

ANGLAIS • TLE TECH

ANGLAIS – CLASSE DE TERMINALE TECHNIQUE

LEÇON N03

ENVIRONMENT WELL-BEING
AND HEALTH

DURÉE CONSEILLÉE : 13 SÉANCES (FICHE DE PROGRESSION HARMONISÉE)

DANS CETTE LEÇON

Cette leçon développe les compétences langagières pour analyser et communiquer sur les problèmes de santé publique (drogues, maladies transmissibles) et les enjeux environnementaux (changement climatique, gestion des déchets) au Cameroun. Elle consolide la grammaire complexe (relatives, discours rapporté, conditionnels, structures adjectivales) pour une expression précise et argumentée.

- À la fin de cette leçon, je sais utiliser les pronoms relatifs (who, which, whose, where) pour décrire avec précision les acteurs et les lieux liés aux problèmes de toxicomanie.
- Je sais transformer des témoignages directs en discours rapporté pour rédiger un rapport d'alerte sur une épidémie dans mon établissement.
- Je sais employer le vocabulaire spécifique (addiction, withdrawal, recycling, land-fill, greenhouse effect) pour expliquer les causes et conséquences du réchauffement climatique au Cameroun.
- Je sais construire des phrases au premier et second conditionnel pour proposer des solutions réalistes (If we sort waste...) ou hypothétiques (If I were the Minister...).
- Je sais manipuler les structures 'how + adjective' et 'too... to' pour évaluer la gravité des situations sanitaires et environnementales.
- Je sais rédiger une composition structurée (introduction, développement, conclusion) sur la gestion des ordures dans ma ville, en justifiant mes arguments.

OBJECTIFS DE LA LEÇON

- À la fin de cette leçon, je sais utiliser les pronoms relatifs (who, which, whose, where) pour décrire avec précision les acteurs et les lieux liés aux problèmes de toxicomanie.
- Je sais transformer des témoignages directs en discours rapporté pour rédiger un rapport d'alerte sur une épidémie dans mon établissement.
- Je sais employer le vocabulaire spécifique (addiction, withdrawal, recycling, landfill, greenhouse effect) pour expliquer les causes et conséquences du réchauffement climatique au Cameroun.
- Je sais construire des phrases au premier et second conditionnel pour proposer des solutions réalistes (If we sort waste...) ou hypothétiques (If I were the Minister...).
- Je sais manipuler les structures 'how + adjective' et 'too... to' pour évaluer la gravité des situations sanitaires et environnementales.
- Je sais rédiger une composition structurée (introduction, développement, conclusion) sur la gestion des ordures dans ma ville, en justifiant mes arguments.
- Je sais présenter oralement une campagne de prévention contre l'alcoolisme ou le tabagisme en milieu scolaire en utilisant les connecteurs logiques appropriés.

PRÉREQUIS

- Maîtrise des temps simples (Present Simple, Past Simple) et du Present Perfect pour relier passé et présent.

- Connaissance de base des pronoms relatifs simples (who, which, that) vus en Première.
- Structure du conditionnel de base (If + present -> will + V) et notions de modal verbs (must, should, can).
- Vocabulaire de base sur le corps humain, les maladies courantes et l'environnement immédiat (déforestation, pollution).
- Capacité à rédiger un paragraphe cohérent avec une phrase sujet et des arguments simples.

1 SUBSTANCE ABUSE : DESCRIPTION & GRAMMATICAL ANALYSIS (RELATIVE CLAUSES)

1.1 Hook Situation & Problem Statement

Problem Statement : In Douala, gutters blocked by plastic waste favour the spread of mosquitoes and cholera, while in the secondary schools of Yaoundé, the consumption of tramadol and « kobolo » among students worries health authorities. Faced with these challenges, how can a Terminale technique student express himself or herself in English to alert, prevent and propose concrete solutions? This lesson gives you the linguistic tools to become an agent of change in your community.

1.2 Vocabulary Building : Substance Abuse Lexicon

DÉFINITION Key Vocabulary – Mots-clés du thème

The following terms are essential to talk about addictions in a technical and Cameroonian context. Learn them with their meaning and their French equivalent.

English Term	Definition / Context	Français
Drug abuse	Misuse of legal or illegal substances for non-medical purposes	Abus de drogues
Addiction	Chronic condition characterized by compulsive drug seeking	Dépendance, toxicomanie
Peer pressure	Influence from friends or age-mates to adopt risky behaviour	Pression des pairs
Overdose	Excessive dose causing coma or death	Surdose
Rehabilitation	Medical and psychological process to recover from addiction	Réhabilitation, sevrage encadré
Withdrawal symptoms	Physical and mental effects when stopping a drug (tremors, anxiety)	Symptômes de sevrage
Narcotics	Drugs that dull the senses, relieve pain and induce sleep (opioids)	Stupéfiants, narcotiques
Tramadol	Synthetic opioid painkiller widely abused in Cameroon (street name : « Tramol »)	Tramadol (médicament détourné)
Kobolo	Local street cocktail : cheap alcohol mixed with crushed pills	Kobolo (mélange local dangereux)
Relapse	Return to drug use after a period of abstinence	Rechute
Harm reduction	Policies reducing negative consequences without requiring abstinence	Réduction des risques

EXEMPLE Vocabulary in Context – Contexte camerounais

Text : « In many neighbourhoods of Yaoundé and Douala, peer pressure pushes teenagers to try tramadol or kobolo. What starts as curiosity becomes addiction. Users suffer severe withdrawal symptoms like tremors and hallucinations when they try to quit. Rehabilitation centres are overwhelmed. Prevention is cheaper than cure. »

Traduction : Dans de nombreux quartiers de Yaoundé et Douala, la pression des pairs pousse les adolescents à essayer le tramadol ou le kobolo. Ce qui commence par curiosité devient de la dépendance. Les usagers souffrent de graves symptômes de sevrage comme des tremblements et des hallucinations quand ils essaient d'arrêter. Les centres

de réhabilitation sont débordés. La prévention coûte moins cher que le traitement.

EXERCICE 1 Vocabulary Practice – Exercice de vocabulaire

A. Match each term with its definition.

- | | |
|------------------------|---|
| 1. Addiction | a) Influence from friends to do something risky |
| 2. Peer pressure | b) Return to drug use after stopping |
| 3. Overdose | c) Taking more of a drug than the body can handle |
| 4. Withdrawal symptoms | d) Chronic compulsive drug seeking |
| 5. Relapse | e) Physical effects when stopping a drug |

B. Complete the sentences with the correct word.

- Many youths start taking tramadol because of _____ from friends.
- The _____ centre in Bertoua helps 50 patients per month.
- _____ symptoms include sweating, anxiety, and insomnia.
- A lethal _____ of tramadol can stop breathing.
- _____ is a dangerous local mixture of alcohol and pills.

CORRIGÉ Exercice Vocabulary Practice

A. 1-d, 2-a, 3-c, 4-e, 5-b

B. 1. peer pressure 2. rehabilitation 3. Withdrawal 4. overdose 5. Kobolo

1.3 Reading Comprehension : Testimonials from Former Addicts

EXEMPLE Reading Text : « A Second Chance » – Témoignages fictifs inspirés de la réalité camerounaise

Text 1 – Paul, 22, Douala : « I started tramadol at 17 because my friends who worked at the port told me it gives energy for night shifts. I believed them. Soon, I could not work without it. The drug which I took daily destroyed my stomach. I stole money from my mother who cried every night. Last year, I overdosed. The nurse whose shift it was saved my life. Now I am in a rehabilitation centre where I learn carpentry. My advice : do not start. »

Text 2 – Amina, 19, Yaoundé : « Kobolo was everywhere in my quarter. Girls who drank it said it makes you bold. I tried it when I was 15. The alcohol that was mixed with pills made

me unconscious. I woke up in hospital where a social worker talked to me. She is the person to whom I owe my life. Today, I speak in schools where I warn students about kobolo.»

Glossaire : **night shifts** = quarts de nuit ; **bold** = audacieuse, sans peur ; **unconscious** = inconsciente ; **to owe one's life to** = devoir la vie à.

EXERCICE 2 Reading Comprehension – Compréhension de lecture

Answer in complete sentences.

1. Why did Paul start taking tramadol?
2. What does « the drug which I took daily » refer to?
3. Who saved Paul's life?
4. Where does Amina now speak to warn students?
5. Find two relative clauses in Text 1 and identify their antecedents.

CORRIGÉ Exercice Reading Comprehension

1. Paul started tramadol because friends who worked at the port told him it gives energy for night shifts.
2. « The drug which I took daily » refers to tramadol.
3. The nurse whose shift it was saved Paul's life.
4. Amina speaks in schools where she warns students about kobolo.
5. Examples : « friends who worked at the port » (antecedent : friends) ; « the drug which I took daily » (antecedent : the drug) ; « my mother who cried every night » (antecedent : my mother) ; « the nurse whose shift it was » (antecedent : the nurse) ; « a rehabilitation centre where I learn carpentry » (antecedent : centre).

1.4 Grammar Focus : Relative Clauses – Propositions Relatives

DÉFINITION Relative Clause – Proposition relative

A relative clause (proposition relative) is a subordinate clause that gives information about a noun called the antecedent (antécédent). It begins with a relative pronoun (pronom relatif) which links the clause to the antecedent.

Structure : Antecedent + Relative Pronoun + Verb + (Complements)

Example : « The youth who consumes tramadol risks his life. »

Antecedent : « The youth » Pronoun : « who » Verb : « consumes »

PROPRIÉTÉ Choice of Relative Pronoun – Choix du pronom relatif

The relative pronoun depends on the nature of the antecedent (person/thing) and on its grammatical function inside the relative clause (subject, object, possession, place, time).

Pronoun	Antecedent	Function in the clause	Example
who	Person	Subject	The doctor who treats addicts is busy.
whom	Person	Object (formal)	The patient whom the doctor examined...
which	Thing/Animal	Subject or Object	The pill which causes addiction...
that	Person/Thing	Subject or Object (defining only)	The youth that smokes kobo...
whose	Person/Thing	Possession	The father whose son is addicted...
where	Place	Place (replaces in/at/on which)	The centre where he recovers...
when	Time	Time (replaces on/in which)	The day when he quit...

ATTENTION Pièges fréquents – Common Mistakes

1. Never use « what » as a standard relative pronoun.
« The thing what I need » → The thing that/which I need.
2. Do not keep a redundant personal pronoun.
« The boy who he is my friend » → The boy who is my friend.
3. Whom vs Who : « whom » is formal and used as an object. In speech, we use « who » or we omit the pronoun.
« The man whom I saw » (formal) = « The man who I saw » = « The man I saw ».
4. « That » is NEVER used in non-defining relative clauses (with commas).
« My father, that is a doctor... » → My father, who is a doctor...

1.5 Defining vs Non-Defining Relative Clauses

PROPRIÉTÉ Restrictive (Defining) vs Non-Restrictive (Non-Defining)

The distinction changes the meaning and the punctuation.

Criterion	Defining (Restrictive)	Non-Defining (Non-Restrictive)
Meaning	Essential information to identify the antecedent	Extra information, not needed for identification
Punctuation	No commas	Between commas (or dashes/brackets)
Pronouns	who, which, that, whose, where, when	who, which, whose, where, when (never that)
Omission	Possible if the pronoun is the object	Impossible
Example	Students who take tramadol risk expulsion.	Paul, who takes tramadol, risks expulsion.
Translation	Les élèves qui prennent du tramadol risquent l'exclusion. (Only those who take it)	Paul, qui prend du tramadol, risque l'exclusion. (Extra information about Paul)

EXEMPLE Minimal Pair – Paire minimale : the meaning changes completely

- « The students who failed the test must retake it. »
→ Only those who failed will retake it. (Defining)
- « The students, who failed the test, must retake it. »
→ All the students failed and all will retake it. (Non-defining)

Prevention application : « Youths who consume kobolo destroy their health. » (Only those who consume it) vs « Youths, who consume kobolo, destroy their health. » (All youths consume it – false!)

EXEMPLE Relative Clauses with Statistics – Relatives et statistiques

Raw data (illustrative figure) : « About one student in five aged 15–19 has already tried tramadol. »

Transformation into relative clauses :

- « One student in five who is aged 15–19 has already tried tramadol. » (Defining)
- « Tramadol, which is a synthetic opioid, is one of the most abused drugs in schools. » (Non-defining)

- « The regions where consumption is highest are the Littoral and the Centre. » (Place)
- « The year when tramadol seizures peaked was 2022. » (Time)
- « Parents whose children are addicted often feel helpless. » (Possession)

1.6 Method : Combining Sentences with Relative Clauses

MÉTHODE How to combine two sentences into one with a relative clause – 4 steps

Aim : Transform two simple sentences into one complex sentence containing a relative clause.

Starting example :

1. The youths smoke kobolo. (Sentence 1)
2. Kobolo destroys their lungs. (Sentence 2)

Step 1 – Identify the common antecedent.

« Kobolo » (a thing) is the antecedent. It is the subject in Sentence 2.

Step 2 – Choose the relative pronoun.

Thing + subject → which (or that if defining).

Step 3 – Remove the redundant word.

In Sentence 2, « Kobolo » becomes « which ». Delete any repeated pronoun such as « it ».

Step 4 – Place the relative clause just after the antecedent.

« The youths smoke kobolo which destroys their lungs. »

Final result : « The youths smoke kobolo which destroys their lungs. »

EXERCICE RÉSOLU 1 Sentence Combining – Combinaison de phrases

Combine each pair using a relative pronoun.

1. The doctor treated the addict. The doctor works at Laquintinie Hospital.

SOLUTION

Solution : The doctor who/that treated the addict works at Laquintinie Hospital. (Defining : identifies which doctor)

OR : The doctor, who treated the addict, works at Laquintinie Hospital. (Non-defining : extra information)

2. Tramadol is a painkiller. Young people abuse it.

Solution : Tramadol, which young people abuse, is a painkiller. (Non-defining)

OR : Tramadol that/which young people abuse is a painkiller. (Defining – less natural here)

3. The centre helps addicts. My brother works there.

Solution : The centre where my brother works helps addicts. (Place → where)

4. 2022 was a bad year. Tramadol seizures increased then.

Solution : 2022 was the year when tramadol seizures increased. (Time → when)

5. The mother cried. Her son was addicted.

Solution : The mother whose son was addicted cried. (Possession → whose)

EXERCICE 3 Sentence Combining Practice – Entraînement combinaison

Combine each pair. Indicate if defining (D) or non-defining (ND).

1. The social worker helped Amina. The social worker speaks in schools now.
2. Kobolo is a local drink. It contains alcohol and tramadol.
3. The rehabilitation centre is in Bafoussam. Paul stays there.
4. Peer pressure pushes youths to drugs. It is very strong in secondary schools.
5. The law punishes drug traffickers. It was passed in 1997.

CORRIGÉ Exercice Sentence Combining Practice

1. The social worker who/that helped Amina speaks in schools now. (D) OR The social worker, who helped Amina, speaks in schools now. (ND)
2. Kobolo, which contains alcohol and tramadol, is a local drink. (ND)
3. The rehabilitation centre where Paul stays is in Bafoussam. (D)
4. Peer pressure, which is very strong in secondary schools, pushes youths to drugs. (ND)
5. The law which/that was passed in 1997 punishes drug traffickers. (D)

1.7 Speaking Activity : Information Gap – Prevention Poster Description

MÉTHODE Information Gap Activity – Décrire une image de prévention

Instructions : Work in pairs. Student A has Image A (healthy lung). Student B has Image B (lung damaged by smoking/kobolo). Without showing your image, describe it to your partner using at least 3 relative clauses. Your partner draws what he or she hears. Compare at the end.

Image A : Healthy Lung
(Poumon sain)

Image B : Damaged Lung
(Poumon abîmé)

Information Gap : Describe & Draw

Information Gap : healthy lung (A) vs lung damaged by smoking/kobolo (B). Students describe using relative clauses.

EXEMPLE Model Description – Description modèle (Student A)

« This is a picture of a healthy lung which is pink and spongy. The surface where gas exchange happens is clean. There are no black spots that indicate tar deposits. The alveoli which look like tiny balloons are fully inflated. This lung belongs to a person who does not smoke kobolo or cigarettes. »

Relatives used : 1) « which is pink » (defining), 2) « where gas exchange happens » (place), 3) « that indicate tar deposits » (defining), 4) « which look like balloons » (defining), 5) « who does not smoke » (defining).

EXEMPLE Model Description – Description modèle (Student B)

« This image shows a damaged lung which has turned grey and black. The tissue where oxygen should pass is blocked by tar. The black spots that you see are toxic deposits from kobolo and cigarettes. This is the lung of a youth who has smoked for five years. The doctor whose patient owns this lung warns that emphysema, which is incurable, will follow. »

Relatives used : 1) « which has turned », 2) « where oxygen should pass », 3) « that you see » (omissible : « The black spots you see »), 4) « who has smoked », 5) « whose patient », 6) « which is incurable » (non-defining).

EXERCICE 4 Speaking Task – Tâche orale notée

Prepare a 2-minute presentation of the poster below. Use at least 4 relative clauses (2 defining, 2 non-defining). Record yourself or present to the class.

Prevention poster – School health campaign, Cameroon

Assessment criteria : 1) Accurate vocabulary (5 pts) 2) At least 4 correct relative clauses (8 pts) 3) Pronunciation and fluency (4 pts) 4) Logical structure (3 pts) – Total : 20 pts.

1.8 Cultural Context & Legal Framework : Cameroon Focus

LESAVAIS-TU ?

Did you know ? – Contexte légal et social au Cameroun

- Law No. 97/19 of 10 January 1997 : punishes the use, possession and trafficking of narcotics in Cameroon, with prison sentences and heavy fines.
- Tramadol : originally a painkiller (WHO level-2 analgesic). Diverted as a « doping » product for hard physical work (dockers, drivers, farmers). Street doses (200–400 mg) far exceed therapeutic doses (50–100 mg).
- Kobollo : a home-made mixture of adulterated alcohol and crushed pills (tramadol, diazepam). Sold very cheaply (about 100–300 FCFA per sachet), it is common in call-box areas and popular neighbourhoods.
- Health data : health authorities report that a significant proportion of teenagers aged 15–19 have already tried tramadol, and that substance abuse is involved in many psychiatric admissions in reference hospitals such as Laquintinie (Douala) and Jamot (Yaoundé).
- Emergency numbers : 1510 (Police), 116 (Children in Danger), 119 (Medical emergencies). Care centres : Laquintinie (Douala), Jamot (Yaoundé), and regional hospitals in Bafoussam, Garoua and Maroua.

EXEMPLE

Authentic Document Analysis – Analyse de document authentique

Adapted extract – Public health press release : « The Ministry of Public Health, which coordinates the national drug control strategy, warns that tramadol that is sold illegally in

markets contains unknown substances. Parents whose children show signs of addiction (isolation, aggression, weight loss) must contact the nearest health centre where free counselling is available. The campaign whose slogan is « Zero Tramadol in Schools » targets secondary students who are the most vulnerable. »

Activity : Identify the 6 relative clauses. Classify them as D (defining) or ND (non-defining). Justify the punctuation.

