with the new subject (50 phones are, the news is) and keep the tense of the original sentence.

CORRIGÉ Exercise 6 — Used for + V-ing / Used with + Noun

Matching : 1-c ; 2-a ; 3-f ; 4-e ; 5-d ; 6-b.

Possible sentences :

1. A USB flash drive is used for storing and transferring files.
2. An MP3 player is used for listening to music.
3. A smartphone is used for making video calls.
4. A radio set is used for listening to news and music programmes.
5. A modem is used for browsing the Internet.
6. WhatsApp is used for sending instant messages. / WhatsApp is used with a smartphone.

Watch out : used for is followed by a verb in -ing (or a noun) ; used with is followed only by a noun (the tool or device combined with another). Never write used for to store.

CORRIGÉ Exercise 7 — Punctuation and Capital Letters

Corrected paragraph :

CRTV is the national television of Cameroon. It broadcasts news, sports and cultural programmes every day. Many Cameroonians also listen to radio stations such as CRTV Radio and Equinoxe FM. Newspapers like Cameroon Tribune inform readers about national events. Do you prefer television, radio or newspapers?

Corrections made :

- Capital letters for proper nouns and acronyms : CRTV, Cameroon, CRTV Radio, Equinoxe FM, Cameroon Tribune, and for the first word of each sentence.
- Full stops at the end of the five statements.
- Commas in the enumerations (news, sports and cultural programmes ; television, radio or newspapers).
- A question mark at the end of the direct question.

CORRIGÉ Exercise 8 — Dialogue : At the Repair Shop

Suggested questions (other grammatically correct formulations are acceptable) :

1. What is your name, please? — the answer gives a name.
2. What is the problem with my phone? / What is wrong with my phone? — the answer describes the problem.
3. How much will the repair cost? / How much is the repair? — the answer gives a price (8 000 FCFA).
4. How long will it take? — the answer gives a duration ("two days").
5. When can I come back (to collect it)? — the answer gives a date and time ("on Friday at 10 a.m.").

Watch out : respect the word order of interrogative sentences : question word + auxiliary + subject + main verb (How much will the repair cost?, not How much the repair will cost?).

13.3 I Prepare for the Bac**CORRIGÉ** Exercise 9 — Baccalauréat Type : Reading Comprehension

1. True or False (quotation from the text is compulsory for justification) :

(a) False. "...visited a machine maintenance workshop in the industrial zone of Douala."

- (b) False. "...the chief technician, Mr Kamga, welcomed them..." (Mrs Ebanga only organised the visit).
 - (c) True. "...the machines are checked every morning before work begins."
 - (d) False. "Safety rules are strictly respected : helmets and gloves must be worn at all times."
2. Answers in complete sentences :
- (a) The visit was organised by their English teacher, Mrs Ebanga.
 - (b) The students were divided into four groups.
 - (c) Oil is used for lubricating the moving parts.
 - (d) When they returned to school, each student wrote a short report about the visit.
3. Synonyms : (a) broken (= damaged) ; (b) worn (= put on) ; (c) would rather (= liked better).
4. Active voice :
- (a) The technicians check the machines every morning before work begins.
 - (b) The technicians replace broken parts immediately.

Indicative marking scheme (out of 20) : question 1 : 4×2 pts (1 pt for answer, 1 pt for quotation) = 8 pts ; question 2 : 4×1.5 pt = 6 pts ; question 3 : 3×1 pt = 3 pts ; question 4 : 2×1.5 pt = 3 pts.

Watch out : in question 1, an answer without a quotation from the text earns only half the points ; in question 4, the tense must be preserved (present simple) and the active subject must be a logical agent (the technicians).

CORRIGÉ**Exercise 10 — Baccalauréat Type : Grammar and Vocabulary in Context**

1. Passive voice :
- (a) 50 phones are repaired daily (by technicians). — present simple.
 - (b) Fifteen young technicians are employed by the company. — present simple.
 - (c) Their broken phones are brought by customers every morning. — present simple ; irregular past participle brought.
 - (d) New tools have been bought for the workshop by the manager. — present perfect ; irregular past participle bought.
 - (e) All the repaired phones will be tested tomorrow (by the technicians). — future with will : will be + past participle.

- (f) A three-month guarantee is offered on every repair (by the company). — present simple.
- (g) Last year, more than 10 000 phones were fixed (by the technicians). — past simple; plural : were.
- (h) A report about the workshop is being written by the secretary. — present continuous passive : is being + past participle; irregular past participle written.

