

FICHE DE TD 3/3 • DIFFICILE

Anglais • Tle T

Economic life and occupations

Anglais – classe de Terminale technique

Cette fiche d'intégration évalue votre capacité à mobiliser le lexique économique, les structures comparatives complexes, les marqueurs temporels et la syntaxe de la subordination/coordination dans des situations professionnelles authentiques.

EXERCICE 1 Analyse comparative de services bancaires et ressources communautaires

Lisez le texte ci-dessous et répondez aux questions qui suivent.

"The Municipal Council of Buea has been planning the construction of a new vocational training center for the past three years. Since the initial feasibility study was completed, the council has compared twice as many funding proposals as last year. Proposal A, submitted by the National Development Bank, offers a loan at a lower interest rate than Proposal B from a private consortium. However, the private consortium requires fewer administrative guarantees than the state bank. The Mayor stated : "We must assess which option best meets the community's needs before the fiscal year ends after next June. Not only does the center need modern equipment, but it also requires sustainable maintenance contracts."

1. Vocabulary in Context : Explain the nuance between "assessing consumer needs" and "assessing community resources" in the context of this project. Use "whereas" or "while" to structure your answer. (2 pts)
2. Grammar – Double Comparison & Degree : Identify three distinct comparative structures used in the text (e.g., equality, superiority, double comparison). For each, rewrite the sentence fragment using a different structure of comparison conveying the same meaning (e.g., transform superiority into inferiority/equality). (3 pts)
3. Grammar – Time Adverbials : The text uses "for the past three years", "since", "before", "after". Justify the choice of the present perfect / present perfect continuous in the first sentence versus the past simple in the second clause ("was completed"). Place the adverbs "already", "yet", "still" correctly in the following sentence : "The council _____ has _____ reached a final decision _____." (2 pts)
4. Critical Analysis : The Mayor uses a correlative coordination ("Not only... but also"). Analyse the rhetorical effect of this inversion structure compared to a standard coordination ("The center needs... and requires..."). Why is it strategically relevant in a funding negotiation context ? (3 pts)

EXERCICE 2 Rédaction professionnelle : Rapport d'évaluation et prise de décision

Vous êtes consultant junior pour une ONG locale. Vous devez rédiger un rapport formel (200–250 mots) recommandant le meilleur choix entre deux offres de services bancaires pour le financement d'une micro-entreprise artisanale (transformation agroalimentaire). Données :

- Offre Alpha (Banque Mutuelle) : Taux 6%/an, garantie : matériel acheté, délai déblocage : 2 semaines, frais dossier : 50 000 FCFA. Suivi client since 5 ans.
- Offre Beta (Banque Commerciale) : Taux 5.5%/an, garantie : hypothèque terrain, délai déblocage : 1 mois, frais dossier : 25 000 FCFA. Nouveau client.
- Profil entrepreneur : Jeune diplômé, pas de foncier, matériel d'occasion évalué à 2M FCFA, besoin urgent (récolte dans 3 semaines).

1. Synthesis Writing : Write the report. Mandatory constraints :

- Use at least two complex sentences with subordination (concession, condition, consequence).
- Use at least three distinct comparative forms (double comparison, equality, superlative of inferiority/superiority).
- Integrate four time adverbs/expressions (for, since, ago, after, afterwards, by the time, until).
- Express preference/choice using structures ("would rather", "had better", "prefer ... to", "it is high time").

(10 pts)

2. Self-Correction/Annotation : Underline in your text (or list separately) the 10 mandatory grammatical/lexical items required above and label them (ex : [Subordination : Concession], [Double Comp.], [Time Adv : since], [Pref : would rather]). (5 pts)

EXERCICE 3 Étude de cas intégrée : « Le Meilleur Choix » (Best Buy) pour une coopérative

Une coopérative paysanne (50 membres) doit acquérir une unité de transformation (broyeur, presse, conditionneuse). Budget : 15M FCFA. Trois fournisseurs proposent des packages « Clé en main » incluant formation et maintenance 1 an.

Critères	Fournisseur X (Local)	Fournisseur Y (Sous-régional)	Fournisseur Z (International)
Prix total (FCFA)	14.5M	13.8M	16.2M
Qualité (ISO/Normes)	Norme nationale	Norme CEDEAO	Norme ISO 9001
Délai livraison	2 semaines	6 semaines	3 mois
Maintenance (après 1 an)	Sur site, 48h	Dépôt régional, 2 sem.	Pièces importées, 1 mois
Formation incluse	5 jours sur site	3 jours en ligne	1 semaine usine (à l'étranger)
Garantie	2 ans pièces/main d'œuvre	1 an pièces seulement	3 ans pièces (main d'œuvre exclue)

1. Quantitative & Qualitative Comparison : Write a structured analysis comparing the three offers. Use coordination to link similar criteria and subordination to contrast trade-offs (price vs quality vs time). Explicitly use structures of equality ("as ... as", "the same ... as") and double comparison ("the sooner ..., the better"). (5 pts)
2. Consumer Needs Assessment : Define the "consumer needs" of this cooperative (prioritize : cash flow, technical autonomy, risk management). Argue which offer best satisfies the "greatest number of needs for the lowest opportunity cost". Use "had better" or "would sooner" for your recommendation. (4 pts)
3. Banking Integration : The cooperative lacks 3M FCFA. They approach a bank. Draft the opening paragraph of a formal loan application letter (80 words max) justifying the choice of supplier made in 2. Demonstrate mastery of complex sentence architecture (embedding relative clauses, participle clauses, noun clauses). Do not write the full letter. (3 pts)
4. Critical Reflection : "Comparing prices alone is a necessary but insufficient condition for determining the best buy in a developing economy context." Discuss this statement with specific reference to the community resources/services (training, maintenance infrastructure, local employment) implied in the table above. (3 pts)