CORRIGÉ Analyse de document authentique

1. « which coordinates... » – ND (comma before it ; extra information about the Ministry)
2. « that is sold illegally... » – D (identifies which tramadol : the one sold illegally)
3. « whose children show signs... » – D (identifies which parents : those whose children show signs)
4. « where free counselling is available » – D (identifies which centre : the one where counselling is free)
5. « whose slogan is... » – D (identifies which campaign : the one whose slogan is...)
6. « who are the most vulnerable » – D (identifies which students : the most vulnerable ones)

1.9 Integration & Remediation : Mini-Project

EXERCICE 5 Mini-Project : « Youth Ambassadors Against Drugs » – Projet intégré

Scenario : You are a health ambassador in your technical secondary school. Create a prevention poster (A4 format) in English for the new school year.

Compulsory requirements :

1. A catchy title (slogan).
2. 3 real causes (peer pressure, unemployment, stress...).
3. 3 consequences (health, studies, law).
4. 1 statistic on drug abuse (mention your source).
5. At least 5 relative clauses (mix of defining/non-defining, varied : who, which, where, whose, when).
6. Emergency numbers (1510, 116, 119).
7. A visual : drawing, diagram or simple infographic.

Self-assessment grid (tick) :

- ☐ Unit vocabulary used (addiction, withdrawal, rehabilitation, peer pressure, overdose, kobolo, tramadol)

- ☐ 5+ correct relative clauses (punctuation respected)
- ☐ Clear D / ND distinction (commas in the right place)
- ☐ No « what » as a relative pronoun, no redundant pronoun
- ☐ Spelling and grammar checked
- ☐ Clear message, appropriate tone (alerting without stigmatizing)

Output : Poster displayed in the school corridor + 2-minute oral presentation in class (continuous assessment).

À RETENIR

Section 1 Summary – Key points for the exam

1. Key vocabulary : drug abuse, addiction, peer pressure, overdose, rehabilitation, withdrawal symptoms, narcotics, tramadol, kobolo, relapse, harm reduction.
2. Relative clauses : they give information about an antecedent. Pronouns : who (person/subject), whom (person/object, formal), which (thing), that (person/thing, defining only), whose (possession), where (place), when (time).
3. Defining (restrictive) : essential information, no commas, « that » allowed, omission possible when the pronoun is the object.
4. Non-defining (non-restrictive) : extra information, between commas, « that » forbidden, omission impossible.
5. Combining sentences : 1) find the common antecedent 2) choose the pronoun according to its function 3) remove the redundant word 4) place the clause after the antecedent.
6. Cameroon context : Law No. 97/19 of 1997, tramadol/kobolo as youth scourges, emergency numbers 1510 / 116 / 119.

2 PREVENTING COMMUNICABLE DISEASES : LISTENING & REPORTED SPEECH

In the previous section, we analysed the devastating impact of substance abuse on health and practised **relative clauses** to define terms like addiction and withdrawal. We now shift our focus from non-communicable behavioural risks to **communicable diseases** — illnesses caused by viruses, bacteria, or parasites that spread from person to person or through vectors. In Cameroon, seasonal outbreaks of cholera, malaria, and meningitis require rapid public health responses. Mastering **reported speech** is essential here : as future technicians, health workers, or informed citizens, you must accurately relay official health protocols, radio announcements, or

medical advice without distorting the message.

2.1 Vocabulary : Prevention & Disease Classification

Understanding the **mode of transmission** is the first step in prevention. The following table categorises key diseases relevant to the Cameroonian context.

Domain / Measure	Key Terms (English / Français)	Examples / Exemples
Vector-borne	Vector (vecteur : moustique, tique), Stagnant water (eau stagnante), Breeding site (gîte larvaire)	Malaria (paludisme), Dengue , Yellow fever (fièvre jaune)
Water-borne	Contaminated source (source contaminée), Latrine (latrine), Oral rehydration (réhydratation orale), Outbreak (épidémie)	Cholera (choléra), Typhoid (fièvre typhoïde), Hepatitis A
Airborne	Droplets (gouttelettes), Ventilation (aération), Quarantine (quarantaine), Isolation (isolement), Protocol (protocole)	Tuberculosis (TB), COVID-19 , Meningitis (méningite)
Prevention & Control	Vaccination (vaccination), Sanitation (assainissement), Hygiene (hygiène), Handwashing (lavage des mains), Surveillance (surveillance)	Immunization campaign (campagne de vaccination), WASH strategy (stratégie EAH)

DÉFINITION Communicable Disease

A **communicable disease** is an illness caused by an infectious agent (bacterium, virus, parasite, fungus) that can be transmitted from one host to another, directly or indirectly (via vectors, water, air, surfaces). In French : Maladie transmissible.

LESAVAIS-TU ? La stratégie WASH au Cameroun

La stratégie WASH (Water, Sanitation, Hygiene / Eau, Assainissement, Hygiène) est le pilier de la prévention du choléra dans les écoles camerounaises. Le programme « Écoles Amies de l'Hygiène », soutenu par l'UNICEF et le MINSANTE, impose la présence de points d'eau potable, de latrines séparées (filles/garçons) et de dispositifs de lavage des mains (handwashing stations) à base de cendres ou de savon. En saison des pluies, la surveillance de la **water quality** (qualité de l'eau) devient critique dans le Septentrion.

2.2 Listening Skills : Decoding Public Health Announcements

In the **Probatoire** and **Baccalauréat technique**, listening exams often feature authentic audio :

a CRTV news flash, a speech by the Regional Delegate of Public Health (Délégué Régional de la Santé Publique), or a community health worker sensitising a market crowd.

EXPÉRIENCE**Simulated Listening Task : Cholera Response in the North Region**

Context : Rainy season (July–October). Unprotected water points (puits non protégés, marigots) contaminated by flooding. Script (Audio Simulation) :

“Good morning. This is Dr. Aboubakar, Regional Delegate of Health for the North. We confirm a cholera outbreak in Garoua and Figuil health districts. As of today, 47 cases and 3 deaths are recorded. The Ministry urges all populations to strictly observe hygiene rules. You must drink only treated or boiled water. You must use latrines and stop open defecation. Food must be cooked thoroughly and eaten hot. Parents, you should vaccinate your children against cholera at the nearest health centre. Health workers have to report any suspected case immediately. Together, we can stop this epidemic.”

Task : Classify the measures into Obligatory (Must / Have to) vs Recommended (Should / Ought to).

EXERCICE RÉSOLU 2**Note-taking Grid : Obligation vs Recommendation**

Instructions : Complete the table based on the audio script above.

Modality	Measure (Direct Speech)	Target Group
Must (Strong Obligation)	Drink only treated/boiled water	Populations
Must	Use latrines; stop open defecation	Populations
Must	Cook food thoroughly; eat hot	Populations
Have to (External Obligation)	Report suspected cases immediately	Health workers
Should (Advice)	Vaccinate children against cholera	Parents

Key Distinction : Must reflects the speaker's authority/urgency. Have to reflects an external rule (professional protocol). Should indicates strong advice for protection.

2.3 Grammar Focus : Reported Speech (Discours Rapporté)

When you write a report for your school journal, a safety logbook, or a technical file, you rarely quote people word-for-word (**Direct Speech**). You summarise using **Reported Speech** (Indirect Speech).

DÉFINITION Reported Speech

Reported Speech reports what someone said without using their exact words. It typically involves a reporting verb (said, told, warned, advised, announced, confirmed) in the past tense, followed by a reported clause introduced by *that* (often omitted). The tense of the verb in the reported clause usually shifts backwards (**backshift**).

Visual summary of Reported Speech transformations : Back-shift rules for tenses and conversion of Imperatives to Infinitives.

PROPRIÉTÉ La Règle du Backshift (Concordance des Temps)

Si le verbe introducteur (reporting verb) est au passé (said, told, warned, announced), les temps de la proposition rapportée reculent d'un cran :

- Present Simple → Past Simple
- Present Continuous → Past Continuous
- Present Perfect → Past Perfect
- Past Simple → Past Perfect
- Will → Would
- Can → Could
- May → Might
- Must → Had to (Pas de musted!)

Exceptions (Pas de backshift) :

1. **Vérités générales / Faits scientifiques** : "Water boils at 100°C" → He said water boils at 100°C.
2. **Faits encore actuels / Futur immédiat** : "The meeting is tomorrow" (dit aujourd'hui) → She said the meeting is tomorrow.
3. **Conditionnels 2 & 3** : "If I were you, I'd go" → He said if he were me, he 'd go. (Déjà au passé).

MÉTHODE**Transformer un ordre/conseil (Impératif) en Discours Rapporté**

Les consignes d'hygiène (affiches, radios) sont souvent à l'impératif. Suivez ces étapes :

1. Identifiez le verbe introducteur selon la force : advise (conseil), warn (avertissement danger), order (ordre strict), urge (insistance), recommend (recommandation officielle).
2. Mettez le verbe principal à l'infinitif : to + base verbale.
3. Gérez la négation : not to + base verbale (placez not avant to).
4. Adaptez les pronoms et déterminants : I → he/she, you → me/us/them, my → his/her, this → that, these → those.
5. Adaptez les marqueurs spatio-temporels (voir tableau ci-dessous).

Direct Speech (Marqueurs)	Reported Speech (Marqueurs)
now	then / at that moment
today / tonight	that day / that night
yesterday	the day before / the previous day
tomorrow	the next day / the following day
last week / month	the previous week / month
next week / month	the following week / month
here	there
this / these	that / those
ago	before

ATTENTION**Pièges Fréquents : Say vs Tell & Pronoms**

- Say vs Tell : Say ne prend JAMAIS d'objet personne (COI) directement. Tell OBLIGE un objet personne.
 - ✓ He said (that) he was sick. ✓ He told me (that) he was sick.

- × He said me he was sick. × He told he was sick.
- Oubli du changement de pronom : "I will wash my hands" → He said he would wash his hands (pas my).
- Must → Had to : Ne créez pas musted. Pour l'absence d'obligation au passé : didn't have to. Pour l'interdiction : must not → warned not to ou forbade from -ing.

EXEMPLE Chiffré : Rapport d'épidémie

Direct : "Cholera cases have increased by 15% this week," reported the doctor. Reported : The doctor reported that cholera cases had increased by 15% that week.

- have increased (Present Perfect) → had increased (Past Perfect).
- this week → that week.
- Verbe introducteur : reported (plus précis que said pour un bulletin officiel).

EXEMPLE Variété des Verbes Introducteurs

Ne vous limitez pas à said/told. Choisissez le verbe qui rend la fonction illocutoire (l'intention) :

Direct Speech	Reporting Verb	Reported Structure
"Get vaccinated!"	Urged / Advised	He urged us to get vaccinated.
"Don't drink that water!"	Warned	She warned us not to drink that water.
"We confirm the outbreak."	Confirmed	They confirmed that there was an outbreak.
"I announce free treatment."	Announced	The Minister announced that treatment was free.
"Please, use the latrine."	Recommended / Asked	He recommended using the latrine / asked us to use the latrine.

2.4 Writing Practice : From School Poster to Journal Report

EXERCICE RÉSOLU 3 Transformation Task : School Hygiene Poster → Written Report

Scenario : You are the editor of the Technical High School Gazette. You saw this poster on the wall. Write a short report (50–60 words) for the next edition.

Poster Text (Direct Speech) :

STOP CHOLERA! Wash your hands with soap before eating. Do not eat cold

food from street vendors. Drink only treated water. Report any diarrhoea case to the infirmary immediately. — The School Nurse, Monday 14th October

Model Report (Reported Speech) :

On Monday 14th October, the school nurse warned students about cholera risks. She advised them to wash their hands with soap before meals and urged them not to eat cold food from street vendors. She insisted that they had to drink only treated water. Finally, she ordered anyone with diarrhoea to report to the infirmary immediately.

Analysis of Transformations :

1. Wash (Imperative) → advised ... to wash (Infinitif).
2. Do not eat (Négatif) → urged ... not to eat.
3. Drink (Imperatif fort) → insisted that ... had to drink (Subjonctif/Modalité rapportée) ou ordered ... to drink. Ici had to rend l'obligation must implicite.
4. Report ... immediately → ordered ... to report ... immediately (adverbe conservé car relatif à l'action).
5. Monday 14th October → On Monday 14th October (marqueur temporel ancré).

2.5 Exercices d'Application (Style Probatoire / Bac Tech)

EXERCICE 6 Grammaire : Backshift & Verbes Introduteurs

Turn the following direct statements into reported speech. Choose an appropriate reporting verb (warn, advise, confirm, announce, urge, order).

1. "The cholera vaccine is available at the district hospital," the Director said.
2. "Do not swim in the river during the rainy season," the health worker told the children.
3. "We will launch a sanitation campaign next week," the Mayor announced.
4. "You must boil drinking water for at least 10 minutes," the nurse insisted.
5. "Malaria cases have dropped by 20% this year," the report stated.

EXERCICE 7 Vocabulaire & Compréhension : Complétion

Complete the sentences with words from the vocabulary table (Vector-borne, Water-borne, Airborne, Outbreak, Quarantine, Sanitation, Vaccination, Latrine).

1. The _____ of cholera in the North Region was linked to flooded _____.

2. Sleeping under treated mosquito nets prevents _____ diseases like malaria.
3. TB patients must respect _____ to avoid infecting their family.
4. Improving _____ (building toilets, waste management) stops _____ diseases.
5. The _____ campaign against meningitis targets students in the meningitis belt.

EXERCICE 8 Production Écrite : Rapport Technique

Context : You are a HSE (Health, Safety, Environment) Technician intern at a local agro-industrial company (ex : CDC, SOCAPALM, HEVECAM). The Site Doctor gave this briefing yesterday : “Workers must wear masks in the dusty packaging area. They should wash hands before lunch. Anyone with a persistent cough must go to the clinic today. We will fumigate the dormitories tomorrow.” Task : Write the Daily HSE Logbook Entry (Reported Speech, formal style, 60 words).

2.6 Corrigés Détaillés**CORRIGÉ Exercice 1 : Grammaire**

1. The Director confirmed/announced (that) the cholera vaccine was available at the district hospital. (is → was ; vérité générale possible mais was standard au passé).
2. The health worker warned the children not to swim in the river during the rainy season. (Imperatif négatif → warned not to).
3. The Mayor announced (that) they would launch a sanitation campaign the following week. (will → would ; next week → the following week).
4. The nurse insisted/urged (that) they had to boil drinking water for at least 10 minutes. (must → had to).
5. The report stated/reported (that) malaria cases had dropped by 20% that year. (have dropped → had dropped ; this year → that year).

CORRIGÉ Exercice 2 : Vocabulaire

1. The outbreak of cholera in the North Region was linked to flooded latrines (or water points/sources).

2. Sleeping under treated mosquito nets prevents vector-borne diseases like malaria.
3. TB patients must respect quarantine (or isolation) to avoid infecting their family.
4. Improving sanitation (building toilets, waste management) stops water-borne diseases.
5. The vaccination campaign against meningitis targets students in the meningitis belt.

CORRIGÉ Exercice 3 : Production Écrite

Daily HSE Logbook — Date : [Today's Date] The Site Doctor ordered workers to wear masks in the dusty packaging area and advised them to wash their hands before lunch. He warned that anyone with a persistent cough had to go to the clinic that day. He announced that the dormitories would be fumigated the next day. (Word count : 55 words. Tenses backshifted. Pronouns/Time markers adapted. Passive used for 'fumigate' as agent unknown/irrelevant).

À RETENIR Checklist Rédaction Rapport Technique (HSE / Journal Scolaire)

Avant de rendre votre copie, vérifiez :

1. Verbe introducteur varié et précis (warned, advised, ordered, confirmed...).
2. Backshift appliqué systématiquement (sauf exceptions).
3. Pronoms / Possessifs adaptés (I → he, my → his).
4. Marqueurs temps/lieu adaptés (now → then, today → that day, tomorrow → the next day).
5. Impératifs → to + V / not to + V.
6. Registre formel (pas de contractions didn't → did not si très formel, sinon toléré).

3 ENVIRONMENTAL ISSUES : CLIMATE CHANGE & WASTE MANAGEMENT (READING & CONDITIONALS)

3.1 Transition from the Previous Section

In the previous section, we learnt how to **report** what health experts say about preventing communicable diseases, using **Direct and Indirect Speech**. We moved from quoting exact words to summarising messages. Now we shift our focus from human health to **planetary health**. We will

read about environmental challenges in Cameroon and around the world, and we will learn to express **conditions and consequences** using the **First and Second Conditionals**. This allows us to talk about real future plans (If we act, things will improve) and imaginary situations (If everyone cared, the world would be better).

3.2 Vocabulary : Environmental Issues & Waste Management

DÉFINITION Key Environmental Vocabulary

The following words are essential for understanding texts on climate change and waste management in the Cameroonian context. Learn each word with its French gloss (glose française).

English Term	Definition / Context	French Gloss
Global warming	Long-term rise in the Earth's average temperature.	Réchauffement climatique
Greenhouse gases (GHG)	Gases (carbon dioxide, methane) trapping heat in the atmosphere.	Gaz à effet de serre
Deforestation	Clearing forests for agriculture or logging.	Déforestation
Erosion	Wearing away of topsoil by wind or rain.	Érosion
Desertification	Process by which fertile land becomes desert.	Désertification
Landfill	Site for burying waste (e.g., Nkol-foulou near Yaoundé).	Décharge (d'ordures)
Recycling	Converting waste into reusable material.	Recyclage
Composting	Decomposing organic waste into fertilizer.	Compostage
Biodegradable	Able to decay naturally without harming the environment.	Biodégradable
Single-use plastic	Plastic items used once then thrown away (bags, straws).	Plastique à usage unique
Circular economy	Economic system aimed at eliminating waste and reusing resources.	Économie circulaire
Carbon footprint	Total GHG emissions caused by an individual, event or product.	Empreinte carbone

EXEMPLE Vocabulary in Context – Cameroon

- Rising sea levels threaten coastal towns like Kribi and Limbé. (L'élévation du niveau de la mer menace...)
- Desertification advances in the Far North Region (Sahel zone), causing food insecurity. (La désertification progresse...)
- HYSACAM (Hygiène et Salubrité du Cameroun) collects household waste in Yaoundé and Douala and manages the Nkolfoulou landfill, but recycling rates remain low.
- Local startups turn plastic waste into paving stones (pavés) – a circular economy initiative.

3.3 Reading : Environmental Challenges in Cameroon

EXEMPLE Reading Text 1 : Coastal Threats & Northern Desertification**Cameroon's Climate Frontlines**

Cameroon is often called “Africa in miniature” because of its diverse geography. However, this diversity makes it vulnerable to climate change.

In the Southwest and Littoral regions, the coastal towns of Limbé and Kribi face rising sea levels and coastal erosion. The main causes are global warming (melting ice caps and the thermal expansion of seawater) and local deforestation of mangroves, which normally protect the shore. Consequences include the destruction of fishing infrastructure, the salinization of freshwater, and the displacement of communities.

In the Far North (Sahelian zone), desertification is accelerating. Irregular rainfall, overgrazing, and cutting trees for firewood cause severe soil erosion. This leads to food insecurity and forces climate migration — people leaving villages for towns like Maroua, or even for Yaoundé.

Source : Adapted from MINEPDED and UNESCO materials on climate change education.

EXEMPLE Reading Text 2 : Waste Management in Yaoundé – The Nkolfoulou Challenge**From Waste to Resource : The Yaoundé Case**

Yaoundé, the political capital, produces well over 1,500 tons of waste every day. Most of it ends up at the Nkolfoulou landfill, north of the city. The composition of this waste is revealing : the largest portion is organic (compostable), followed by plastic (often single-use), paper, and metal.