2. Vocabulary : (a) screen; (b) guarantee; (c) spare parts; (d) bundle; (e) signal.

Indicative marking scheme (out of 20) : question 1 : $8 \times 2 \text{ pts} = 16 \text{ pts}$ (1 pt for correct form of to be in the right tense and number, 1 pt for past participle); question 2 : $5 \times 0.8 \text{ pt} = 4 \text{ pts}$.

Watch out : check agreement of to be with the new subject (phones were, a guarantee is); do not forget irregular past participles (brought, bought, written); in the future, the form is always will be + past participle, without agreement.

CORRIGÉ**Exercise 11 — Baccalauréat Type : Guided Composition**

Model answer (about 150 words) :

Last month, our class visited the CRTV studios in Yaoundé. The visit was organised by our English teacher so that we could learn how television programmes are made. When we arrived, we were welcomed by a journalist who guided us through the building.

First, we entered the news studio, where the news is broadcast every evening. We saw large cameras, bright lights and many microphones. Then we visited the control room, which is full of screens and computers. We learnt that a microphone is used for recording voices, and that the cameras are used with special lights to produce clear pictures.

I really enjoyed this visit. If I had to choose a media job, I would rather be a sound engineer, because I love technology and I would like to work with modern machines. Besides, sound engineers are needed in every radio and television station in Cameroon.

Indicative marking scheme (out of 20) :

- Task completion (all 4 points of the prompt addressed) : 5 pts.
- Organisation of ideas (paragraphs, connectors first, then, besides) : 4 pts.
- Grammar : at least two correct passive sentences (3 pts), preference expressed with would rather + base verb (2 pts), other correct structures (2 pts).
- Media and ICT vocabulary : 2 pts.
- Punctuation and capital letters : 2 pts.

Watch out : would rather is followed by the base verb without to (I would rather be, not I would rather to be); the passive voice requires to be + past participle (the news is broadcast); pay attention to punctuation in enumerations and capital letters for proper nouns (CRTV, Yaoundé, Cameroon).

14 FICHE BILAN

Carte mentale de la leçon : les sept compétences clés autour des médias et de la communication.

FICHE BILAN L'essentiel à connaître pour l'examen

1. Key vocabulary (à connaître par cœur)

- **Media** : TV, radio, newspaper, magazine, headline, broadcast, presenter, newsreader, advert(isement).
- **ICT** : website, to browse, to download, to upload, MP3 player, USB flash drive, password, to chat, network.
- **Workshop** : machine, tool, gadget, engine, to repair, to maintain, maintenance, spare part, safety rules.

2. Grammar must-knows

Point	Rule	Example
Active voice	Subject + verb + object	The journalist writes the article.
Passive voice	Object + be + past participle (+ by...)	The article is written by the journalist.
Used for	used for + V-ing (purpose)	A USB key is used for storing files.
Used with	used with + noun	This software is used with a computer.
Preferences	prefer, would rather, like... better than	I prefer radio to TV.
WH-/How questions	Wh-word + auxiliary + subject + verb?	How often do you listen to the radio?

3. Punctuation reminders

- Full stop (.) ends a sentence ; question mark (?) after a question ; comma (,) in lists and after linkers ; capital letter at the start of sentences and for proper nouns ; apostrophe (') for contractions and possession.

4. Express methods

- **Active → Passive** : move the object to subject position, add be in the same tense, put the verb in the past participle, add by + agent if needed.
- **Workshop report plan** : date and place → machines observed → operations explained (use the passive!) → preferences and feelings → conclusion.
- **Asking questions** : choose the right WH-word (who, what, where, when, why, how) + correct auxiliary (do/does/did/is/are).

À RETENIR

Checklist avant le Bac

- ☐ I can name at least 10 words about the media and 10 about ICT.
- ☐ I can transform an active sentence into the passive voice in the present and past simple.
- ☐ I never forget be + past participle in the passive.
- ☐ I can use used for + V-ing and used with + noun correctly.
- ☐ I can express preferences with prefer ... to and would rather.
- ☐ I can build WH- and How questions with the correct word order.
- ☐ I can punctuate a short paragraph correctly (capital letters, full stops, commas,

question marks).

- ☐ I can understand a short listening text about new technologies.
- ☐ I can read a text about a workshop visit and answer comprehension questions.
- ☐ I can write a 120–word composition reporting a workshop visit, using the passive voice.
- ☐ I check my spelling of key words : broadcast, maintenance, gadget, download.