Currently, only a small fraction is formally recycled. The rest pollutes waterways such as the Mfoundi River and releases methane, a potent greenhouse gas. However, change is coming. The 2014 regulation against non-biodegradable plastic packaging (less than 60

microns thick) was an important legal step. Today, youth-led startups collect plastic bottles and transform them into ecological paving stones or polyester fibre for the textile industry. This circular economy approach creates jobs and reduces the carbon footprint. Source : Adapted from HYSACAM data and Cameroon Tribune articles.

EXERCICE 9 Reading Comprehension Check

Answer the questions based on the texts above. Use full sentences.

1. Identify two causes of coastal erosion in Limbé/Kribi mentioned in Text 1.
2. What is the link between desertification in the Far North and migration?
3. According to Text 2, where does most of Yaoundé's waste end up?
4. Name two products made from recycled plastic by Cameroonian startups.
5. Vocabulary : Find words in the texts meaning :
 - a) Making land into desert (Text 1)
 - b) Able to rot naturally (Text 2)
 - c) Gas released by rotting waste (Text 2)

CORRIGÉ Exercice Reading Comprehension

1. Global warming (melting ice caps, thermal expansion of seawater) and local deforestation of mangroves.
2. Desertification causes soil erosion and food insecurity, which forces people to leave their villages and migrate to towns (climate migration).
3. Most of it ends up at the Nkolfoulou landfill, north of the city.
4. Ecological paving stones and polyester fibre for the textile industry.
5. a) Desertification ; b) Biodegradable ; c) Methane.

3.4 Grammar : First & Second Conditionals

DÉFINITION Conditionals : Expressing Cause & Effect under Condition

Conditionals are sentences with two parts : an If-clause (the condition) and a main clause (the result). They express probability and reality.

- Type 1 (Real Future) : The condition is possible and likely to happen. We talk about real plans, warnings, promises.
- Type 2 (Unreal Present/Future) : The condition is imaginary, unlikely, or contrary to current reality. We talk about dreams, advice, hypothetical scenarios.

PROPRIÉTÉ Structures – First vs Second Conditional

Type	If-Clause (Condition)	Main Clause (Result)
Type 1 (Real Future)	If + Present Simple If we recycle more,	Subject + will / can / must / may + base verb we will reduce pollution.
Type 2 (Unreal / Hypothetical)	If + Past Simple If everyone composted, (Note : were for all persons : If I were you...)	Subject + would / could / might + base verb landfills would shrink.

MÉTHODE Choosing the Right Conditional : 3-Step Decision

Follow these steps to decide between Type 1 and Type 2 :

1. Analyse Reality : Is the condition really possible in the near future ? (e.g., “If the council organizes a clean-up next month...”) → Type 1.
2. Analyse Imagination : Is the condition imaginary, hypothetical, or false now ? (e.g., “If I were the Minister of Environment...” or “If everyone sorted their waste today...” — but they don’t) → Type 2.
3. Check Verb Forms :
 - Type 1 : No ‘will’ in the If-clause ! (Incorrect : *If it will rain... → Correct : If it rains...)
 - Type 2 : Use were for I, he, she, it in formal writing (If I were you...).

ATTENTION Common Traps – Bac Technique Focus

- Trap 1 : Future in the If-clause. Never use will/would after If.
 - Wrong : *If the rain will stop, we will plant trees.

- Right : If the rain stops, we will plant trees. (Type 1)
- Trap 2 : 'Was' vs 'Were' in Type 2. In formal English (exams), always use were for I/he/she/it.
 - Informal : If I was you...
 - Formal / Exam : If I were you, I would recycle.
- Trap 3 : Confusing Type 2 and Type 3. Type 2 = present/future hypothetical (If + Past Simple, would + base verb). Type 3 = past hypothetical (If + Past Perfect, would have + past participle). Type 3 is not required in this unit. Do not use would have here.

EXAMPLE Nuance in Context : Cameroon Policy

Compare these two sentences about the plastic packaging regulation :

1. Type 1 (Real / Political Will) : "If the government enforces the 2014 regulation strictly, plastic pollution will decrease."
 - Meaning : Enforcement is a real possibility. The speaker believes it can happen.
2. Type 2 (Hypothetical / Criticism) : "If the government enforced the regulation strictly, plastic pollution would decrease."
 - Meaning : The government is NOT enforcing it strictly now. This is a dream or a piece of advice.

EXERCICE RÉSOLU 4 Grammar Application : Conditionals & Data

Context : In Yaoundé, only a small percentage of household waste is formally recycled. Imagine the current recycling rate is about 10% of the roughly 550,000 tons produced each year. Task : Write two sentences using this data : one Type 1 (realistic plan), one Type 2 (ideal scenario).

SOLUTION

Solution :

1. Type 1 (Real Plan) : "If the recycling rate reaches 20% next year, the city will recycle about 110,000 tons of waste instead of 55,000."
 - Reasoning : Reaching 20% is a realistic target (doubling the current rate). Present Simple (reaches) + will + base verb. Calculation : $550\,000 \times 20\% = 110\,000$ tons.
2. Type 2 (Ideal Scenario) : "If the recycling rate reached 50%, about 275,000 tons of waste would be recycled every year."

- Reasoning : 50% is currently imaginary/utopian. Past Simple (reached) + would be + past participle (passive). Calculation : $550\,000 \times 50\% = 275\,000$ tons.

3.5 Data Visualization : Waste Composition & Conditionals

Figure 1 : Estimated composition of household waste in Yaoundé (indicative values, in %). Organic waste (about 50%) represents a huge potential for composting — If everyone composted, landfill volume would drop (Type 2). Plastic (about 20%) requires sorting to boost recycling — If households sort their waste, recycling rates will increase (Type 1).

ATTENTION Reading a Bar Chart in English

When you describe a chart at the Bac technique, always :

- Name the subject and the unit (“The chart shows the composition of household waste, in per cent.”).
- Identify the highest and lowest values (use the superlative : “Organic waste is the largest category.”).
- Compare categories (“Plastic is twice as high as metal.”).
- Draw a conclusion linked to the lesson (“This is why composting should be encouraged.”).

3.6 Grammar Extension : Advanced Adjective Structures

The syllabus requires mastery of degree structures to emphasise environmental urgency.

PROPRIÉTÉ Advanced Structures with Adjectives

Structure	Form	Meaning / Example (Environment)
How + Adjective	How + Adj + subject + verb !	Exclamation / strong feeling. How serious the erosion in Limbé is!
Too + Adj + To + V	too + Adj + to + base verb	Negative consequence : excess prevents action. The landfill is too full to accept more trucks.
Adj + Enough + To + V	Adj + enough + to + base verb	Positive sufficiency. The compost is rich enough to fertilize the fields.
So + Adj + That	so + Adj + that + clause	Emphasis on the result. The heat was so intense that crops failed.
The Superlative	the most + Adj / the + Adj -est	Comparing three or more items (extreme degree). Climate change is the biggest threat to the Sahel.

ATTENTION Degree Structures : Common Errors

- Too vs Very : Too implies a negative result (something cannot be done). Very is just intensity.
 - Correct : The water is too polluted to drink. (Result : we cannot drink it.)
 - Illogical : *The water is too clean to drink.
- Position of Enough : the adjective comes before enough (strong enough, NOT *enough strong). But enough comes before a noun : enough bins, enough money.
- Superlative + Present Perfect : often used with ever : "The hottest year we have ever recorded."
- Irregular superlatives : good → the best ; bad → the worst ; far → the farthest/furthest.

EXERCICE 10 Practice : Transform Using the Structures

Rewrite the sentences using the word(s) in brackets.

1. The deforestation rate is alarming. (How)
2. The plastic bags are very thin. They tear easily. (Too ... to)
3. The recycling plant is sufficiently modern. It can process metal. (Enough ... to)
4. Climate change is a bigger threat than pollution and erosion. (The biggest)
5. The drought was extremely severe. The harvests were lost. (So ... that)

CORRIGÉ Exercice Degree Structures

1. How alarming the deforestation rate is!
2. The plastic bags are too thin to be reused. (or : too thin to resist tearing.)
3. The recycling plant is modern enough to process metal.
4. Climate change is the biggest threat (of the three / of all).
5. The drought was so severe that the harvests were lost.

3.7 Guided Writing : “Solutions for My Neighbourhood”**MÉTHODE Writing a “Problem–Solution” Paragraph Using Conditionals**

Goal : Write a coherent paragraph (about 100–150 words) proposing solutions for a local environmental issue, mixing Type 1 and Type 2 conditionals.

Step 1 : Identify the Problem (Observation). Choose a specific issue : plastic litter in the streets, blocked gutters causing floods, smoke from burning trash, lack of bins.

Step 2 : Propose Real Actions (Type 1). Use If + Present Simple, ... will/can/must for things the community or the council can actually do. Ex : “If the council places more bins, people will stop littering.”

Step 3 : Express an Ideal Vision / Advice (Type 2). Use If + Past Simple, ... would/could for dreams or advice to citizens. Ex : “If everyone composted kitchen waste, our gardens would be greener.”

Step 4 : Add Emphasis (Degree Structures). Use How / Too / Enough / Superlative. Ex : “It is too dangerous to ignore this issue.” / “How clean our streets could be!”

Step 5 : Conclude with a Call to Action. Ex : “Let’s start sorting today.”

EXERCICE RÉSOLU 5 Model Paragraph : “Cleaning Up Mvog-Ada Quarter”

Topic : Waste management in a Yaoundé neighbourhood.

SOLUTION

In Mvog-Ada quarter, blocked gutters cause severe floods every rainy season. How serious the situation becomes when plastic bottles clog the drains! If the local council organizes monthly clean-up campaigns (Type 1), the water will flow freely. If residents stop throwing bags into the stream (Type 1), the risk of cholera will decrease. However, habits are hard to change. If I were the quarter chief (Type 2), I would fine anyone dumping waste illegally. If every household composted its organic peelings (Type 2), the amount of trash would drop by half. The Nkolfoulou landfill is too full to receive much more waste. We need a circular economy approach now. Let us act before the next rainy season.

Analysis of the Model :

- Type 1 (Real) : If the council organizes... will flow / If residents stop... will decrease.
- Type 2 (Hypothetical / Advice) : If I were... would fine / If every household composted... would drop.
- Degree : How serious... / too full to receive.
- Vocabulary : gutters, clog, cholera, composted, circular economy.

EXERCICE 11 Writing Task – Bac Technique Practice

Instruction : Write a composition of 150–180 words on the following topic : “Your school environment suffers from plastic pollution and erosion. Write a letter to the Principal proposing concrete solutions. Use First and Second Conditionals, Too/Enough/How structures, and environmental vocabulary from this lesson.”

Suggested Plan :

1. Salutation & Problem Statement : describe the issue (plastic, erosion) — use How / So...that.
2. Realistic Proposals (Type 1) : bins, an environment club, tree planting — If we plant trees, we will stop erosion.
3. Ideal Changes / Advice (Type 2) : behaviour change, banning single-use plastics — If students brought reusable bottles, we would reduce waste.
4. Urgency (Too/Enough) : The situation is too urgent to ignore.
5. Closing : formal sign-off (Yours faithfully, ...).

LESAVAIS-TU ?

Did You Know ? Cameroon Green Initiatives

- Plastic Regulation (2014) : Cameroon adopted a regulation against non-biodegradable plastic packaging (less than 60 microns thick). Enforcement remains the main challenge.
- Recycling Startups : In Douala and Yaoundé, young entrepreneurs collect plastic bottles, shred them, and produce ecological paving stones or polyester fibre for the textile industry — the circular economy in action!
- Sorting at Source : Some councils in Yaoundé have pilot projects for sorting at source (tri sélectif) with coloured bins (green = organic, yellow = plastic, blue = paper).
- The Great Green Wall : Cameroon participates in the African Union initiative to combat desertification in the Sahel by planting a belt of trees across the continent.

3.8 Integration & Remediation Checklist

Before moving to the next section, make sure you can :

- ☐ Explain **global warming**, **deforestation**, **landfill** and **circular economy** in English.
- ☐ Distinguish **Type 1** (Real : If + Present Simple → will) from **Type 2** (Unreal : If + Past Simple → would).
- ☐ Avoid putting will/would in the If-clause.
- ☐ Use **were** for all subjects in Type 2 (If I were...).
- ☐ Apply **Too...To**, **Enough...To**, **How + Adjective** and **superlatives** correctly.
- ☐ Read and comment on a simple bar chart using comparatives and superlatives.
- ☐ Write a structured paragraph mixing both conditionals about a local environmental issue.

4

ADVANCED ADJECTIVE STRUCTURES : DEGREE & COMPARISON (HOW + ADJ, TOO...TO, SUPERLATIVES)

In Section 3, we read texts about climate change, global warming and waste management, and we practised the first and second conditionals (If we recycle more, the city will be cleaner). To write and speak about these environmental problems convincingly, we now need a richer toolbox to express **degree** (degré) and **comparison** (comparaison) : how hot? too polluted? aware enough? This section gives you exactly that toolbox. You will learn to say not only The situation is serious but also How serious is the situation?, The water is too polluted to drink, and The youth are aware enough to act. These structures are frequent at the Probatoire and Baccalauréat technique, both in reading texts and in the writing paper.

4.1 Quick Revision : Comparatives and Superlatives

Before the new structures, let us fix the basics. Adjectives express qualities ; comparatives and superlatives express degrees of these qualities.

DÉFINITION Comparative and Superlative

The **comparative** compares two elements (hotter than, more dangerous than). The **superlative** designates the element with the highest degree in a group (the hottest, the most polluted).

Adjective type	Base	Comparative	Superlative
Short (1 syllable)	hot	hotter than	the hottest
Short ending in -y	dirty	dirtier than	the dirtiest
Long (2+ syllables)	dangerous	more dangerous than	the most dangerous
Long	polluted	more polluted than	the most polluted
Irregular	good / bad	better / worse	the best / the worst

EXEMPLE Environmental context

- March is hotter than December in Maroua.
- Douala is more polluted than Bafoussam because of traffic and industry.
- The Wouri river is one of the most polluted rivers in the region.
- Tramadol abuse is the most dangerous drug problem among young workers today.

ATTENTION Common errors

Never mix the two forms : *more hotter or *the most dirtiest are wrong. Double the final consonant of short adjectives after a single vowel : hot → hotter, big → bigger. And always use than after a comparative, never that or as.

4.2 How + Adjective : Exclamations and Indirect Questions

English uses **How + adjective** in two situations that students often confuse.

DÉFINITION How + adjective

How + adjective introduces either an **exclamation** (How beautiful!) or an **indirect inter-**

rogative clause (I wonder how difficult it is.).

1. The exclamation. Word order : How + adjective + subject + verb !

- How hot it is today! (Qu'il fait chaud aujourd'hui!)
- How serious the situation is!
- How dirty our school yard is!

2. The indirect question. After verbs like know, realize, wonder, see, understand, ask, the word order stays affirmative : how + adjective + subject + verb (no inversion, no question mark).

- Direct question : How serious is the situation?
- Indirect question : I realize **how serious the situation is**.
- We know **how dangerous** smoking is.
- The doctor explained **how harmful** tramadol is for the liver.

ATTENTION No inversion in indirect questions

Wrong : *I realize how serious is the situation. Correct : I realize how serious the situation is. In an indirect question, the subject comes before the verb, exactly like in a normal affirmative sentence.

4.3 Too + Adjective + To + Infinitive : Excess and Negative Result

Imagine a dustbin in the school yard. It is full of metal scraps. A student tries to lift it and fails. How do we describe this? The waste is **too heavy to lift**. The structure **too + adjective + to + infinitive** expresses an **excess** (excès) that produces a **negative or impossible result**.

PROPRIÉTÉ Equivalence of Too...to and So...that...not

Too + adjective + to + infinitive (excess, negative meaning) is equivalent to so + adjective + that + subject + cannot/could not + verb (consequence with negation) :

The water is too polluted to drink. ⇔ The water is so polluted that we cannot drink it.

EXEMPLE A numerical example from North Cameroon

The average temperature in Maroua reaches 38 °C in March.

- It is too hot to work outside at noon.

- It is so hot that workers cannot work outside between 12 p.m. and 3 p.m.

Both sentences carry the same message : the heat is excessive, so the activity is impossible.

MÉTHODE Transforming Too...to into So...that

1. Keep the same subject and the same adjective.
2. Replace too + adjective + to + verb by so + adjective + that + subject + cannot/could not + verb.
3. Check that the that-clause contains the negation (cannot, could not, do not) : this negation is the hidden meaning of too.

Example : The smoke is too thick to breathe. → Step 1 : subject the smoke, adjective thick.
Step 2 : The smoke is so thick that we cannot breathe. Step 3 : negation cannot present.
Correct.

ATTENTION Too is negative, very is neutral

A very frequent error is to confuse too (negative, excessive) with very (neutral intensity).
*He is too strong to lift it means He is so strong that he CANNOT lift it — absurd! Say He is strong enough to lift it or He is very strong. Use too only when the result is impossible or undesirable : The air in Douala is too polluted for morning sports.

4.4 Adjective + Enough + To + Infinitive : Sufficiency and Positive Result

The opposite of too is **enough**. It expresses **sufficiency** (suffisance) and a **possible** result : The youth are **aware enough to act**. Note the position : enough comes **after** the adjective.

PROPRIÉTÉ Position of enough

Enough follows the adjective (adjective + enough : strong enough, clean enough) but precedes the noun (enough + noun : enough time, enough bins, enough information).

EXEMPLE Contextual examples

- The students are responsible enough to sort the waste. (adjective + enough)

- We have enough bins to separate plastic from paper. (enough + noun)
- The well is clean enough to provide drinking water.
- Is the clinic big enough to receive all the patients?

ATTENTION No to without an infinitive

Do not add to after enough when there is no infinitive verb : We have enough time (not *enough to time). And never place enough before the adjective : *enough strong is wrong ; say strong enough.

4.5 So + Adjective + That + Clause : Consequence

We have already met so...that as the equivalent of too...to. It is a general structure of **consequence** (conséquence) : so + adjective + that + clause.

- Climate change is **so rapid that** adaptation is difficult.
- The flood was **so violent that** the bridge collapsed.
- Tramadol is **so addictive that** many young workers cannot stop.

The figure below summarises the whole system of degree structures.

Mind map of degree structures : too...to (excess, negative result) and its equivalent so...that...not; above, the two uses of how + adjective.

LESAVAIS-TU ? How come ?

In informal spoken English, *How come ?* replaces *Why ?* but keeps the affirmative word order : *How come you are late ?* (*Pourquoi es-tu en retard ?*). Compare : *Why are you late ?* (inversion) versus *How come you are late ?* (no inversion). Very useful for the Speaking paper !

4.6 Solved Exercise and Guided Practice**EXERCICE RÉSOLU 6 Rewriting a report sentence**

Énoncé — Rewrite this sentence from an environmental report in two different ways : The air in Douala is very polluted ; people with asthma cannot go out during traffic peaks. Use (a) *too...to* and (b) *so...that*.

SOLUTION

Solution détaillée. (a) Identify the adjective (polluted) and the impossible action (go out) : The air in Douala is too polluted for asthmatic people to go out during traffic peaks. (b) Apply the method : keep the subject, use *so + adjective + that* and put the negation in the *that*-clause : The air in Douala is so polluted that asthmatic people cannot go out during traffic peaks. Both sentences are grammatically correct and stylistically richer than the original.

EXERCICE RÉSOLU 7 How + adjective

Énoncé — Transform the direct question into an indirect question after The journalist wants to know... : How dangerous is tramadol for young workers ?

SOLUTION

Solution détaillée. In an indirect question there is no inversion and no question mark. The subject (tramadol) comes before the verb (is) : The journalist wants to know how dangerous tramadol is for young workers.

EXERCICE 12 Transformation practice

Rewrite each sentence using the structure in brackets.

1. The school yard is very dirty ; we cannot play football there. (*too...to*)
2. The students are very motivated ; they can organise a clean-up day. (*adjective + en-*

ough + to)

3. The heat in the Far North is extreme ; farmers start work at 5 a.m. (so...that)
4. How serious is global warming? The minister wonders... (indirect question)
5. The rubbish heap is very high ; the children cannot climb over it safely. (too...to then so...that...not)

CORRIGÉ Exercice : Transformation practice

1. The school yard is too dirty to play football there. (or : ...too dirty for us to play football there.)
2. The students are motivated enough to organise a clean-up day.
3. The heat in the Far North is so extreme that farmers start work at 5 a.m.
4. The minister wonders how serious global warming is. (no inversion)
5. The rubbish heap is too high for the children to climb over safely. / The rubbish heap is so high that the children cannot climb over it safely.

EXERCICE 13 Contextual application : describe your environment

Write five sentences about the following situations, using a different degree structure each time (comparative, superlative, how + adjective, too...to, enough...to) :

1. the state of your school yard after the rainy season ;
2. the air quality in Douala or Yaoundé during rush hour ;
3. the danger of tramadol for young apprentices ;
4. the temperature in your region in March ;
5. the motivation of your classmates to protect the environment.

CORRIGÉ Exercice : Contextual application (sample answers)

1. After the rainy season, our school yard is muddier than the football pitch. (comparative)
2. Rush hour is the most polluted moment of the day in Douala. (superlative)

3. We all know how dangerous tramadol is for young apprentices. (indirect question)
4. In March, it is too hot to study in the classroom at noon. (too...to)
5. My classmates are motivated enough to plant trees around the school. (enough...to)

À RETENIR**Key points of the section**

- Comparatives : hotter than, more dangerous than ; superlatives : the hottest, the most polluted.
- How + adjective : exclamation (How hot it is!) or indirect question without inversion (I know how dangerous it is).
- Too + adjective + to + infinitive = excess, negative result $\iff$ so + adjective + that + cannot.
- Adjective + enough + to + infinitive = sufficiency, positive result ; but enough + noun.
- So + adjective + that + clause expresses a consequence.

These structures will be your main tools in Section 5, where you will write a full composition about an environmental issue and carry out the integration project : describing a real problem, evaluating its degree of seriousness, and proposing realistic actions.

5 WRITING & INTEGRATION : FROM ANALYSIS TO ACTION (COMPOSITION & PROJECT)

In the previous section, we mastered advanced adjective structures to express degree and comparison precisely. Now, we bring together **all** the grammar, vocabulary, and functions from this module — Relative Clauses, Reported Speech, Conditionals, and Adjective Structures — to produce coherent, high-level written compositions and carry out an integrated project. This is the ultimate test of your communicative competence for the Probatoire and Baccalauréat Technique.

5.1 Analysing Examination Prompts (Sujets Types Bac/Probatoire)

Understanding the **task**, **format**, **audience**, and **register** is the first step to success. Technical exam questions typically fall into three main formats within this module.

EXEMPLE**Common Exam Formats for Module 3**

1. Formal Letter (Administrative / Civic Action)

- Prompt : “Write a letter to the Mayor of your council about the poor waste management in your neighbourhood. Propose concrete solutions.”
- Format : Sender’s address, Date, Receiver’s address, Subject line, Formal salutation (Dear Sir/Madam), Body (3–4 paragraphs), Formal closing (Yours faithfully), Signature.
- Register : Formal, polite but firm, persuasive.

2. Magazine / Newspaper Article (Awareness / Opinion)

- Prompt : “Write an article for your school magazine on “The Dangers of Drug Abuse among Youths”.”
- Format : Catchy Title, By-line (By [Name], Form/Class), Introduction (Hook), Body (Arguments + Examples), Conclusion (Call to action).
- Register : Semi-formal, engaging, informative, slightly persuasive.

3. Speech / Talk (Ceremonial / Advocacy)

- Prompt : “As the President of the Environmental Club, deliver a speech on World Environment Day (June 5th) on the theme : “Beat Plastic Pollution”.”
- Format : Protocol (Recognising authorities), Hook (Quote/Statistic), Thesis, Body (PEEL paragraphs), Conclusion (Rallying cry/Call to action), Thanks.
- Register : Oral style (rhetorical questions, direct address “Dear friends”, repetition, inclusive “we/our”), inspiring, authoritative.

ATTENTION Decoding the Prompt – Pièges Fréquents

- Ignoring the Role/Persona : If the prompt says “As a Health Prefect...”, you must write in the first person (“I”) and use the authority of that role.
- Missing the Target Audience : Writing a letter to the Mayor requires formal administrative language (“I wish to draw your attention to...”), not slang or over-familiarity.
- Word Count : Respect the limit (usually 250–300 words for Bac Tech). Writing 400 words wastes time and risks penalisation for lack of concision; writing 150 words lacks development.
- Off-topic : “Waste management” ≠ “Deforestation”. Stay focused on the specific issue (drugs, diseases, waste, climate).

5.2 The Architecture of a High-Scoring Composition

A well-structured composition follows a logical funnel : General → Specific → General.

Structure type d'une composition d'examen (250–300 mots). La flèche centrale représente la Thesis Statement qui irrigue les trois paragraphes de développement.

DÉFINITION Thesis Statement (Phrase Thèse)

Une **Thesis Statement** résume l'argument principal de la composition en une seule phrase, généralement placée à la fin de l'introduction. Elle annonce le plan (souvent 3 points).

- Weak : "There are many problems with waste in Cameroon." (Trop vague, pas de plan).
- Strong : "Effective waste management in Cameroon requires strict law enforcement, community recycling initiatives, and environmental education in schools." (Clair, argumenté, plan en 3 points = 3 paragraphes Body).

MÉTHODE La Méthode PEEL pour les paragraphes de développement

Chaque paragraphe Body doit suivre la structure PEEL :

1. P – Point (Phrase Sujet) : Une phrase claire qui annonce l'idée unique du paragraphe.
Ex : "Firstly, weak enforcement of existing laws worsens plastic pollution."
2. E – Evidence (Preuve / Exemple) : Donnée chiffrée, fait local précis, citation, exemple camerounais. Ex : "In Yaoundé, only 30% of waste is collected regularly (HYSACAM 2022 report)."

3. E – Explanation (Analyse) : Explique POURQUOI et COMMENT la preuve soutient le point. Ex : "This low rate forces citizens to burn or dump trash in streams, blocking drainage systems."
4. L – Link (Transition) : Relie au paragraphe suivant ou revient à la thèse. Ex : "Consequently, these blocked drains lead to devastating floods during the rainy season." (Transition vers Body 2 : Effects).

5.3 Cohesion & Coherence : Logical Connectors (Connecteurs Logiques)

Examiners reward **cohesion** (linking words) and **coherence** (logical flow). Avoid basic connectors ("and, but, because, also"). Upgrade to B2/C1 level.

PROPRIÉTÉ

Connecteurs Essentiels pour l'Argumentation (Niveau Bac Tech)

Fonction	Connecteurs (Mots de liaison)	Exemple Contextualisé (Module 3)
Addition / Renforcement	Furthermore, Moreover, In addition, What is more, Besides	"Moreover, recycling creates green jobs for unemployed youths."
Contraste / Concession	However, Nevertheless, Although / Even though + Clause, Despite / In spite of + Noun/-ing, On the one hand... On the other hand	"Although the 2014 plastic ban exists, nevertheless, thin bags flood markets."
Cause / Effet	Consequently, Therefore, As a result, Thus, Hence, Due to / Owing to + Noun	"Drains are blocked; consequently, floods destroy homes in Douala."
Condition / Hypothèse	Provided that, As long as, Unless, If (Cond 1/2)	"Provided that funds are released, the recycling plant will open."
Exemplification	For instance, For example, Such as, Namely, A case in point is	"A case in point is the "Eco-Collect" initiative in Buea."
Conclusion	To conclude, In conclusion, Ultimately, All things considered	"Ultimately, a clean Cameroon is everyone's responsibility."

ATTENTION**Erreurs de Cohésion – Pièges à Éviter**

- Le "And/But/So" Syndrome : Ne commencez jamais une phrase par "And", "But", "So" dans une composition formelle. Utilisez "Furthermore", "However", "Therefore".
- Mauvaise ponctuation des connecteurs : "However" (adverbe conjonctif) → Point-virgule avant, virgule après. "Although" (conjonction) → Pas de virgule avant si en milieu de phrase.
- Correct : "The law exists ; however, it is ignored." / "Although the law exists, it is ignored."
- Répétition lexicale : Variez : **waste / garbage / trash / rubbish / refuse / litter** (déchets,

ordures, détritrus). **Solutions / mesures / strategies / remedies / actions.**

5.4 Grammatical Integration Checklist (La Check-list de Révision)

C'est ici que vous gagnez les points de **Grammaire** et **Vocabulaire**. Avant de rendre votre copie, cochez ces 5 cases. Si une case est vide, **réécrivez la phrase concernée**.

DÉFINITION Check-list d'Intégration Grammaticale Obligatoire (Cible : 5/5)

1. **Relative Clauses** (Min. 2) : Une définissante (sans virgule) + Une non-définissante (avec virgules).
2. **Reported Speech** (Min. 1) : Rapport d'expert, de témoin, ou de loi. Ex : "The Minister stated that stricter measures would be taken."
3. **First Conditional** (Real Future) (Min. 1) : Ex : "If the government enforces the law, pollution will decrease."
4. **Second Conditional** (Hypothetical Present) (Min. 1) : Ex : "If I were the Mayor, I would launch a composting programme."
5. **Advanced Adjective Structures** (Min. 2 structures différentes) :
 - **How + Adjective** (Exclamatif) : "How alarming the rate of deforestation is!"
 - **Too ... to + Verb** (Excès négatif) : "The waste is too toxic to handle without protection."
 - **So ... that / Such ... that** (Conséquence) : "It was such a severe drought that crops failed."
 - **Superlatif + Ever / Of all** : "The worst flood ever recorded in the Far North."

EXERCICE RÉSOLU 8 Intégration Grammaticale dans un Paragraphe

Sujet : "Write a body paragraph on solutions to plastic pollution."

Production élève (Brut) : "We must recycle. The government must ban plastic. People must clean. If we do this, Cameroon will be clean."

Analyse (Check-list) : 0 Relative, 0 Reported, 0 Cond 1, 0 Cond 2, 0 Adv Adj. Note : 4/20 (Grammaire).

Réécriture Intégrée (Cible 20/20 Grammaire) :

Furthermore, community recycling initiatives, which empower local women, offer a sustainable alternative. (Relative non-définissante ✓) The Director of HYSACAM recently announced that new sorting centres would open in 2025.

(Reported Speech ✓) If these centres are accessible, citizens will sort their waste at source. (Cond 1 ✓) If every household composted organic waste, landfill volume would drop by 50%. (Cond 2 ✓) How simple this habit seems, yet how powerful its impact! (How + Adj ✓) We must not be too passive to act; the future depends on us. (Too...to ✓)

5.5 Integrated Project : “Clean & Healthy School Campaign” (Projet Intégré)

This project synthesises **Speaking, Listening, Reading, Writing, Grammar, Vocabulary**. Work in groups of 4–5. Duration : 3–4 sessions.

MÉTHODE

Étapes du Projet “Clean & Healthy School Campaign”

1. Planning (Session 1) : Assign roles : Project Manager, Graphic Designer, Speech Writer, Journalist, Presenter. Choose a specific focus : “Zero Plastic”, “No to Drugs”, “Stop Cholera”.
2. Production (Session 2–3) : Create the 4 deliverables below. Every member contributes written text.
3. Presentation & Evaluation (Session 4) : Gallery Walk / Oral Defense. Peer assessment + Teacher Grid.

EXEMPLE

Les 4 Livrables (Deliverables) – Contraintes Grammaticales

1. Affiche de Sensibilisation (Poster) – Focus : Vocabulaire + Impératifs + Slogans
 - Visuel fort (Dessiné ou Canva/PPT).
 - 5 Impératifs variés : “Sort your waste!”, “Don’t litter!”, “Report leaks!”, “Use the bin!”, “Join the club!”.
 - Slogan avec How + Adj ou Too...to : “How clean our school can be!” / “Too precious to pollute.”
 - Vocabulaire module : **recycling bin** (poubelle de tri), **biodegradable** (biodégradable), **landfill** (décharge), **contamination** (contamination), **hygiene** (hygiène).
2. Discours du Délégué / Président de Club (Speech) – Focus : Reported Speech + Rhetorical Devices
 - 2–3 minutes oral.
 - Inclure au moins 2 Reported Speech : “The Principal emphasized that health is our wealth.” / “WHO warns that tobacco kills 8 million yearly.”

- Adresse directe : “Dear friends, imagine a school where...” (Cond 2).
 - Call to action final.
3. Article pour le Journal Scolaire (Magazine Article) – Focus : Conditionnels + Structures Adjectivales + PEEL
- Titre accrocheur. 250 mots.
 - Structure PEEL x 3.
 - 1 Cond 1, 1 Cond 2, 1 How+Adj, 1 Too...to, 2 Relatives.
 - Exemple titre : “How Green Can We Go? The Too Urgent to Ignore Truth About Our Playground.”
4. Présentation Orale de Groupe (Oral Defense) – Focus : Fluency + Interaction + Grammar Spotlight
- 5 min présentation + 3 min Q&A.
 - Chaque membre parle.
 - Le jury (classe/prof) note l'utilisation spontanée des structures cibles.

5.6 Self-Assessment & Remediation (Auto-évaluation & Remédiation)

Devenir autonome, c'est savoir où l'on perd des points pour les corriger **avant** l'examen.

DÉFINITION

Grille d'Auto-évaluation Critériée (Sur 20 – Standard Bac)

Utilisez cette grille pour noter votre propre composition (ou celle d'un pair) avant la correction prof.

Critère	Indicateurs de Réussite (Niveau "Bien" / 4/4)	/4
1. Contenu / Task Achievement	Répond exactement au sujet. Idées pertinentes, développées, exemples locaux (Cameroun). Ton/Registre adaptés.	
2. Organisation / Cohérence	Structure Intro/Body/Conclusion respectée. Paragraphes PEEL. Connecteurs variés (Add/Contrast/Cause/Cond). Thesis Statement claire.	
3. Grammaire / Structures	Check-list 5/5 validée (2 Relatives, 1 Reported, 1 Cond1, 1 Cond2, 2 Adv Adj). Phrases complexes, peu d'erreurs bloquantes.	
4. Vocabulaire / Lexique	Vocabulaire spécifique module (mitigation, resilience, withdrawal, contamination, landfill, enforcement...). Pas de répétition. Collocations justes.	
5. Orthographe / Ponctuation / Lisibilité	Mots usuels corrects. Majuscules/ponctuation anglaises respectées. Écriture lisible. Respect nombre de mots ($\pm 10\%$).	
TOTAL		/20

MÉTHODE**Procédure de Remédiation Ciblée (Post-Auto-éval)**

1. Identifiez la note la plus basse (ex : Grammaire 1/4).
2. Ciblez la lacune précise : "Je n'ai pas mis de Conditionnel 2" ou "Je confonds Although / However".
3. Action corrective immédiate (15 min) :
 - Grammaire : Refaire 3 exercices de transformation (Active → Passive, Direct → Reported, Cond 1 ↔ Cond 2) sur le manuel / OnBuch+.
 - Vocabulaire : Créer 5 phrases personnelles avec les 5 mots manquants (Flash-cards).
 - Structure : Réécrire un seul paragraphe faible en appliquant PEEL + Check-list grammaire.

4. Re-vérification : Re-noter ce paragraphe réécrit avec la grille.

ATTENTION Remédiation : Erreurs Systémiques Fréquentes en Terminale Tech

- Subject-Verb Agreement : “The effects of climate change is devastating” → are. (Le sujet est “effects”, pluriel).
- Article Usage : “The pollution is bad” (Général → Zéro article) vs “The pollution in our city is bad” (Spécifique → The).
- Prepositions après Adjectifs/Verbes : Interested in, Good at, Responsible for, Aware of, Depend on, Consist of.
- False Friends : “Actually” = En fait (pas Actuellement = Currently). “Eventually” = Finalement (pas Éventuellement = Possibly).

5.7 Exam Simulation : Timed Writing Practice (Entraînement Chronométré)

EXERCICE RÉSOLU 9 Sujet Type Bac Tech 2023 – Simulation 45 min

Prompt : “Write an article for your school magazine on “The Role of Youth in Fighting Climate Change in Cameroon”.” Length : 250–300 words. Constraints : Integrate 1 Relative, 1 Cond 1, 1 “Too...to”, Specific Vocab (mitigation, adaptation, resilience).

Plan Rapide (5 min) :

- Thesis : Youth are the driving force of climate action through education, innovation, and advocacy.
- Body 1 (Education/Awareness) : School clubs, Green Sahel. Vocab : mitigation, awareness.
- Body 2 (Innovation/Action) : Recycling startups, tree planting. Vocab : adaptation, resilience.
- Body 3 (Advocacy/Policy) : Voice at COP, pressure leaders. Grammar targets.

Modèle de Réponse (Corrigé Intégré) :

The Role of Youth in Fighting Climate Change in Cameroon

How crucial is the energy of youth in the battle for our planet’s survival? In Cameroon, where floods in the Far North and landslides in the West signal a climate emergency, young people who understand the stakes are no longer waiting for adults to act. They are the engine of mitigation (atténuation) and adaptation (adaptation).

Firstly, education builds resilience (résilience). School environmental clubs,

which multiply across the country, turn theory into practice. If students learn composting and tree planting today, they will protect their farms tomorrow. (Cond 1 ✓) For instance, the “Green Sahel” initiative sees thousands of youths planting acacia trees to stop desertification.

Moreover, innovation drives the circular economy. Young entrepreneurs in Douala and Yaoundé transform plastic waste into paving stones and fuel. If I were the Minister of Environment, I would subsidize these green startups massively. (Cond 2 ✓) The Minister of Youth recently declared that government grants for green projects would increase next year. (Reported Speech ✓)

However, advocacy remains too vital to ignore. Youths must not be too silent to influence policy. (Too...to ✓) Provided that they organise via social media and vote, they can force leaders to honour the 35% emission reduction pledge (NDC).

In conclusion, Cameroon’s climate future rests on its youth. Let us not be spectators of our own destiny. Plant a tree, recycle a bottle, raise your voice. The time is now.

Analyse du Corrigé : ~ 260 mots. Thesis claire. 3 Body PEEL. Check-list Grammaire : Relative (who understand, which multiply) ✓, Reported (declared that... would increase) ✓, Cond 1 ✓, Cond 2 ✓, Too...to ✓, How+Adj ✓. Vocab : mitigation, adaptation, resilience, desertification, circular economy, pledge, NDC. Connecteurs : Firstly, Moreover, However, In conclusion, Provided that.

LESAVAIS-TU ?

Le Cameroun et l'Action Climatique : Le Rôle des Jeunes

Le Cameroun a soumis sa CDN (Contribution Déterminée au niveau National) à l'ONU, s'engageant à réduire ses émissions de gaz à effet de serre de 35% d'ici 2030 (scénario conditionnel : avec appui international).

- Grande Muraille Verte : Initiative panafricaine (Sahara au Sahel). Au Nord-Cameroun, des milliers de jeunes (Lycéens, étudiants, associations) participent aux campagnes de reboisement (Acacia, Neem) pour fixer les dunes et restaurer les sols.
- Innovation Locale : Des startups comme “Kemit Ecology” (Douala) transforment les déchets ménagers en charbon écologique (briquettes), luttant contre la déforestation (bois de chauffe) et l'insalubrité.
- Données clés (Source : MINEDUB / HYSACAM / OMS) : Production annuelle de déchets solides ~ 6 millions de tonnes ; taux de collecte formelle ~ 30-40% dans les grandes villes (Yaoundé, Douala) ; le plastique représente ~ 10-15% du flux.
- Votre rôle : En tant qu'élèves de Terminale Technique, vous avez des compétences pratiques (électricité, mécanique, génie civil, commerce...). La transition écologique a besoin de techniciens : installateurs solaires, gestionnaires de déchets, agriculteurs climato-intelligents. Votre Bac Tech est un passeport pour l'économie verte !

EXERCICE 14 Entraînement Final – Épreuve Complète 45 min

Choisissez UN sujet. Respectez le format, le nombre de mots (250–300) et la Check-list Grammaticale (5/5).

Sujet A (Lettre Formelle) : Vous êtes le Président du Club “Health & Environment” de votre établissement. Écrivez une lettre au Ministre de la Santé Publique pour dénoncer la vente de drogues (Tramadol, cannabis, alcool frelaté) aux abords des écoles. Proposez 3 mesures concrètes.

Sujet B (Article Magazine) : “Turning Trash into Treasure : The Power of Recycling in Cameroon.” Article pour le journal de l’école. Montrez comment le recyclage crée de l’emploi, protège l’environnement et génère des revenus.

Sujet C (Discours) : “En tant que Délégué de la classe de Terminale, prononcez un discours lors de la Journée Mondiale de l’Environnement (5 Juin) sur le thème : “Notre École, Notre Planète : Zéro Plastique, Zéro Drogue, Zéro Déchet.””

Consigne : Écrivez votre production sur une feuille d’examen. Chronométrez-vous (45 min). Puis auto-évaluez-vous avec la Grille (5.6).

CORRIGÉ Exercice 5.7 – Pistes de Correction (Sujet B – Article)

Structure Attendue :

- Titre : Turning Trash into Treasure : The Power of Recycling in Cameroon.
- Intro : Hook (Stat : 6M tons waste/yr in CMR). Context : Urban pollution. Thesis : Recycling = Economic + Ecological + Social win.
- Body 1 (Economic/Jobs) : Point : Job creation. Evidence : Eco-Collect, Kemit Ecology. Explanation : Value chain (collection → sorting → processing). Link : But environment gains too.
- Body 2 (Environment) : Point : Less landfill/emissions. Evidence : Methane reduction, saved forests (charcoal alternative). Explanation : Circular economy. Grammar : If waste is sorted, methane will drop (Cond 1).
- Body 3 (Social/Community) : Point : Community pride/health. Evidence : Clean neighbourhoods = less cholera/malaria. Grammar : The Mayor stated that bins would be provided (Reported). How clean our streets become! (How+Adj).
- Conclusion : Restate. Call to Action : Sort at source. Final : Waste is too valuable to waste (Too...to).

Vérif Check-list : 2 Relatives? 1 Reported? 1 Cond 1? 1 Cond 2? 2 Adv Adj? Vocab : Value chain, landfill, methane, circular economy, sorting, processing.

6 ACTIVITÉ D'INTÉGRATION

7 ENVIRONMENT, WELL-BEING AND HEALTH : INTEGRATION PROJECT — « JEUNESSE, ASSAINISSEMENT ET PRÉVENTION »

7.1 Objectives of the Integration Activity

- Mobilise all linguistic skills of the unit : vocabulary (health, environment, addictions), grammar (relative clauses, reported speech, conditionals 1 & 2, advanced adjective structures : **how + adjective**, **too ... to**, superlatives).
- Develop the targeted savoir-faire : apply concepts to real-life situations and write and justify a process or conclusion.
- Produce a complete **multimedia advocacy campaign** : field survey (oral), technical policy brief (written), visual poster, and oral pitch.
- Assess transversal skills : teamwork, critical thinking, active citizenship, digital communication.

7.2 Context & Situation

Context : The Arrondissement Commune of **Nkolbisson** (Yaoundé 6) faces a dual health and environmental crisis. The Departmental Delegate for Environment, Nature Protection and Sustainable Development (MINEPDED) and the Departmental Delegate for Public Health (MINSANTE) jointly launch the Call for Projects « Youth, Sanitation and Prevention » targeting technical high schools in the arrondissement.

Simulated Real Data (based on typical local reports) :

Indicator	Nkolbisson Data — Etoudi / Melen Quarter
Illegal dumpsites	3 major unauthorized sites (one 50m from Nkolbisson Technical High School). Estimated volume : 15 tons/month.
Waste collection	HYSACAM coverage rate : 40%. Frequency : 1 pass/week (insufficient).
Malaria (declared cases at CSPS)	320 cases/month (45% children < 15 years). Peak in rainy season (stagnant water in waste).
Cholera / Typhoid	12 confirmed cases last quarter (link : polluted water / waste).
Tramadol / Tramol consumption	Anonymous school survey (2023) : 18% of Terminale students have used. Sales points : 3 call-boxes / kiosks < 200m from school.
Illicit alcohol (Odontol, Arki)	Easy availability. 2 unlicensed bars open from 6am near student entrance.
Municipal sanitation budget	5.000.000 FCFA/year (insufficient for bins + sorting center).

Mission : As Terminale Technique students (Civil Engineering, Electrotechnics, Commerce, Secretariat), you form **project teams (4–5 students)**. You must submit a **complete dossier** before the deadline (end of term). A jury (Teachers, Student Delegates, MINEPDED/MINSANTE Reps) will select the best project for a pilot grant of 500.000 FCFA.

7.3 Instructions & Timeline

Duration : 3 sessions (2h + 2h + 2h) + personal work.

7.4 Step 1 : Field Survey & Reported Speech (Session 1 – 2h)

- Preparation (Pairs) :** Design an interview grid (10 questions) for two targets :
 - Target A : School nurse (or Etoudi CSPS health worker) — focus : diseases linked to sanitation, observed addictions.
 - Target B : Local resident / parent / shopkeeper — focus : daily experience (smells, mosquitoes, insecurity, drug sales).
- Execution (Out of class / Dedicated slot) :** Conduct interviews (10 min each). Record (phone) or take detailed notes. **Key vocabulary to use :** breeding ground, stagnant water, waste disposal, drug abuse, peer pressure, withdrawal symptoms, rehabilitation, awareness campaign.
- Written Production (Class) :** Write a **survey report (150 words)** in **Reported Speech**.
 - Example : « The nurse **stated that** malaria cases **had increased** by 20% **due to** stagnant water in illegal dumps. »
 - Example : « A resident **reported that** drug dealers **sold** tramadol openly near the school gate. »
- Deliverable :** Audio file/notes + Written report (Submitted to teacher).

7.5 Step 2 : Data Analysis & Technical Diagnosis (Session 2 – 1h)

5. **Exploit the data table (above)** : Write the «**Diagnosis**» section of the Policy Brief (200 words).
6. **Mandatory Grammar Constraints** :
 - Minimum **3 Relative Clauses** (defining & non-defining). Ex : The illegal dumps **which are located near the school** attract mosquitoes.
 - Minimum **2 How + adjective structures**. Ex : **How critical** the situation is ! / **How urgent** action is needed !
 - Precise vocabulary : tonnage, prevalence rate, coverage ratio, hotspot, unlicensed premises.

7.6 Step 3 : Policy Brief — Conditional Scenarios & Argumentation (Session 2 – 1h + Homework)

6. Write the complete briefing note (2 pages max, font 12, 1.5 spacing) addressed to the Mayor of Nkolbisson. Imposed structure :
 - (a) **Title & Addressee**.
 - (b) **Executive Summary (5 lines)**.
 - (c) **Diagnosis (Step 2)**.
 - (d) **Key Testimonies** (Extract from Step 1 — Reported Speech).
 - (e) **Intervention Scenarios (Grammar : Conditionals)** :
 - **Scenario A (Short term — Conditional 1 — Real Future)** : « **If the Council provides** 10 additional bins and **organizes** weekly cleaning, **we will reduce** illegal dumping by 50% within 3 months. »
 - **Scenario B (Long term — Conditional 2 — Hypothetical)** : « **If the Council built** a local recycling center, **it would create** jobs for youth and **would stop** open burning. »
 - (f) **Final Argument (Adjective Structures)** : Mandatory use of :
 - **Too ... to** : « The risk is **too high to ignore**. »
 - **Superlative** : « This is **the most sustainable** solution for our community. »
 - **How + adj** (recall).
 - (g) **Concrete Action Plan (3 costed measures, responsible parties, deadlines)**.

7.7 Step 4 : Visual Production & Oral Pitch (Session 3 – 2h)

7. **Awareness Poster (A3 format — Canva / Paper)** : Catchy slogan + 3 key messages (Visuals + Short text). Themes : « Selective Sorting : I Sort, I Win » / « No to Tramadol, Yes to My Future » / « My Clean Quarter, My Pride ». **Constraint** : Include at least one **Too ... to** or **How + adj** structure on the poster.

8. Oral Pitch (3 min / team) : Project presentation to jury.

- 1 min : Problem statement (Data + Reported testimonies).
- 1 min : Solution (Conditional Scenarios + Action Plan).
- 1 min : Call to action (Strong argument : Superlatives, **How + adj**).

Criteria : Fluency, pronunciation, correct use of target structures, eye contact, time management.

7.8 Step 5 : Assessment & Remediation (Post-session)

- Assessment via criteria grid (out of 20) : Technical Content/Data (5) — Language Quality/Target Grammar (5) — Feasibility/Realism (5) — Creativity/Supports (5).
- Individual remediation : Feedback sheet per student targeting recurring grammar errors (e.g., Cond 1/Cond 2 confusion, omitted relative pronoun, incorrect backshifting).

7.9 Resources to Mobilise

DÉFINITION Relative Clauses

Defining (Restrictive) : Identifies the antecedent. No commas. Pronouns : **who** (people), **which** (things), **that** (people/things), **whose** (possession), **where** (place), **when** (time).
Ex : The bins which/that are full smell bad. Non-defining (Non-restrictive) : Adds extra info. Commas mandatory. **That** forbidden. Ex : The Nkolbisson Council, which lacks funds, cannot buy new trucks.

DÉFINITION Reported Speech — Main Backshifting Rules

Direct Speech	Reported Speech
Present Simple (« I live »)	Past Simple (« He lived »)
Present Continuous (« I am working »)	Past Continuous (« He was working »)
Present Perfect (« I have seen »)	Past Perfect (« He had seen »)
Past Simple (« I saw »)	Past Perfect (« He had seen »)
Will (« I will go »)	Would (« He would go »)
Can (« I can swim »)	Could (« He could swim »)
Time/Place : Now → Then, Today → That day, Here → There, Tomorrow → The next day.	

Rule : The reporting verb (said, told, reported, stated, explained) is usually past → triggers backshifting.

DÉFINITION Conditionals : Type 1 vs Type 2

- Type 1 (Real Future — Possible) : **If + Present Simple, ... Will + Base Verb**. Use : Promises, warnings, real plans. « If we clean the gutters, water will flow normally. »
- Type 2 (Hypothetical / Unreal Present) : **If + Past Simple (were for be), ... Would + Base Verb**. Use : Dreams, advice (« If I were you »), unlikely hypotheses. « If the Council built a center, it would solve the problem. »

DÉFINITION Advanced Adjective Structures

- How + Adjective (+ Subject + Verb) : Exclamation. Ex : How dangerous this waste is! / How urgent the need for action is!
- Too + Adjective + To + Verb : Negative excess → Impossibility. Ex : The dump is too dangerous to approach.
- Adjective + Enough + To + Verb : Sufficiency. Ex : The budget is large enough to buy bins.
- Superlative : **The most + adj (long) / The -est (short)**. Ex : The most effective measure. The cleanest area.

DÉFINITION Key Vocabulary — Memo

Health/Addictions : Substance abuse, addiction, withdrawal, overdose, peer pressure, rehabilitation, counselling, narcotics, tramadol, cannabis, alcohol abuse, liver damage, mental health. Environment/Waste : Illegal dumping, landfill, recycling, composting, waste sorting/segregation, incineration, carbon footprint, climate change, global warming, greenhouse effect, stagnant water, breeding ground, vector-borne diseases (malaria, cholera), sanitation, hygiene, HYSACAM.

7.10 Step-by-Step Solution & Commentary**EXERCICE RÉSOLU 10**

Model Production — Team « Green Tech Nkolbisson » (Simulated Correction) Step 1 : Survey Report Extract (Reported Speech) Context : Interview with Mr Atangana, Head Nurse CSPS Etoudi. The nurse stated that they received at least 15 malaria cases daily during the rainy season. He explained that the stagnant water in the illegal dump behind the school

was the main breeding ground. He added that three students had been brought in the previous month for tramadol overdose. He reported that they bought it at the kiosk near the gate.

Justification : **Receive** → **Received** (Past Simple), **Is** → **Was** (Present → Past), **Buy** → **Had bought** (Past Simple → Past Perfect), **Last month** → **The previous month**. Note : That optional but recommended for formal style.

SOLUTION

Step 2 : Diagnosis Extract (Relatives + How + Adj) The district of Nkolbisson faces a sanitation crisis that demands immediate intervention. How critical the situation is! Three major illegal dumps, which are located less than 100 meters from residential areas and the Technical High School, accumulate approximately 15 tons of waste monthly. The HYSACAM collection coverage, whose current ratio stands at only 40%, is insufficient to prevent open burning. Consequently, the prevalence rate of malaria, which is a vector-borne disease linked to stagnant water, reaches 320 cases per month at the local health center. How alarming these figures are for a school environment!

Analysis : 4 Relatives (that demands, which are located, whose current ratio, which is a vector-borne disease). 2 **How + Adj** (How critical, How alarming). Technical vocab : prevalence rate, vector-borne, coverage ratio, residential areas.

Step 3 : Policy Brief — Conditional Scenarios & Argument (Extract) Scenario A (Immediate Action — Conditional 1) : If the Municipal Council provides ten reinforced concrete bins at strategic hotspots and organizes a bi-weekly collection schedule with HYSACAM, we will reduce illegal dumping by 50% within the first quarter. This will allow students to attend school in a healthier environment.

Scenario B (Structural Solution — Conditional 2) : If the Council secured funding from FEI-COM or international partners (AFD, World Bank) and built a micro-recycling center managed by a youth cooperative, it would create decent jobs for unemployed graduates and would transform waste into resources (compost, plastic pellets). This would address both the environmental and the socio-economic roots of the crisis.

Final Argument : The current situation is too critical to ignore. The health of our youth is too precious to sacrifice on the altar of administrative inertia. How urgent the need for political courage is! Investing in sanitation today is the most profitable investment for the municipality's future. The cleanest neighbourhoods attract businesses and tourism. We urge the Mayor to adopt Scenario A immediately and launch the feasibility study for Scenario B.

Analysis : Cond 1 (provides/organizes → will reduce/will allow) : Concrete actions, existing budget. Cond 2 (secured/built → would create/would transform/would address) : Hypothesis of external funding, heavy structure. Adj structures : too critical to ignore, too precious to sacrifice, How urgent, the most profitable, The cleanest. All constraints met.

Step 4 : Poster Design (Textual Description — Canva Simulation)

Nkolbisson PROPRE : MON QUARTIER, MA FIERTÉ TOO DIRTY TO LIVE IN? ACT NOW!

[Recycle Logo]
TRIEZ
Plastiques / Organiques

[Pill + Cross]
NON AU TRAMADOL
Your brain is too
valuable to lose.

[Tree Icon]
1 ARBRE / ÉLÈVE
Reboisement berges
Mfoundi

Projet Terminale Tech - Lycée de Nkolbisson -
Partenariat MINEPDED / MINSANTE / Commune

Step 4 : Oral Pitch Script (3 min — Extract 1 min 30) « Good morning Honorable Jury, Dear Mayor's Representative. How critical is the situation in Etoudi today? Let me show you. [Shows malaria graph]. 320 cases monthly. If we do nothing, this number will double next year (Cond 1 prediction). Our team, who conducted interviews with the school nurse and residents (Relative), found that drug dealers operate 50m from our gate. The nurse reported that tramadol was sold like candy (Reported Speech).

Our proposal is simple. Scenario A : If the Council provides bins this month, we will organize student brigades for sorting (Cond 1). Scenario B : If a recycling center were built (Cond 2), it would employ 20 youths.

The cost of inaction is too high to pay. Our health is too precious to lose. How powerful youth action can be! We are ready to work. Thank you. »

Commentary : Time respected. All target structures present. Persuasive tone. Precise vocabulary.

7.11 Activity Review

À RETENIR

Validated Competencies

- Oral (Speaking/Listening) : Ability to conduct a survey (questionnaire design, interview, note-taking), report information in Reported Speech (mastered backshifting), present a structured project (Pitch) with fluency and technical vocabulary.
- Written (Reading/Writing) : Exploitation of real data to produce a standard technical document (Policy Brief) : precise diagnosis (Relatives, **How + adj**), prospective scenarios (Conditionals 1 & 2 discriminated), persuasive argumentation (**Too ... to**, Superlatives).
- Grammar in Context : Structures are no longer decontextualized exercises but tools for thought and action : relatives for precise diagnosis, reported speech for giving voice to actors, conditionals for simulating the future, adjective structures for impact.
- Transversal Skills : Teamwork (role distribution : investigator, writer, designer, spea-

ker), citizenship (ownership of local problems, concrete proposals), digital skills (Canva, audio recording, word processing).

ATTENTION Watch Points & Typical Remediation

- Conditional 1 vs 2 : Frequent error « If the Council will provide » (Incorrect). Remediation : Rule « Never will after if » (except rare volitional sense). Drill : If + Present → Future / If + Past → Would.
- Reported Speech : Forgotten backshifting on modals (can → could, will → would) and time/place markers (now, today, here). Remediation : Conversion table displayed in class during writing.
- Relative Clauses : Use of that in non-defining (« The Council, that lacks funds... »). Remediation : Comma test / removability. Which/Who mandatory with commas.
- Too ... to : Wrong positive meaning (« He is too strong to lift the box » = He is too strong to lift? No, structure = negative excess). Remediation : Systematic translation « Trop ... pour [pouvoir] ».
- Vocabulary : Confusion waste / waist, dump / damp, trial / trail. Remediation : Minimal pairs list for revision.

LESAVAIS-TU ? Local Anchoring & Follow-up

This project aligns with the National Development Strategy (SND30) and the Communal Development Plan (PCD) of Nkolbisson. The best Policy Briefs may be forwarded to the Mayor and the MINEPDED Delegate for real follow-up (FEICOM grant application, partnership with NGO Green Youth Cameroon). The Terminale Technique student thus moves from learner posture to local development actor, using English as a technical working language and a tool for civic advocacy.

8 MÉTHODES ET EXERCICES RÉSOLUS

8.1 Substance Abuse : Description and Relative Clauses

DÉFINITION Key vocabulary : substance abuse

drug abuse (abus de drogues), **addiction** (dépendance), **addict** (toxicomane), **tobacco** (tabac), **alcohol** (alcool), **peer pressure** (pression du groupe), **rehabilitation centre** (centre de désintoxication), **counsellor** (conseiller), **to quit smoking** (arrêter de fumer), **liver** (foie), **overdose** (surdose), **withdrawal** (sevrage).

MÉTHODE Building a complex sentence with a relative pronoun

Aim : Link two simple sentences to describe a person, a thing, a place, a time or a reason related to substance abuse.

1. Identify the antecedent (the noun common to both sentences). Ex : The teenager smokes. The teenager is my brother. → Antecedent = **the teenager**.
2. Choose the right relative pronoun :
 - **who / that** : person (subject) → The teenager who smokes...
 - **whom / that / Ø** : person (object) → The doctor (whom) I met...
 - **which / that** : thing/animal (subject or object) → The drug which destroys...
 - **whose** : possession → The man whose son is addicted...
 - **where** : place → The centre where they treat addicts...
 - **when** : time → The day when he quit...
 - **why** : reason → The reason why he started...
3. Delete the repeated noun (or personal pronoun) in the second sentence.
4. Place the relative clause immediately after the antecedent.
5. Punctuation : No comma if the clause is defining/restrictive (essential to the meaning). Commas if non-defining/non-restrictive (extra information). Note : that is never used in non-restrictive clauses.

Formula to remember : Antecedent + Relative Pronoun + Verb + Complements (no repetition)

EXEMPLE Dialogue : Talking about substance abuse

- Did you hear about the boy who was taken to hospital yesterday?
- Yes. He is the student whose father sells cigarettes near the school.
- The health club, which meets every Friday, is organising a talk on drug abuse.
- That is the reason why I joined it. Young people need information.

EXERCICE RÉSOLU 11 Joining sentences with relative pronouns (Bac type)

Task : Join the following pairs of sentences using the appropriate relative pronoun (who, which, whose, where, when, why). State whether the clause is restrictive (R) or non-restrictive (NR).

1. Alcohol damages the liver. The liver is a vital organ.
2. The counsellor helped my friend. Her father is an alcoholic.
3. The rehabilitation centre is far from here. Addicts receive treatment there.
4. Many young people start smoking at parties. Peer pressure is high there.
5. The year 2020 was difficult. The pandemic increased substance abuse then.
6. Dr. Smith gave a lecture. He is a specialist in addiction.

SOLUTION

Detailed solution :

1. Alcohol damages the liver, **which** is a vital organ. (NR – the liver is unique ; the information is additional). Note : that is impossible in a non-restrictive clause.
2. The counsellor **whose** father is an alcoholic helped my friend. (R – identifies which counsellor). Structure : whose + noun (father).
3. The rehabilitation centre **where** addicts receive treatment is far from here. (R – where = in which).
4. Many young people start smoking at parties **where** peer pressure is high. (R – where = at which).
5. The year 2020, **when** the pandemic increased substance abuse, was difficult. (NR – the year is already identified).
6. Dr. Smith, **who** is a specialist in addiction, gave a lecture. (NR – Dr. Smith is identified by his name).

Conclusion : The choice of pronoun depends on the nature of the antecedent (person/thing/place/time/reason/possession) and on its grammatical function inside the relative clause.

EXERCICE 15 Practice : Relative clauses

Join each pair of sentences with a suitable relative pronoun.

1. Cigarettes contain nicotine. Nicotine causes addiction.
2. The girl won the prize. Her essay was about alcohol abuse.
3. This is the hospital. Drug addicts are treated there.
4. 2015 was the year. Our school created an anti-drug club then.

CORRIGÉ Exercice : Relative clauses

1. Cigarettes contain nicotine **which/that** causes addiction.
2. The girl **whose** essay was about alcohol abuse won the prize.
3. This is the hospital **where** drug addicts are treated.
4. 2015 was the year **when** our school created an anti-drug club.

8.2 Preventing Communicable Diseases : Listening and Reported Speech

DÉFINITION Key vocabulary : preventing communicable diseases

communicable disease (maladie transmissible), **hygiene** (hygiène), **to wash one's hands** (se laver les mains), **to disinfect** (désinfecter), **vaccination** (vaccination), **symptom** (symptôme), **fever** (fièvre), **outbreak** (épidémie), **quarantine** (quarantaine), **health centre** (centre de santé), **to boil water** (faire bouillir l'eau), **contaminated** (contaminé).

MÉTHODE Converting direct speech into reported speech

Aim : Report advice, warnings or information about disease prevention without quoting word for word.

1. Identify the reporting verb (often in the past : **said**, **told**, **advised**, **warned**, **explained**, **asked**).
2. Apply the **backshifting** rule (one tense back) when the reporting verb is in the past :

Direct speech	Reported speech
Present Simple	Past Simple
Present Continuous	Past Continuous
Present Perfect	Past Perfect
Past Simple	Past Perfect
will	would
can	could
must / have to	had to
may	might

- Adapt personal and possessive pronouns (I → he/she, my → his/her, we → they, our → their).
- Adapt time and place markers : now → then, today → that day, yesterday → the day before, tomorrow → the next day, here → there, this → that, next Monday → the following Monday.
- Structure according to sentence type :
 - Statement : Subject + reporting verb + (that) + clause. (He said (that) he was sick.)
 - Wh-question : Subject + reporting verb + Wh-word + subject + verb (affirmative order). (She asked where the clinic was.)
 - Yes/No question : Subject + reporting verb + if/whether + clause. (He asked if I had a fever.)
 - Order/Advice : Subject + reporting verb + object + to-infinitive. (The nurse advised us **to wash** our hands.)

Exception : No backshifting if the fact is still true at the moment of reporting (The teacher said that water **boils** at 100°C).

EXERCICE RÉSOLU 12 Reporting a health talk (Bac type)

Task : Report the following statements made by a nurse during an educational talk in a technical school. Use the suggested reporting verbs.

- "Wash your hands regularly with soap," she advised the students.
- "I have disinfected the classrooms," she said.
- "Where is the nearest health centre?" a student asked.
- "Do not share personal items like towels," she warned them.
- "The vaccination campaign will start next Monday," she announced.

SOLUTION

Detailed solution :

1. She **advised** the students **to wash** their hands regularly with soap. Analysis : Order/Advice → advised + object + **to-infinitive**. your → their.
2. She **said** (that) she **had disinfected** the classrooms. Analysis : Statement. Present Perfect (have disinfected) → Past Perfect (had disinfected). I → she.
3. A student **asked where** the nearest health centre **was**. Analysis : Wh-question → asked + Wh-word + subject + verb (affirmative order). is → was (backshifting).
4. She **warned** them **not to share** personal items like towels. Analysis : Negative order → warned + object + **not to-infinitive**.
5. She **announced** (that) the vaccination campaign **would start the following Monday**. Analysis : Future statement. will start → would start. next Monday → the following Monday.

Conclusion : Faithfulness to the meaning matters more than word-for-word translation ; adapting deictics (persons, time, place) is crucial for the coherence of the report.

EXERCICE 16 Practice : Reported speech

Report these sentences. The reporting verb is in the past.

1. "Malaria is transmitted by mosquitoes," the doctor explained.
2. "We will organise a clean-up day tomorrow," the principal said.
3. "Have you washed your hands?" the teacher asked the pupils.
4. "Don't drink water from the stream," the nurse told the children.

CORRIGÉ Exercice : Reported speech

1. The doctor explained (that) malaria **was** transmitted by mosquitoes. (is also accepted : permanent fact.)
2. The principal said (that) they **would organise** a clean-up day **the next day**.
3. The teacher asked the pupils **if/whether** they **had washed** their hands.
4. The nurse told the children **not to drink** water from the stream.

8.3 Environmental Issues : Climate Change, Waste Management and Conditionals

DÉFINITION Key vocabulary : environment

climate change (changement climatique), **global warming** (réchauffement climatique), **recycling** (recyclage), **waste disposal** (élimination des déchets), **garbage collection** (ramassage des ordures), **landfill** (décharge), **biodegradable** (biodégradable), **carbon footprint** (empreinte carbone), **renewable energy** (énergie renouvelable), **waste management** (gestion des déchets), **pollution** (pollution), **dump site** (dépôt sauvage), **to sort waste** (trier les déchets).

MÉTHODE Using conditionals to express real or hypothetical consequences

Aim : Discuss climate change and waste management by distinguishing the probable from the imaginary.

1. Identify the nature of the situation :

- Real / Possible / Probable (future) : **First Conditional**. If we recycle, we will save resources.
- Unreal / Hypothetical / Imaginary (present/future) : **Second Conditional**. If I were the Minister, I would ban plastic bags.

2. Apply the strict structure :

Type	If-clause (condition)	Main clause (result)
First (real)	If + Present Simple	will / can / may / must + V
Second (unreal)	If + Past Simple (were for all persons)	would / could / might + V

3. Order of the clauses : If-clause, main clause (with a comma) OR main clause + if-clause (no comma).

4. Trap : Never put will/would in the if-clause. *If it will rain... → If it rains...

5. **Unless** = If... not : Unless we act, the situation will get worse. (= If we do not act...)

Bac formula : If + Present → Will + V | If + Past (were) → Would + V

EXERCICE RÉSOLU 13 Verb forms and choice of conditional type (Bac type)

Task : Put the verbs in brackets in the correct tense (First or Second Conditional). Briefly justify your choice.

1. If the factory (stop) dumping waste into the river, the water (be) clean again.
2. If everyone (use) public transport, carbon emissions (decrease) significantly.
3. What you / do if you (see) someone throwing plastic in the street?
4. Unless the government (invest) in recycling plants, the landfill (overflow) soon.
5. If I (be) you, I (start) composting organic waste immediately.

SOLUTION

Detailed solution :

1. If the factory **stops** dumping waste into the river, the water **will be** clean again. Justification : First Conditional. Real, possible future situation. If + Present Simple → will + V.
2. If everyone **used** public transport, carbon emissions **would decrease** significantly. Justification : Second Conditional. Hypothetical situation (not everyone does it now). If + Past Simple → would + V.
3. **What would you do** if you **saw** someone throwing plastic in the street? Justification : Second Conditional. Hypothetical question about an imaginary reaction.
4. Unless the government **invests** in recycling plants, the landfill **will overflow** soon. Justification : First Conditional. Unless = If not. Real threat based on a present condition.
5. If I **were** you, I **would start** composting organic waste immediately. Justification : Second Conditional. Classic piece of advice (If I were you). Were for all persons.

Conclusion : The First conditional expresses a commitment or a prediction (If we act now...); the Second expresses a wish, advice or simulation (If we acted now...).

EXERCICE 17 Practice : Conditionals

Complete with the correct form of the verbs in brackets.

1. If we (plant) more trees, the air (be) cleaner.
2. If I (have) a recycling bin at home, I (sort) my waste every day.
3. The floods (destroy) the crops if the rains (continue).
4. If people (not / throw) plastic everywhere, our town would be beautiful.

CORRIGÉ Exercice : Conditionals

1. If we **plant** more trees, the air **will be** cleaner. (First)
2. If I **had** a recycling bin at home, I **would sort** my waste every day. (Second)
3. The floods **will destroy** the crops if the rains **continue**. (First)
4. If people **did not throw** plastic everywhere, our town would be beautiful. (Second)

8.4 Advanced Adjective Structures : Degree and Comparison

MÉTHODE Mastering How + Adj, Too...To, Enough...To and the Superlative

Aim : Express intensity, excess/insufficiency and the supreme degree to describe environmental or health problems.

1. **How + Adjective (+ subject + verb)** : exclamation about degree.
 - How **serious** the pollution is!
 - How **difficult** it is to quit smoking!
2. **Too + Adjective + To-Infinitive** : excess → impossibility (negative meaning).
 - The water is **too polluted to drink**. (= so polluted that we cannot drink it).
 - He is **too weak to resist** peer pressure.
 - Warning : the subject of the main clause is the logical subject of the infinitive. If the subjects are different → Too... For + object + To. The box is too heavy **for me to lift**.
3. **Adjective + Enough + To-Infinitive** : sufficiency → possibility (positive meaning).
 - The measures are **strong enough to reduce** waste.
 - Enough comes after the adjective but before a noun : enough bins, enough money.
4. Superlative **The + most + long adjective / The + short adjective-est** : comparison within a group.
 - Climate change is **the most urgent** challenge of our time.
 - Plastic is **the worst** pollutant for oceans. (irregular : bad → worse → worst ; good → better → best)
5. Correlated structure **The + comparative..., the + comparative...** :
 - **The more** we recycle, **the less** waste we produce.

Golden rule : Too = negative (excess → not possible). Enough = positive (sufficient → possible). Very = neutral intensity only.

EXERCICE RÉSOLU 14 Sentence transformation and error correction (Bac type)

Task :

1. Rewrite with Too... To : The air is so polluted that we cannot breathe easily.
2. Rewrite with How + Adjective : It is very shocking to see the amount of waste.
3. Complete with the correct form (superlative or correlated comparative) : Deforestation is _____ (bad) environmental disaster in the region. The _____ (many) trees we cut, _____ (fast) the soil erodes.
4. Correct the errors : This chemical is enough dangerous to kill fish. / He is too strong to lift the box.

SOLUTION

Detailed solution :

1. The air is **too polluted to breathe** easily. (Or too polluted for us to breathe easily). So... that + negative → Too... to.
2. **How shocking** it is to see the amount of waste! Exclamation about degree.
3. Deforestation is **the worst** environmental disaster in the region. **The more** trees we cut, **the faster** the soil erodes. Analysis : irregular superlative bad → worse → worst. Correlation The more..., the faster....
4. Corrections :
 - This chemical is **dangerous enough to kill** fish. Lesson : enough comes after the adjective. *Enough dangerous is wrong.
 - He is **not strong enough to lift** the box (or too weak to lift it). Too strong would absurdly mean he is so strong that he cannot lift it.

Conclusion : The Too/Enough distinction radically changes the meaning (failure vs success). The superlative requires the + extreme form. The The... The... correlation structures cause-effect argumentation.

EXERCICE 18 Practice : Degree and comparison

1. Rewrite with enough : The water is not clean, so we cannot drink it.
2. Rewrite with too... to : The rubbish heap is so high that the truck cannot pass.
3. Complete : Yaoundé is one of _____ (polluted) cities in the country.
4. Complete : _____ (early) we act, _____ (good) it is for the planet.

CORRIGÉ Exercice : Degree and comparison

1. The water is **not clean enough to drink**.
2. The rubbish heap is **too high for the truck to pass**.
3. Yaoundé is one of **the most polluted** cities in the country.
4. **The earlier** we act, **the better** it is for the planet.

8.5 Writing and Integration : From Analysis to Action (Composition)**MÉTHODE** Writing an argumentative composition on the environment (Bac standard)

Aim : Produce a coherent text (150–200 words) on climate change or waste management, integrating the grammar of the unit (conditionals, relatives, reported speech) and specific vocabulary.

1. Analyse the topic : identify the **theme** (e.g. plastic waste), the **text type** (argumentative / problem-solution), the **audience** (community, authorities) and the **tone** (formal, persuasive).
2. Plan (5 min) : make a **three-part plan** :
 - Introduction : hook (shocking fact, question) → definition of the problem → **thesis statement** (e.g. Urgent action is needed to manage plastic waste through recycling and education.).
 - Body (2–3 paragraphs) : one main idea per paragraph.
 - Paragraph 1 : Causes/Effects (First Conditional : If we continue..., sea levels will rise. / Relative clauses : Factories which pollute...).
 - Paragraph 2 : Existing solutions (Reported Speech : Experts say that... / Modals : We must/should...).
 - Paragraph 3 : Personal/collective call to action (Second Conditional : If everyone recycled... / Too/Enough : It is not too late to act.).
 - Conclusion : summary → restated thesis → **opening** (future question, proverb, final appeal).
3. Write (25 min) : use **linking words** (Firstly, Furthermore, Consequently, However, For instance, In conclusion). Vary the structures (passive, conditionals, relatives).
4. Proofread (5 min) : check COPS : **C**apitalization, **O**rganization, **P**unctuation, **S**pelling and grammar (agreements, tenses, prepositions).

Bac criteria : Relevance + Coherence/Cohesion + Grammar/Vocabulary + Spelling/Punctuation.

EXERCICE RÉSOLU 15 Guided writing : "Managing Waste in Our Community" (Bac type)

Task : Write a composition of about 180 words on the following topic : "Effective waste management is a shared responsibility. Discuss the problems caused by poor waste disposal in your community and suggest practical solutions."

SOLUTION

Model answer (corrected) :

Effective Waste Management : A Shared Duty

Introduction : How shocking it is to see piles of garbage blocking drains in our neighbourhoods! Poor waste disposal has become a major environmental issue in many Cameroonian towns. It causes floods, spreads diseases like cholera and malaria, and pollutes the air we breathe. Effective waste management is not solely the government's duty; it requires active participation from every citizen.

Body 1 – Problems : Firstly, indiscriminate dumping blocks drainage systems. If heavy rains fall, the water will not flow, leading to devastating floods that destroy houses and roads. Moreover, decomposing waste attracts mosquitoes and rats which spread communicable diseases. The air becomes too polluted to breathe comfortably, affecting the health of children and the elderly.

Body 2 – Solutions : However, solutions exist. The authorities must provide enough public bins and regular collection trucks. Experts advise that recycling plants should be built to transform plastic and organic waste into useful products. If the government invested in these facilities, unemployment would decrease too.

Body 3 – Individual action : Citizens also have a role. We should sort our waste at home : organic waste for compost, plastic for recycling. The more we recycle, the cleaner our environment becomes. It is not too late to change our habits.

Conclusion : In conclusion, a clean environment is a healthy environment. Let us not wait for the next epidemic to act. As the saying goes, "Cleanliness is next to godliness." Together, we can make our community a model of sustainability.

Integrated grammar analysis :

- How shocking... (exclamation How + Adj).
- ...which spread... (restrictive relative clause).
- If heavy rains fall... will not flow (First Conditional).
- too polluted to breathe (Too + Adj + To).
- Experts advise that... (reporting verb + clause).
- If the government invested... would decrease (Second Conditional).
- The more... the cleaner (correlated comparatives).
- not too late to change (negation of Too... To).

Conclusion : This model respects the structure and the word limit, and naturally integrates the grammar points of the module.

8.6 Integration : Listening and Speaking Simulation

MÉTHODE Succeeding in the oral test : health talk simulation

Aim : Restitute heard information (Listening) and produce a structured oral exchange (Speaking) on prevention.

1. Before listening (preparation) : read the questions/grid. Predict the vocabulary (symptoms, prevention, vaccine, hygiene, outbreak, quarantine, immunity).
2. While listening (note-taking – **keywords only**) : do not write full sentences. Note : Who ? What ? Where ? When ? How many ? Key figures (dates, percentages). Use abbreviations (govt, hosp, prev, b/c, w/).
3. After listening (restitution / reported speech) : turn the notes into full sentences in reported speech. The speaker explained that... / He warned against... / She recommended...
4. Oral production (dialogue / talk) : use the PREP structure : **P**oint (opinion), **R**eason (cause), **E**xample (concrete example), **P**roposal (solution).
5. Interaction : use **language functions** : agreeing/disagreeing politely, asking for clarification, giving advice (If I were you...), expressing obligation (We must...).

Self-assessment grid : fluency / pronunciation / grammatical accuracy (conditionals, relatives, reported speech) / lexical richness / time management.

EXERCICE RÉSOLU 16 Oral presentation simulation : "Preventing Cholera in Schools" (Bac oral type)

Task : You are the class representative of a Terminale class. Using the notes below, give a two-minute talk to sensitise your classmates on cholera prevention. Use reported speech to quote the district nurse.

Notes (simulated listening) :

- District Hospital nurse : "Cholera spreads via contaminated water/food."
- "Wash hands with soap before eating/after the toilet."
- "Boil drinking water / use chlorine tablets."
- "Symptoms : acute watery diarrhoea, vomiting → dehydration → risk of death."
- "Report cases immediately → treatment is free."
- Statistics : 15 cases last month in the district ; 2 deaths (late reporting).

SOLUTION

Structured model talk (corrected) :

"Good morning Principal, Teachers, and fellow students.

Introduction : As the class representative, I want to share vital information from the district nurse regarding the cholera outbreak in our area.

Reported facts : The nurse **explained that** cholera **spreads** through contaminated water and food. She **warned** that the symptoms include acute watery diarrhoea and vomiting, **which** lead to severe dehydration and can cause death if untreated.

Statistics : She **revealed that** there **had been** 15 cases in our district last month, and sadly, 2 people **had died** because they **had reported** late.

Advice / Prevention : She **advised us to wash** our hands with soap before eating and after using the toilet. She **recommended boiling** drinking water or using chlorine tablets.

Call to action : **If we follow** these rules, we **will protect** ourselves and our families. **It is not too late to act**. Remember : treatment is free, so **do not hesitate to go** to the health centre immediately if you see symptoms.

Conclusion : Let us keep our school clean and safe. Thank you."

Targeted grammar items :

- explained that / warned that / revealed that / advised us to / recommended + V-ing (varied reported speech).
- which lead to (relative clause).
- had been / had died / had reported (backshifting to Past Perfect).
- If we follow... will protect (First Conditional – real possibility).
- not too late to act (Too... To structure).

8.7 Reading and Vocabulary : Climate Change and Waste Management Text Analysis

MÉTHODE Active reading strategies for technical texts (Bac reading comprehension)

Aim : Extract explicit and implicit information from a text on the environment (climate change, recycling) and mobilise specialised vocabulary.

1. Survey : read the title, subtitles, first and last paragraphs. Identify the **genre** (scientific article, report, blog, letter) and the **purpose** (to inform, to alert, to persuade).
2. Question : turn the headings into questions (What are the causes of...? How does recycling work?).
3. Active reading :
 - Skimming : fast reading for the general idea (main idea).
 - Scanning : targeted search (keywords, figures, proper nouns, bold/italic words).
4. Dealing with unknown vocabulary (inference) :
 - Context : The **landfill** was full, so they opened a new dump site. → landfill = dé-

charge.

- Word formation : **bi**odegradable, **re**cycle, **non**-renewable.
- Cognates (English/French) : pollution, environment, atmosphere, carbon, deforestation, erosion, biodiversity.

5. Typical Bac question types :

- Right/Wrong/Not mentioned (justify with a quotation).
- Wh-questions (short answers, words from the text).
- Vocabulary matching / synonyms in context.
- Grammar in context (find a conditional, a relative clause, a passive).
- Summary / title choice.

Golden rule : The answer is always in the text. Never bring outside knowledge for literal comprehension questions.

EXERCICE RÉSOLU 17

Reading comprehension : "The Plastic Crisis" (Bac type)

Task : Read the extract and answer the questions. "Global plastic production has doubled since 2000, reaching about 460 million tonnes in 2019. Only about 9% is successfully recycled. The majority ends up in **landfills** or **leaches** into rivers and oceans, threatening marine **biodiversity**. Microplastics have now entered the human food chain. If current trends continue, there will be more plastic than fish in the sea by 2050. Governments must implement Extended Producer Responsibility (EPR) schemes, which make manufacturers responsible for the end-of-life of their products. Citizens should reduce single-use plastics."

Questions :

1. Find the sentence which expresses a prediction based on a real condition (First Conditional). Quote it.
2. Find the relative clause defining "EPR schemes". Quote the clause only.
3. Explain the meaning of "leaches" in context. (Choose : A) flows slowly / B) burns quickly / C) disappears).
4. Rewrite using Too... To : The amount of waste is so huge that we cannot ignore it.
5. What does the pronoun "their" refer to in "their products" ?

SOLUTION

Detailed solution :

1. Quotation : "If current trends continue, there will be more plastic than fish in the sea

by 2050.” Justification : structure If + Present Simple (continue), ... will + be. A real prediction.

2. Clause : “which make manufacturers responsible for the end-of-life of their products”. Justification : restrictive relative clause (no comma) introduced by which (antecedent EPR schemes = thing), subject of the verb make.
3. Answer : A) flows slowly (s’infiltré, s’écoule). Justification : context “ends up in landfills OR leaches into rivers” : parallel end-points in water.
4. Rewrite : “The amount of waste is too huge to ignore.” (or too huge for us to ignore).
5. Reference : “their” refers to manufacturers (nearest plural antecedent, owner of the products).

Conclusion : Active reading combines grammatical spotting (conditionals, relatives) and contextual lexical inference.

ATTENTION The 5 mistakes that cost marks at the Bac

1. Conditionals : “If + will/would”. *If it will rain, I stay home. → If it rains, I will stay home. (Never a modal in the if-clause for the First/Second conditional.)
2. Reported speech : forgetting backshifting or deictics. *He said he is sick yesterday. → He said he was sick the day before. (Tense + yesterday → the day before.)
3. Relative clauses : doubling the subject/object. *The man who he is talking... → The man who is talking... / *The book which I read it... → The book which I read... (Delete the redundant pronoun.)
4. Too / Enough : position and meaning. *He is enough strong. → He is strong enough. Rule : Adjective + enough (positive) vs too + adjective (negative/impossible). Use for + object when the subjects differ.
5. Writing : off-topic / word count / no structure.
 - Writing 80 words instead of 180 = heavy penalty.
 - No visible paragraphs = loss of coherence marks.
 - Copying the topic as the introduction = no relevance mark.
 - Forgetting linkers (However, Therefore, For example) = choppy text.

Final tip : proofread your paper backwards (last sentence → first) to check only grammar and spelling without being distracted by the meaning.

EXERCICE 19 Integration task : end-of-unit evaluation

Situation : Your school is celebrating "Health and Environment Day". As a member of the English Club, you must contribute.

1. Speaking : prepare a one-minute dialogue with a partner about the dangers of tobacco and alcohol among students (use at least two relative clauses).
2. Grammar : report this sentence : "Our school will build an incinerator next year," the principal announced.
3. Writing : write a 150-word composition entitled "If everyone recycled, our town would change" using at least one First Conditional, one Second Conditional, one relative clause and one too...to structure.

CORRIGÉ Integration task : elements of correction

1. Possible dialogue : – Do you know students who smoke behind the classrooms? – Yes, and I know a boy whose health has been destroyed by alcohol. – That is the reason why our club organises this campaign.
2. Reported speech : The principal announced (that) their school **would build** an incinerator **the following year**.
3. Writing : expected elements – clear three-part plan ; If everyone recycled, our town would be cleaner (Second Conditional) ; If we do nothing, pollution will increase (First Conditional) ; the waste which litters our streets (relative) ; the problem is too serious to ignore (too...to) ; linkers ; correct spelling and punctuation.

9 EXERCICES

9.1 Key Vocabulary & Grammar Reminders

À RETENIR Relative Clauses

Defining relative clauses give essential information about the noun. No commas.

- Who / that : people (The nurse who works here is kind.)
- Which / that : things/animals (The waste which pollutes the river is plastic.)
- Whose : possession (The students whose school won the prize planted trees.)
- Where : places (Douala is a city where waste collection is a problem.)

Note : That can replace who/which in defining clauses. Never use that after a preposition or in non-defining clauses (with commas).

À RETENIR Reported Speech – Main Changes

Direct Speech	Reported Speech
Present Simple	Past Simple
Present Continuous	Past Continuous
Present Perfect	Past Perfect
Past Simple	Past Perfect
will	would
can	could
must	had to
now	then
today	that day
tomorrow	the next day
yesterday	the day before
here	there

Imperative → told/ordered/advised + object + to-infinitive (negative : not to). Questions → asked + if/whether (yes/no) or wh-word (open).

À RETENIR Conditionals : First vs Second

Type	Structure	Use / Meaning
First (Real)	If + Present Simple, will + base verb	Real possibility in the future.
Second (Unreal)	If + Past Simple, would + base verb	Hypothetical, unlikely, or impossible present/future.

Key tip : If I were you (not was) for advice. Were is used for all persons in formal grammar.

À RETENIR Adjective Structures : Degree & Comparison

- Too + adjective + to-infinitive : Excess, negative result. (The water is too dirty to drink.)
- Adjective + enough + to-infinitive : Sufficiency, positive result. (The campaign was effective enough to reach 5000 students.)
- How + adjective : Exclamation or embedded question about degree. (How deep is the well? / I was surprised at how high the heap was.)
- Superlative : The most + long adj / The + short adj + -est. With one of → one of the most dangerous diseases.
- So + adjective + that : Cause/Consequence (often replaces too...to). (The dump is so dangerous that children cannot play near it.)

DÉFINITION Key Vocabulary – Environment, Health & Waste Management

- Landfill (décharge contrôlée) : A site for the disposal of waste materials by burial.
- Leachate (lixiviat / jus de décharge) : Toxic liquid produced when water filters through waste.
- Biodegradable (biodégradable) : Capable of being decomposed by bacteria or other living organisms.
- Compost (compost) : Decayed organic material used as fertiliser.
- Recycling (recyclage) : Process of converting waste into reusable material.
- Incineration (incinération) : Destruction of waste by burning.
- Methane (méthane) : Gas produced by anaerobic decomposition of organic waste (greenhouse gas).

- Circular economy (économie circulaire) : Model where waste becomes a resource (reduce, reuse, recycle).
- Sustainability (durabilité) : Meeting present needs without compromising future generations.
- Communicable disease (maladie transmissible) : Illness caused by infectious agents transmitted between people/animals.
- Rehabilitation centre (centre de réadaptation) : Facility helping people recover from addiction.
- Substance abuse (abus de substances) : Harmful use of drugs, alcohol, or tobacco.

9.2 Je vérifie mes connaissances

EXERCICE 20 QCM : Grammar and vocabulary check

Choose the correct answer (a, b or c).

1. The man works at the health centre is my uncle.
a) which
b) who
c) whose
2. "I will clean the school tomorrow," the prefect said. The prefect said that he the school
a) will clean / tomorrow
b) would clean / the next day
c) cleaned / that day
3. If we recycle plastic, we pollution.
a) will reduce
b) would reduce
c) reduced
4. A material that can decompose naturally is called
a) biodegradable
b) toxic
c) synthetic
5. The water is dirty drink.

- a) too / to
- b) so / that
- c) enough / to

EXERCICE 21 True or False — justify your answer

Say whether each statement is True or False and justify with one sentence in English.

1. A relative clause introduced by whose expresses possession.
2. In reported speech, “today” becomes “tomorrow”.
3. The second conditional describes a real and probable situation.
4. Tobacco, alcohol and drugs are examples of substances that can be abused.
5. How + adjective is used to ask about the degree or measurement of something (e.g. How tall is the building?).

EXERCICE 22 Definitions

Define the following words in one complete English sentence each.

1. landfill
2. recycling
3. communicable disease
4. global warming
5. rehabilitation centre

EXERCICE 23 Quick transformations

1. Complete with the correct relative pronoun : “The river crosses our village is polluted.”
2. Put into reported speech : “Wash your hands regularly,” the doctor told us.
3. Complete with the superlative : “Cholera is one of (dangerous) diseases in the rainy season.”
4. Rewrite with too...to : “The bin is very small. It cannot contain all our waste.”

5. Complete the conditional : “If I were the mayor, I (build) more waste treatment plants.”

9.3 Je m’entraîne

EXERCICE 24 Relative clauses in context

Join each pair of sentences using a relative pronoun (who, which, whose, where).

1. The nurse works at the district hospital. She vaccinates children every week.
2. Douala is a city. Waste collection is a serious problem there.
3. The students planted trees. Their school won the environmental prize.
4. Plastic bags block the drains. They cause floods in the neighbourhood.
5. The campaign started last Monday. It sensitises youths against drug abuse.

EXERCICE 25 Reported speech practice

Report the following sentences. Begin as indicated.

1. “You must boil water before drinking it,” the nurse said.
The nurse advised us
2. “We collected two tons of plastic yesterday,” the club president said.
The club president said that
3. “Do you sort your waste at home?” the journalist asked me.
The journalist asked me
4. “Don’t throw garbage into the river,” the mayor ordered.
The mayor ordered the villagers
5. “I am organising a clean-up campaign next week,” she announced.
She announced that

EXERCICE 26 Conditionals : first and second

Complete each sentence with the correct form of the verb in brackets, then say whether it is a first or a second conditional.

1. If the government builds more landfills, pollution (decrease).

2. If I were you, I (stop) smoking immediately.
3. We (not / suffer) from cholera if we drank clean water.
4. If students plant trees this year, the school (become) greener.
5. If factories treated their waste, our rivers (not / be) so dirty.

EXERCICE 27 Degree and comparison

1. Rewrite using too...to : "The patient is very weak. He cannot walk alone."
2. Rewrite using enough...to : "The campaign was very effective. It reached 5000 students."
3. Ask a question with How + adjective about the depth of the well.
4. Complete with the superlative of the adjective in brackets : "Malaria is (common) communicable disease in our region."
5. Rewrite using how + adjective : "I was surprised by the height of the rubbish heap."
(Begin : I was surprised at how)

9.4 Je me prépare au Bac**EXERCICE 28 Type Bac – Grammar : transformations**

Rephrase each sentence as instructed. Do not change the meaning. (2 marks each)

1. The nurse said : "You must boil water before drinking it."
(Begin : The nurse advised)
2. "Plastic bags block drains. This causes floods."
(Join the two sentences using a relative pronoun.)
3. "We don't have enough bins. We cannot sort waste."
(Rewrite using too...to.)
4. "If we don't act now, the situation will get worse," the expert warned.
(Put the underlined part into reported speech. Begin : The expert warned that)
5. "The dump is extremely dangerous. Children cannot play near it."
(Rewrite using so...that.)
6. "Burning waste in the open air is forbidden," the mayor said.
(Begin : The mayor said that)

EXERCICE 29 Type Bac – Vocabulary : cloze test

Read the text below and fill in the ten gaps with the correct word chosen from the box. Each word is used only once. (1 mark each)

landfill	biodegradable	sorting	recycling	methane
leachate	incineration	compost	circular eco-nomy	sustainability

Waste Management in Douala

Every day, the city of Douala produces more than 1,500 tons of household waste. Most of it ends up in an open (1) at the outskirts of the city, where it pollutes the soil and the air. When it rains, a toxic black liquid called (2) flows out of the dump and contaminates the groundwater.

To solve this problem, the city council wants to promote the (3) of waste at home : families should separate (4) materials, such as food leftovers, from plastics and metals. Organic waste can be transformed into (5), a natural fertiliser that farmers can use in their fields. Plastics, glass and paper can be sent to (6) factories, where they are transformed into new products.

Some experts also suggest the (7) of non-recyclable waste in modern ovens, although this method can release dangerous gases. In addition, the gas (8), which is produced by decomposing waste, could be captured and used to produce electricity.

All these measures are part of a new model called the (9), in which waste becomes a resource instead of a problem. According to the mayor, this is the only way to guarantee the (10) of the city for future generations.

EXERCICE 30 Type Probatoire – Reading comprehension

Read the following text carefully and answer the questions in complete sentences.

The Green Sahel Initiative

In the far north of Cameroon, the advance of the desert threatens the lives of thousands of families. Every year, the dry season becomes longer, the rains become rarer, and the fertile land slowly turns into sand. To fight this phenomenon, the government, together with local communities and international partners, launched the Green Sahel Initiative in 2019.

The objective of the project is ambitious : to plant ten million trees in ten years along the northern border of the country. These trees, mostly acacias and neems, were chosen because they can survive with very little water. Their roots hold the soil together and prevent the wind from carrying it away. Moreover, their leaves provide shade for crops and food for animals.

But the initiative is not only about planting trees. In each village, young people are trained to manage nurseries, to dig wells and to build small dams that collect rainwater. Women

receive solar cookers, which reduce the need for firewood and therefore protect the few remaining forests. “Before, I walked five kilometres every day to find wood,” explains Aissatou, a mother of four from Maroua. “Now I cook with the sun, and I use my free time to sell vegetables at the market.”

The results are already visible. According to the Ministry of Environment, more than three million trees have been planted so far, and the survival rate has reached 70 per cent. Some villages that were almost abandoned five years ago are now green again, and children have returned to school because their parents no longer need them to fetch wood and water.

However, challenges remain. Climate change continues to accelerate, and the funds promised by international donors arrive slowly. “We cannot win this battle alone,” admits the national coordinator of the project. “If the whole world does not reduce its emissions, our trees will not be enough. But we have the duty to try, for our children and for our land.”

Questions

1. Name two problems caused by the advance of the desert in the far north of Cameroon. (literal)
2. Why were acacias and neems chosen for the project? Give two reasons. (literal)
3. What does the word “nurseries” (paragraph 3) mean in this context? (inferential – vocabulary in context)
4. What is the author’s attitude towards the Green Sahel Initiative : optimistic, pessimistic or balanced? Justify with one element from the text. (inferential)
5. Give a suitable title to paragraph 4. (synthesis)

EXERCICE 31 Type Bac – Writing : Composition

Choose ONE of the following topics and write a composition of about 150–180 words. Pay attention to paragraphing, linking words, and the grammar structures studied in this unit (relative clauses, conditionals, reported speech, adjective structures).

1. Topic A : “Waste management is everyone’s responsibility.” Write an article for your school magazine explaining the problems of waste in your community (Douala, Yaoundé, or your local town) and proposing concrete solutions (sorting, recycling, composting, sensitisation). Use at least one first conditional, one second conditional, and one relative clause.
2. Topic B : You attended a talk by a health expert on “The Dangers of Substance Abuse among Youths”. Write a report for your principal summarising the main points : types of substances (drugs, alcohol, tobacco), health consequences, and prevention strategies. Use reported speech to relay what the expert said (e.g., The expert warned that..., He advised students to...).

9.5 Corrigés

10 CORRIGÉS DES EXERCICES

10.1 Corrigés détaillés

CORRIGÉ Exercice 1 — QCM : Grammar and vocabulary check

1. b) who — The noun the man refers to a **person (personne)**, so the relative pronoun is **who (qui)** (or **that (que/qui)**). Which is for **things (choses)**, whose expresses **possession (possession)**.
2. b) would clean / the next day — In **reported speech (discours rapporté)** : will → would and tomorrow → the next day (le lendemain).
3. a) will reduce — **First conditional (première conditionnelle)** : If + Present Simple, will + base verb (real future possibility / possibilité réelle future).
4. a) biodegradable — By definition, a material that **decomposes naturally (se décompose naturellement)** (by bacteria or living organisms) is **biodegradable (biodégradable)**.
5. a) too / to — Structure **too + adjective + to-infinitive (trop + adjectif + infinitif)** expresses **excess with a negative result (excès avec résultat négatif)** : too dirty to drink (trop sale pour être bu).

CORRIGÉ Exercice 2 — True or False

1. True. Whose replaces a **possessive adjective (adjectif possessif)** (his, her, their) and expresses **possession (possession)** : The students whose school won the prize planted trees.
2. False. In **reported speech (discours rapporté)**, “today” becomes “**that day (ce jour-là)**” (“tomorrow” becomes “**the next day (le lendemain)**”).
3. False. The **second conditional (deuxième conditionnelle)** describes an unreal, hypothetical or unlikely situation (If + Past Simple, would + base verb) ; the **first conditional (première conditionnelle)** describes a **real, probable (réelle, probable)** one.
4. True. **Substance abuse (toxicomanie / abus de substances)** means the **harmful use (usage nocif)** of **psychoactive substances (substances psychoactives)**, which include **tobacco (tabac)**, **alcohol (alcool)** and **illicit drugs (drogues illicites)**.
5. True. **How + adjective** asks about **degree or measurement (degré ou mesure)** : How tall is the building ? How deep is the well ?

CORRIGÉ Exercice 3 — Definitions (suggested answers / réponses suggérées)

1. A **landfill (décharge / site d'enfouissement)** is a site where **waste materials (déchets)** are **buried in the ground (enterrés)** for **disposal (élimination)**.
2. **Recycling (recyclage)** is the **process (processus)** of **collecting (collecter)** used materials and **transforming them into (les transformer en)** new products instead of **throwing them away (les jeter)**.
3. A **communicable disease (maladie transmissible / contagieuse)** is an **illness (maladie)** caused by **infectious agents (agents infectieux)** (bacteria or viruses) that can be **transmitted (transmise)** from one person or animal to another.
4. **Global warming (réchauffement climatique)** is the **long-term rise (augmentation à long terme)** in the **average temperature (température moyenne)** of the Earth's climate, mainly caused by **human activities (activités humaines)** such as **burning fossil fuels (combustion de combustibles fossiles)**.
5. A **rehabilitation centre (centre de réadaptation / de désintoxication)** is a **facility (structure / établissement)** where people **receive treatment and support (reçoivent un traitement et un soutien)** to **recover from (guérir de / se remettre de)** drug, alcohol or tobacco **addiction (dépendance / toxicomanie)**.

Point de vigilance : a definition must be a **complete sentence (phrase complète)**, not a translation ; accept any grammatically correct sentence that gives the **essential meaning (sens essentiel)**.

CORRIGÉ Exercice 4 — Quick transformations

1. The river which/that crosses our village is polluted. (Thing (chose) → which/that.)
2. The doctor told us to wash our hands regularly. (Imperative → told + object + to-infinitive.)
3. Cholera is one of the most dangerous diseases in the rainy season. (Long adjective → the most + adjective ; note the **plural (pluriel)** "diseases" after one of.)
4. The bin is too small to contain all our waste.
5. If I were the mayor, I would build more waste treatment plants. (**Second conditional (deuxième conditionnelle)** : If + Past Simple, would + base verb.)

CORRIGÉ Exercice 5 — Relative clauses in context

1. The nurse who/that works at the district hospital vaccinates children every week. (Person (personne) → who.)
2. Douala is a city where waste collection is a serious problem. (Place (lieu) → where = in which.)
3. The students whose school won the environmental prize planted trees. (Possession → whose = their school.)
4. Plastic bags which/that block the drains cause floods in the neighbourhood. (Things (choses) → which/that.)
5. The campaign which/that started last Monday sensitises youths against drug abuse. (Thing (chose) → which/that.)

Point de vigilance : these are defining relative clauses (propositions relatives restrictives / définies) (essential information / information essentielle), so no commas (pas de virgules) are used, and that is possible for people and things.

CORRIGÉ Exercice 6 — Reported speech practice

1. The nurse advised us to boil water before drinking it. (Imperative → advised + object + to-infinitive ; must disappears in the infinitive form.)
2. The club president said that they had collected two tons of plastic the day before. (Past Simple → **Past Perfect (plus-que-parfait)** ; yesterday → the day before (la veille) ; we → they.)
3. The journalist asked me if/whether I sorted my waste at home. (Yes/no question → asked + if/whether ; **statement word order (ordre affirmatif)**, no question mark ; Present → Past.)
4. The mayor ordered the villagers not to throw garbage into the river. (Negative imperative → ordered + object + not to-infinitive.)
5. She announced that she was organising a clean-up campaign the following week. (Present Continuous → **Past Continuous (passé progressif)** ; next week → the following week (la semaine suivante).)

Point de vigilance : in **reported questions (questions rapportées)**, keep the affirmative word order (ordre affirmatif) (asked me if I sorted, never if did I sort).

CORRIGÉ Exercice 7 — Conditionals : first and second

1. If the government builds more landfills, pollution will decrease. — First conditional

(première conditionnelle) (real future possibility / possibilité réelle future).

2. If I were you, I would stop smoking immediately. — Second conditional (deuxième conditionnelle) (hypothetical advice / conseil hypothétique ; note were, not was).
3. We would not suffer (wouldn't suffer) from cholera if we drank clean water. — Second conditional (deuxième conditionnelle) (unreal present / présent irréel : we do not drink clean water).
4. If students plant trees this year, the school will become greener. — First conditional (première conditionnelle) (real future possibility / possibilité réelle future).
5. If factories treated their waste, our rivers would not be (wouldn't be) so dirty. — Second conditional (deuxième conditionnelle) (unreal present / présent irréel : factories do not treat their waste).

Point de vigilance : never use will or would in the if-clause : If the government builds..., not If the government will build....

CORRIGÉ Exercice 8 — Degree and comparison

1. The patient is too weak to walk alone. (**Too + adjective + to-infinitive.**)
2. The campaign was effective enough to reach 5000 students. (**Adjective + enough + to-infinitive (adjectif + enough + infinitif)** — enough comes after the adjective.)
3. How deep is the well? (**How + adjective + inverted word order (inversion)** for a **direct question (question directe).**)
4. Malaria is the most common communicable disease in our region. (**Superlative (superlatif)** of a **long adjective (adjectif long)** : the most + adjective.)
5. I was surprised at how high the rubbish heap was. (Embedded exclamation / structure enchevêtrée : how + adjective + affirmative word order (ordre affirmatif), no inversion.)

Point de vigilance : contrast item 3 (direct question, inversion : How deep is...?) with item 5 (embedded structure / structure enchevêtrée, no inversion : ...how high the heap was).

CORRIGÉ Exercice 9 — Type Bac : Grammar transformations

Barème indicatif : 2 marks par item (1 mark for the correct structure, 1 mark for accuracy and unchanged meaning). Total : 12 marks.

1. The nurse advised us to boil water before drinking it.
 Attendu : imperative → advised + object + to-infinitive. Accept also advised that we

should boil water....

2. Plastic bags block drains, which causes floods.

Attendu : **non-defining relative clause (proposition relative non restrictive / explicative)** with which referring to the **whole first clause (proposition principale entière)** ; the **comma (virgule)** is compulsory here.

3. We have too few bins to sort waste.

Attendu : too + adjective (few) + to-infinitive. Accept also Our bins are too few for us to sort waste.

4. The expert warned that if they didn't act then, the situation would get worse.

Attendu : full **backshift (report du temps)** inside the conditional : don't → didn't, now → then, will → would. The first conditional becomes a "reported" conditional with past forms.

5. The dump is so dangerous that children cannot play near it.

Attendu : **So + adjective + that-clause (so + adjectif + que)** ; the meaning (**impossibility (impossibilité)**) must be preserved.

6. The mayor said that burning waste in the open air was forbidden.

Attendu : Present Simple → Past Simple (is → was) ; the **gerund subject (sujet gérondif)** burning waste is kept.

Points de vigilance (Bac) : the meaning must not change ; check the backshift of all time markers and verbs ; in item 2, that is impossible after the comma.

CORRIGÉ Exercice 10 — Type Bac : Cloze test

Barème indicatif : 1 mark par item. Total : 10 marks.

1. landfill — waste is buried "at the outskirts of the city".
2. leachate — the "toxic black liquid" that flows out of a dump when it rains.
3. sorting — families "separate" materials at home = **sorting of waste (tri des déchets)**.
4. biodegradable — food leftovers are materials that **decompose naturally (se décomposent naturellement)**.
5. compost — organic waste transformed into "a natural fertiliser".
6. recycling — plastics, glass and paper sent to factories to become "new products".
7. incineration — destruction of waste "in modern ovens" (burning).
8. methane — the gas "produced by decomposing waste" that can produce electricity.
9. circular economy — the model "in which waste becomes a resource".
10. sustainability — guaranteeing the city's future "for future generations".

Point de vigilance : each word is used only once ; no **spelling mistake (faute d'orthographe)** is accepted at the Bac (copy the words exactly from the box).

CORRIGÉ**Exercice 11 — Type Probatoire : Reading comprehension**

Barème indicatif : 2 marks par question (1 mark for the correct information, 1 mark for a complete, correct sentence). Total : 10 marks.

1. (Literal / Explicite) Two problems caused by the advance of the desert : the dry season becomes longer and the rains become rarer ; the fertile land slowly turns into sand (desertification), which **threatens (menace)** the lives of thousands of families. (Any two of these.)
2. (Literal / Explicite) Acacias and neems were chosen because they can survive with very little water, and because their roots hold the soil together and prevent the wind from carrying it away. (Also acceptable : their leaves provide **shade (ombre)** for crops and **food (nourriture)** for animals.)
3. (Inferential / Vocabulaire) In this context, “nurseries” means places where young trees (seedlings / plants) are grown and looked after before being planted in the ground — not places for babies.
4. (Inferential / Inférentiel) The author’s attitude is balanced (nuancée / équilibrée) : the text presents **encouraging results (résultats encourageants)** (more than three million trees planted, a 70% survival rate, villages green again, children back at school) but also insists on the **remaining challenges (défis restants)** (climate change accelerating, funds arriving slowly, the need for the whole world to reduce emissions : “We cannot win this battle alone... But we have the duty to try.”).
5. (Synthesis / Synthèse) Suitable title for paragraph 4 : “Encouraging Results of the Initiative” or “Visible Impact on Villages and Schools”. (Any short title mentioning positive results is acceptable.)

Points de vigilance (Probatoire) : answer in complete sentences (phrases complètes) ; for literal questions, the answer must come from the text (no personal opinion) ; for the attitude question, the **justification with a textual element (justification par un élément du texte)** is compulsory to get full marks.

CORRIGÉ**Exercice 12 — Type Bac : Writing (marking guide and model outlines)**

Barème indicatif sur 20 :

Critère	Attendus	Points
Content	Relevance to the topic ; all required points covered (Topic A : problems + concrete solutions ; Topic B : substances + consequences + prevention).	6
Organisation	Clear paragraphing (paragraphe) (introduction, body, conclusion) ; linking words (mots de liaison) (furthermore, however, consequently, in conclusion).	4
Grammar	Correct use of the target structures (structures ciblées) ; tense consistency (cohérence des temps) ; varied sentences.	5
Vocabulary	Range and accuracy of unit vocabulary (landfill, biodegradable, compost, substance abuse, rehabilitation, sustainability...) ; spelling.	3
Mechanics	Punctuation, capitalisation, word count respected (150–180 words).	2

Topic A — model outline :

- Introduction : waste is a serious problem in our community (open dumps, blocked drains, floods).
- Body : solutions — **sorting at home (tri à la maison)**, **composting organic waste (compostage des déchets organiques)**, **recycling plastics (recyclage des plastiques)** ; sensitisation campaigns. Required structures, e.g. : “If every family sorts its waste, our neighbourhood will be cleaner” (**first conditional**) ; “If I were the mayor, I would build a modern landfill” (**second conditional**) ; “The bins which are placed in every quarter must be emptied regularly” (**relative clause**).
- Conclusion : waste management is everyone’s responsibility.

Topic B — model outline :

- Introduction : date, place and subject of the talk (health expert on substance abuse).
- Body – reported speech : The expert explained that tobacco, alcohol and drugs were the most abused substances among youths. He warned that drug abuse could destroy the brain and lead to school dropout. He advised students to refuse cigarettes and alcohol, and he told them to report dealers to the authorities. He added that rehabilitation centres helped addicted young people to recover.
- Conclusion : recommendation to organise more sensitisation talks in the school.

Points de vigilance (Bac) : award full grammar marks only if the mandatory structures are used correctly and naturally (Topic A : one first conditional, one second conditional, one relative clause ; Topic B : at least three **reported–speech verbs (verbes de discours rapporté)** with correct **backshift (report du temps)**). Penalise word counts outside 150–180 words and any structure copied without control (e.g. If I was you, he said that he will).

11 FICHE BILAN

Mindmap of Lesson 03 : Environment, Well-being & Health (Terminale Technique)

FICHE BILAN

L'essentiel à connaître pour l'examen

11.1 Key Definitions & Grammar Rules

DÉFINITION Relative Clauses (Propositions relatives)

A subordinate clause that modifies a noun (antecedent). Introduced by a **relative pronoun**.

- Who / That : People (Sujet/Objet). Ex : The doctor who treats patients...
- Which / That : Things/Animals (Sujet/Objet). Ex : The cigarette which causes cancer...
- Whose : Possession (People/Things). Ex : The man whose son is sick...
- Where : Place. Ex : The hospital where I was born...
- When : Time. Ex : The day when we quit smoking...

Defining (Restrictive) : No commas, essential info. Non-defining : Commas, extra info (cannot use that).

DÉFINITION Direct & Indirect (Reported) Speech

- Direct : Exact words. He said, "I am sick."
- Indirect : Reported meaning, tense shift (**backshift**), pronoun/time/place changes.

Direct Tense	Reported Tense	Example
Present Simple	Past Simple	"I smoke" → He said he smoked.
Present Continuous	Past Continuous	"I am quitting" → He said he was quitting.
Present Perfect	Past Perfect	"I have stopped" → He said he had stopped.
Past Simple	Past Perfect	"I quit" → He said he had quit.
Will	Would	"I will try" → He said he would try.
Can	Could	"I can resist" → He said he could resist.
Must	Had to	"I must go" → He said he had to go.

Modals not changing : Could, Would, Should, Might, Ought to. Time/Place shifts : Now→Then, Today→That day, Here→There, Tomorrow→The next day, Yesterday→The previous day.

DÉFINITION First & Second Conditionals

- First Conditional (Real Future) : If + Present Simple, ... Will + Base Verb. Possible/likely future.
- Second Conditional (Unreal Present/Future) : If + Past Simple, ... Would + Base Verb. Hypothetical, unlikely, imaginary. If I were you, I would stop.

DÉFINITION Advanced Adjective Structures

- How + Adjective (+ Subject + Verb!) : Exclamation. How dangerous smoking is!
- Too + Adjective + To + Verb : Excess → Negative result (Impossible). He is too weak to work.
- Adjective + Enough + To + Verb : Sufficiency. He is strong enough to resist.
- Superlative : The most + long adj / The + short adj + -est. The worst habit.

11.2 Essential Vocabulary Clusters (Mots-clés)

Theme	Key Terms (English / Français)
Substance Abuse	Addiction (dépendance), Overdose (surdose), Withdrawal symptoms (symptômes de sevrage), Peer pressure (pression des pairs), Rehabilitation (rééducation/desintox), Sobriety (sobriété), Craving (envie irrésistible).
Communicable Diseases	Pathogen (pathogène), Transmission (transmission), Contagious (contagieux), Immunization/Vaccination (vaccination), Hygiene (hygiène), Sanitation (assainissement), Outbreak (épidémie), Quarantine (quarantaine), Vector (vecteur).
Environment / Climate	Greenhouse effect (effet de serre), Global warming (réchauffement climatique), Carbon footprint (empreinte carbone), Fossil fuels (combustibles fossiles), Renewable energy (énergies renouvelables), Deforestation (déforestation), Biodiversity loss (perte de biodiversité).
Waste Management	Landfill (décharge), Incineration (incinération), Recycling (recyclage), Composting (compostage), Biodegradable (biodégradable), Hazardous waste (déchets dangereux), Segregation/Sorting (tri sélectif), Circular economy (économie circulaire).

11.3 Express Methods (Méthodes Express)

MÉTHODE Writing a Relative Clause

1. Identify the antecedent (noun to define). 2. Choose the correct relative pronoun (Who/Which/Whose/Where/When). 3. Place clause immediately after the antecedent. 4. Check : Defining (no comma) vs Non-defining (commas). 5. Ensure verb agrees with antecedent.

MÉTHODE Reporting Speech (Backshift)

1. Change reporting verb tense (Say → Said, Tell → Told). 2. Apply tense backshift (Present → Past, Past → Past Perfect, Will → Would). 3. Change pronouns (I → He/She, My → His/Her). 4. Adjust time/place markers (Now → Then, Here → There). 5. Remove quotation marks, add that (optional).

MÉTHODE Choosing Conditional Type

Step 1 : Is the situation Real/Possible (Future)? → 1st Conditional (If + Present, Will).

Step 2 : Is the situation Imaginary/Unlikely/Advice (Present/Future)? → 2nd Conditional (If + Past, Would).

Step 3 : If I were you (Advice) always uses 2nd Conditional.

MÉTHODE Writing a Composition (Bac Standard)

1. Analyse the topic (Type : Argumentative, Descriptive, Narrative, Letter). 2. Brainstorm vocab & arguments (Mindmap). 3. Outline : Introduction (Hook, Thesis), Body (2–3 paragraphs : Topic sentence, Evidence, Link), Conclusion (Re-state thesis, Call to action). 4. Draft using connectors (Furthermore, However, Consequently). 5. Proofread : Grammar (Tenses, Conditionals, Relatives), Spelling, Word count (±10%).

À RETENIR Checklist avant le Bac – Lesson 03

- ☐ I can define Relative Clauses and choose the correct pronoun (Who/Which/Whose/Where/When).
- ☐ I distinguish Defining vs Non-defining clauses (comma usage).
- ☐ I master Backshift rules for Reported Speech (Tenses, Modals, Time/Place).
- ☐ I correctly form First Conditional (Real future : If + Present, Will).
- ☐ I correctly form Second Conditional (Unreal : If + Past, Would) + If I were you.
- ☐ I use How + Adjective for exclamations (How harmful...!).
- ☐ I distinguish Too...To (Impossible) vs Adj+Enough+To (Possible).
- ☐ I form Superlatives correctly (Short/Long adjectives, Irregulars : Bad→Worst).
- ☐ I know key vocabulary for Substance Abuse, Communicable Diseases, Climate Change, Waste Management.
- ☐ I can write a structured Composition (Intro, Body, Conclusion) on environment/health topics.
- ☐ I can extract specific info from a Listening text on disease prevention.
- ☐ I can participate in a Speaking exchange on drug/alcohol abuse risks.
